## A.L.I.C.E. Response to Active Shooter

**Description**
The Department of Public Safety has put in place an improved active shooter/violent intruder response program for faculty, staff and students. The A.L.I.C.E. (Alert, Lockdown, Inform, Counter, and Evacuate) Program teaches students, faculty and staff tactical advantages they have if a situation occurs. DPS teaches survival strategies that will save lives in the event of an active shooter situation. The safety of the students, staff and faculty remains our main concern and we believe this program provides the best chance at surviving in an active shooter situation.

Objectives:
- Understand that during an active shooter situation survival can be dependent on knowing what options are available.
- Realize that simply locking the doors, turning off lights or hiding under desks has not been an effective strategy.
- Possess basic understanding of evacuation, barricading, and countering.
- Understand the importance of accurate communications during an event.
- Possess a basic understanding of an active shooter's determination and intent to injure/kill as many people as possible in a short window of time.
