Parks College of Engineering, Aviation and Technology

Parks College of Engineering, Aviation and Technology prepares students for careers in engineering, aviation, technology, physics and related fields. Satisfying this mission demands excellence in academic programs that integrate the education of the whole person, in the liberal and Jesuit traditions, with classroom and laboratory experiences in the major fields of study. A Parks College education provides opportunities for students to develop intellectually, stay abreast of changing technology, learn more about themselves and the world in which they live, and to prepare for a lifetime of learning.

Accreditation
The Aerospace Engineering, Mechanical Engineering, Electrical Engineering, and Biomedical Engineering curricula are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700. The Flight Science curriculum is accredited by the Aviation Accreditation Board International (AABI). The newly established (2007) Computer Engineering degree program will be seeking accreditation at the next ABET visit. The College also offers an interdisciplinary degree in engineering that allows students to create a customized study plan in preparation for a wide variety of career paths.

Undergraduate Degrees Offered
Parks College undergraduate programs offer Bachelor of Science degrees with majors in the following areas.

Majors Available:
Aerospace Engineering
Biomedical Engineering
Civil Engineering
Computer Engineering
Electrical Engineering

Concentration available in Bioelectronics
Engineering Physics
Flight Science
Interdisciplinary Engineering
Mechanical Engineering
Physics

Bachelor of Science - Parks College
Bachelor of Arts - College of Arts & Sciences

Minors Available:
Air Traffic Control
Aerospace Engineering
Parks College, Math, Computer Science, & Physics students only
Biomedical Engineering
Flight Education
Flight Science majors only
Flight Science
Mechanical Engineering
Parks College, Math, Computer Science, & Physics students only
Physics

Special Admission Requirements
Admission requirements to Parks College of Engineering, Aviation and Technology degree programs are based on a combination of secondary school grades, college admission test scores, co-curricular activities and attempted college course work, as well as other indicators of the applicant’s ability and character. This process respects the non-discrimination policy of the University and is designed to select a qualified, competent and diverse student body with high standards of scholarship and character, consistent with the mission of the University.

In addition to the general admission and matriculation requirements of the University, Parks College has the following additional requirements. The recommended minimum academic requirements for admission into particular programs are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Freshman GPA</th>
<th>Transfer GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aerospace Engineering</td>
<td>3.00</td>
<td>2.70</td>
</tr>
<tr>
<td>Biomedical Engineering</td>
<td>3.00</td>
<td>2.70</td>
</tr>
<tr>
<td>Civil Engineering</td>
<td>3.00</td>
<td>2.70</td>
</tr>
<tr>
<td>Computer Engineering</td>
<td>3.00</td>
<td>2.70</td>
</tr>
<tr>
<td>Electrical Engineering</td>
<td>3.00</td>
<td>2.70</td>
</tr>
<tr>
<td>Engineering Physics</td>
<td>3.00</td>
<td>2.70</td>

</tr>
<tr>
<td>Physics</td>
<td>3.00</td>
<td>2.70</td>
</tr>
<tr>
<td>Still Deciding – Engineering</td>
<td>3.00</td>
<td>n/a</td>
</tr>
</tbody>
</table>

For admission into the above programs it is recommended that a student have fifteen units of high school work:

a. Three or four units of English
b. Four or more units of Mathematics - Algebra I and II, Geometry, and mathematics with a focus on trigonometry prior to or during the senior year, such as Pre-Calculus (Algebra II with Trigonometry is not sufficient). Students should be prepared to start the first semester freshmen...
year in Calculus I or higher.

b. Three or more units of Mathematics - Algebra I and II, and Geometry

c. Three or four units of sciences – General Science, Introduction to Physical Science, Earth Science, Biology, Physics, or Chemistry

d. Two or three units of Social Sciences - History, Psychology, or Sociology

e. Three units of electives

**Bachelor of Science in Aeronautics**

<table>

For admission into the above programs it is recommended that a student have fifteen units of high school work:

a. Three or four units of English

b. Three or more units of Mathematics - Algebra I and II, and Geometry

c. Three or four units of sciences – General Science, Introduction to Physical Science, Earth Science, Biology, Physics, or Chemistry

d. Two or three units of Social Sciences - History, Psychology, or Sociology

e. Three units of electives

**Admission to Flight Science Program**

Enrollment capacity in the Flight Science program may be limited; therefore, early application is strongly encouraged. In addition to meeting the academic requirements for admission, the applicant to any flight science program must be able to pass a Federal Aviation Administration (FAA) Class II medical examination. This physical examination is an absolute prerequisite for flight training and should be taken prior to the student’s arrival on campus.

