Topic	Discussion
Luminis	<ul style="list-style-type: none"> • The purpose of the meeting today is to review the status of Luminis from a functional side and technical objective to make a decision if Luminis should go live January 20, 2004. <p><u>Open Issues:</u></p> <ul style="list-style-type: none"> • Eliminating accounts in Luminis when a person leaves the university • Human resources role changes is not a mechanism that Luminis recognizes • There is an ongoing issue of what version of browser works and is recognized by Luminis recognizes. <p><u>Outstanding issues</u></p> <ul style="list-style-type: none"> • Signal Sign-on Connections – Before single-sign on is permitted, there are several applications to consider and technical issues to review before approved. There should be a discussion about single sign-on used in a windows environment. The faculty community has expressed concerns about whether the potential risks may out way the advantages. • Ellen Harshman – Would January 21, 2004 be a more reasonable alternative to launch Luminis to provide more time for testing? • Elizabeth Winchester – Additional testing should be done before we are ready to proposed a launch. • Ellen Harshman –Suggested holding off on Luminis story, or just change the launch date. • Austin Winkleman – Still have not discussed security issues. Suggest that we do not go live on January 19, 2004, and talk about what needs to be done. • Ellen Harshman – Concerned about testing issues. There is no advantage to rolling Luminis out sooner than ready. • Bruce Vieweg – The agenda for next week Steering Committee meeting will be testing and security. Phil Lyons can stop the presses. I would prefer to state that Luminis would be launched at the end of the month or within the next couple of weeks.
Items to refer to Executive Committee <i>Wednesday, January 21, 2004</i>	<ul style="list-style-type: none"> • Load Testing and security issues for Luminis
