CALCULATING YOUR GRADE POINT AVERAGE

Understand your grade report:

____ EHRS (Earned hours): all credit hours earned, including transfer, AP, 1818 and classes completed at SLU

____ GPA Hours : credit hours used in calculating GPA; includes all classes completed at SLU, including failed classes

____ QPTS (Quality points): each grade has a point value (A=4, A-=3.7, B+=3.3, B=3, B-=2.7, C+=2.3, C=2, C-=1.7, D=1 F=0). The quality points for a class are determined by multiplying this point value by the number of credit hours for the course. The number on your grade report is the total of all quality points. Your cumulative GPA is calculated by dividing the total quality points by the total quality hours.

1) Current GPA:

\[
\text{Quality Points} \div \text{GPA Hours} = \text{GPA}
\]

Current Deficit Points: \[
\frac{\text{Quality Points}}{\text{GPA Hours}} - 2(\text{GPA Hours}) = \text{Deficit Points}
\]

Estimate your grades for this or the upcoming semester:

2) Estimated Semester GPA:

\[
\text{Quality Points} \div \text{GPA Hours} = \text{GPA}
\]

Estimate your cumulative GPA at the end of this semester:
Combine the quality points and quality hours earned to date (from section one) with the estimated quality points and quality hours for this semester.

\[
\frac{\text{TOTAL}}{\text{GPA Hours}} = \text{cumulative GPA}
\]