For specific information regarding the Class II medical examination, see the FAA website http://www.faa.gov/pilots/amelocator/. This source will provide information about the medical certificate as well as listing of FAA designated Aviation Medical Examiners.

International students will be evaluated for their listening comprehension and spoken ability in addition to meeting regular English requirements. Prior to commencing flight instruction, special training will be required for those students found deficient in this evaluation.

**Math for Entering Students**

Applicants to the engineering or physics programs are encouraged to take mathematics with a focus on trigonometry, such as Pre-Calculus or Analysis, prior to or during the senior year. Students should be prepared to take Calculus I in the first semester of college.

Students not prepared to take Calculus I may need to take Pre-Calculus the first semester and Calculus the second semester, followed by Calculus II and Physics I during the summer, in order to graduate in four years.

Math placement exams may be required of beginning and transfer students who have not completed a college-level transferable mathematics course before coming to Parks College. The placement exam is used only as a tool along with ACT and SAT test scores and high school math work to determine the appropriate placement. The placement exam does not result in credit being awarded.

Any student that is admitted or starts with a math course lower than Pre-Calculus will be considered a Parks College Still Deciding student. Students must successfully complete Calculus I, demonstrated by receiving a C- or higher, before they are allowed to declare an engineering major.

**College Level Examination Program**

Parks College accepts successfully completed CLEP results for credit. These, however, must be Subject Examinations. The College does not recognize the General CLEP for credit purposes.

Credit will be granted for CLEP under the following conditions:

1. A maximum of thirty hours can be earned through CLEP.
2. The score on each test must equal or exceed the 50th percentile on the national college sophomore norm.
3. Credit will be awarded in Subject Examinations when approved by the department offering comparable courses. This credit will be awarded on the basis of the number of credit hours in the pertinent courses.
4. Transfer students please note: Acceptance of CLEP Examinations for advanced standing by another college or university does not automatically ensure the transfer of this credit to Parks College. Recording of advanced standing for CLEP courses on the Academic Record is contingent upon the College’s receiving the Educational Testing Service results of all CLEP examinations for which the student is seeking advanced standing.
5. Full-time students may take external examinations for credit, including required departmental CLEP supplementary examinations, within one calendar year of initial registration at Parks College.
Special Registration Procedures
Some special registration procedures apply to students enrolled in Parks College.

Pass/No Pass Option
The maximum number of hours that may be taken on a Pass/No Pass basis is eighteen (18), but not more than one course is permitted during any one semester.

These eighteen (18) hours may be taken under the following options:
1. Any hours above the number required for graduation.
2. Any hours within the number required for graduation which are not longer specified due to the results of testing out of courses and/or advanced placement.
3. Any hours within the area of concentration which are not required by the controlling department and for which the student has received the approval of the advisor.

Pass/No Pass hours are not counted towards fulfilling degree requirements. The student must register as a Pass/No Pass member of the class. This status becomes permanent at the time of registration. The student is responsible for seeing that the above conditions are met.

Audit
A student may audit a course offered at Parks College with the following reservations:
1. The student must have approval of the instructor and department chair to sit in that particular class. A course taken for credit may be changed to an audit status until the last day to receive a grade of “W”.
2. The student is eligible to take tests if he or she desires. However, they will not be graded.
3. No grade or credit can be earned by auditing a course and, although an “AU” grade is entered instead of the grades described elsewhere, the course does not count toward fulfilling the degree requirements.
4. An exemption examination cannot be taken for an audited course.

Registration at Another Educational Institution
Classified students at Parks may not register for courses at other educational institutions without prior written approval of the Dean of Parks College.

Flight Instruction at Other Institutions
Once a student has enrolled at Parks College, all subsequent flight instruction must be completed in residence at the College. Flight instruction outside of the College’s FAA-approved pilot instruction curricula is not permitted without prior written approval from the Chair of the department (whether currently enrolled or not). Students who receive flight instruction outside the approved curricula without prior approval are subject to dismissal from the program.

Flight fees will be charged in addition to the regular tuition. Please contact the Aviation Science Department for the current rates.

Students with prior flight experience/certification will be evaluated for proficiency at the corresponding flight certification level. Based on the results of such evaluation, the Director of Flight Training will recommend either some remedial training or continuation to the next level of training. Ground school courses completed at a Part 141 flight school may be transferable; those completed at a Part 61 flight school may not be transferable. Early consultation with the Department Chair and/or the Director of Flight Training is strongly recommended.

