

RIGHTFormulary Preferred Member Reference Guide (Alphabetical Order)

To avoid the higher copayment associated with non-formulary drugs, please ask your prescriber to refer to this preferred drug list when prescribing medications for you and your dependents.

Please note that this listing does not imply a guarantee of coverage, as covered products and/or categories are subject to individual plan restrictions and/or limitations.

A lower case listing represents a generic medication and the generic copay applies. An upper case listing represents a brand name medication and the brand name copay applies.

Substitution of generic products is encouraged when available and appropriate. All generic medications are considered as preferred agents.

If you have questions, please call Eckerd Health Services at the toll-free number printed on your member I.D. card.
