If you could fit the entire population of the world into a village consisting of 100 people, maintaining the proportions of all the people living on Earth, that village would consist

57 Asians
21 Europeans
14 Americans (North, Central and South)
8 Africans
There would be:
52 women and 48 men
30 Caucasians and 70 non-Caucasians
30 Christians and 70 non-Christians
89 heterosexuals and
11 homosexuals
6 people would possess 59% of the wealth and they would all come from the USA
80 would live in poverty
70 would be illiterate
50 would suffer from hunger and malnutrition
1 would be dying
1 would be being born
1 would own a computer
1 (yes, only one) would have a university degree
If you woke up this morning in good health, you have more luck than one million people, who won’t live through the week.
If you have never experienced the horror of war, the solitude of prison, the pain of torture, were not close to death from starvation, then you are better off than 500 million people.
If you have a full fridge, clothes on your back, a roof over your head and a place to sleep, you are wealthier than 75% of the world’s population.
If you currently have money in the bank, in your wallet and a few coins in your purse, you are one of 8 of the privileged few amongst the 100 people in the world.
