Enrolling in PGP

This document will cover the enrolling process for PGP Whole Disk Encryption. For troubleshooting issues or questions about the enrollment process, please contact ITS at 314-977-4000.

1. Login to the machine through the Windows logon window.
2. A popup will appear, asking you to enter your authentication credentials to enroll in PGP. Enter your credentials and click “OK”.

3. PGP will begin enrolling your account to the server. A screen will show PGP working.
4. A small popup window will appear, notifying you that PGP is now encrypting your drive.

5. You can view the encryption progress by opening the PGP Desktop from the icon tray in the lower right hand corner. Navigate to PGP Disk > Encrypt Disk.
