**Standard A1.1**

**Physics Cover Sheet**

Students participating in the 1818 ACC Program through enrollment PHYS 122 and 124 are held to at least the same standards of achievement as those expected of students taking the same course on the Saint Louis University campus. Because of the high value Saint Louis University and the College of Arts & Sciences place on individual departmental and faculty autonomy, rarely are any two syllabi identical, even among campus professors or instructors. The paired syllabi attached may not appear to articulate identical course objectives and expectations. In fact, the campus sections appear not to have clearly articulated course objectives. However, close scrutiny of the course description of the campus section will prove them to be comparable in content and rigor.

Course objectives are determined collaboratively within departments. Members of the campus Physics faculty have collaborated to develop the general description and topical course outline for PHYS 122 and 124 courses. It is within the authority of the individual instructors to design the actual section which he/she will deliver, based on the instructor’s interests and academic research areas, the student population for which the course was designed (e.g. PHYS 122 and 124 was designed for Physical Therapy students), and partner school curriculum and facilities.

Instructors delivering sections on campus are instructed to submit copies of their syllabi to the department chair each semester, who forwards them to the Associate Dean of the College of Arts & Sciences, in whose office they are housed. High school adjunct instructors are directed to send copies annually to the 1818 ACC Program office where they are housed, and from which copies area forwarded to the Physics faculty liaison.
