Logging into the Pre-boot Screen

You will press any key to continue from the ‘Appropriate Use’ Screen. You will need to use the **TAB key to move through the fields on the pre-boot screen, in-order to log on to your system. You will use your SLU **User ID and Password to logon to the system; this would be the same one you used during the enrollment. *(Symantec uses passphrase in place of password, these are the same).* Anytime you see passphrase, it is referring to your password. Once you have entered in your user id and password, press the enter key to continue log-in.
