# Billiken Wireless

## Wireless Configuration for MAC OS Leopard 10.5.6 or Newer

### Step-by-Step Instructions

* Make sure that your Mac has all of the current updates before setup.*

1. **Turn AirPort Off.**

2. **Select Network Preferences** from the Airport icon on the toolbar at the top right.

3. **Click** the **Advanced button** at the bottom right of the window.

4. **Click** the **AirPort tab**, then **click** the + symbol below Preferred Networks. A new window will display. **Select 802.1X WEP** on the Security drop-down menu and then **enter** the following:
   - Enter slunet in the Network Name: field.
   - Enter your SLU Net ID in the User Name: field.
   - Enter your SLU Net password in the Password: field.
   - Check the Remember this network box.
   - Select Automatic in the 802.1X drop-down menu.

5. **Click OK** to close the window.

6. **Turn AirPort On.**

7. **On the Network Name drop-down menu, select slunet.** It will take a few moments to connect. A new window will display.

8. **Click Show Certificate** and then **select Entrust.net Secure Server Certification Authority**.

9. **Check** the Always Trust box and **click Continue**.

### Please note:

- **Remember**: Once you authenticate, you will always be able to connect. But, if you ever change your SLU Net ID Password, it will change your password on the wireless network as well.

- **Experience difficulties or have additional questions?** Contact the IT Service Desk at 314-977-4000 or helpdesk@slu.edu.

- If a visiting professor needs wireless access, contact the IT Service Desk at 314-977-4000 to set up a guest account.
