If you do not see a wireless icon \( \text{ bile icon } \) in the upper right corner, you may need to complete the following steps:

1) **Select System**, then **Administration**, and lastly **Hardware Drivers**.
2) **Select your wireless driver** and **click Activate**.
3) **You may need to restart your computer** for the changes to take effect.

If you see a wireless icon \( \text{ bile icon } \) in the upper right:

1) **Right-click on the wireless icon**, then **select Edit Connections**.
2) **Next, select the Wireless tab**; **click Add**.
3) **Fill in “slunet” for the SSID** and leave other fields blank.
4) **On the Wireless Security tab**, enter the following information:
   - Security – **WEP 802.1X**
   - Authentication – **Protected EAP (PEAP)**
   - CA Certificate - **None**
   - PEAPER Version - **Automatic**
   - Inner Authentication – **MSCHAPv2**
   - Username – **Your SLU Net Id**
   - Password – **Your SLU Net Password**
5) **Click Apply**; the network is configured.

*Note: You may left-click the wireless icon \( \text{ bile icon } \) in the upper right to view available wireless networks and connect to slunet. You may safely ignore the warning below.*