TSA Requirements
The Transportation Security Administration (TSA) requires any individual applying for flight training to provide proof of citizenship prior to beginning the training. New student pilots will be unable to begin flight training until the proof of citizenship requirement is met. Pilots typically provide 1) the individual’s valid, unexpired U.S. passport or 2) the individual’s original or government-issued certified U.S. birth certificate, together with a government-issued picture identification of the individual. Other TSA-specified documents may be accepted. Non-U.S. citizens must receive TSA approval prior to beginning any flight training. Please contact the Flight Training Director’s office for additional information.

Special Academic Requirements

Attendance
As a policy, undergraduate students are expected to attend regularly all classes, laboratory sessions and examinations. The implementation of this policy is left to the discretion of the individual instructor with the following exception: no absences are permitted in any course, which is required for the Federal Aviation Administration (FAA) regulated pilot certification courses. FAA regulations specify the number of hours required in the approved programs. Students should contact the academic departments for details of these regulations.

If any absences occur, it is the student’s responsibility to make up the missed work. Since the student is expected to attend classes regularly, the instructor is not obligated in
any way to provide make-up examinations or additional help on material covered when a student is absent. When, in the judgment of the instructor, a student has accrued an excessive number of absences, the instructor may report this on the appropriate excessive absence form to the student and his/her advisor. This report is, in effect, a warning. At the discretion of the instructor a grade of “AF” (failure due to excessive absence) may be given.

When a student is absent because of an authorized student activity, the instructor, providing that the faculty member directing such student activities secures prior approval from the Dean’s office, may excuse the absence. Any scholastic difficulties resulting from the absence, as well as any assignments and examinations, remain the student’s responsibility.

Minimum GPA for Flight Training
If a student’s GPA drops below a 2.0, that student will not be eligible for a flight slot the following semester.

Academic Categories

Unclassified
Anyone enrolled in Parks College who is not pursuing a program of studies designed to obtain a degree from the college or university but who enrolls in one or more classes will be considered an unclassified student. Unclassified students who subsequently decide to pursue a degree must complete the entire process of applying for admission and must be admitted under the usual guidelines and procedures.

Students in Good Academic Standing
Students with a cumulative grade point average of 2.00 or higher are classified as students in good standing. Such students are classified as part-time if enrolled for less than twelve hours, full-time if enrolled for between twelve and eighteen credit hours, and full-time on overload if enrolled for more than eighteen credit hours.

Students on Supervisory Status
Minimum satisfactory scholastic achievement at Parks College is represented by a 2.00 cumulative grade point average (a C average). Anyone whose current or term grade point average is below 2.00 and whose cumulative grade point average is above a 2.00 will be considered on supervisory status during the term in which they next attend Parks College. Such students must see their Academic Advisor prior to the third day of class of next term of enrollment.

Supervisory conditions include:

1. Student will not hold office in any student organization during the period of probation.
2. Student will be restricted to no more than 15 credit hours. The academic advisor may grant exceptions to these rules.
3. After receiving mid-term grades, the student must consult with his/her advisor as to his/her academic performance. If the student fails to do so, a registration hold will be placed on the academic record.

Students on Contract Status
Anyone whose overall grade point average is below 2.00 will be considered on contract status (probation) during the term in which they next attend Parks College. Such students must see their academic advisor prior to the third day of class of next term of enrollment.

Contract conditions include:
1. They may not hold office in any student organization during the period of probation.
2. They will ordinarily be restricted to no more than 15 credit hours.
3. After receiving their mid-term grades, they must consult with their advisor as to their academic performance. If the student fails to do so, a registration hold will be placed on their academic record.
4. Student will be required to sign a contract stating that he or she will decrease the credit point deficiency by a fixed amount (to be determined by Parks College) and acknowledging that failure to satisfy this contract can result in dismissal from Parks College. Parks College may grant exceptions to these rules.

The pre-registration of students on supervisory and contract status will be cancelled if the student fails to see their Academic Advisor prior to the third day of class of next term of enrollment. Students who have not registered and attended classes within the first three days of the semester may not be allowed to enroll. A registration hold will be placed on their academic record.

Dismissed Students
Parks College enforces the university’s policy on academic dismissal. A student may be dismissed if he or she fails to reach a 2.0 cumulative GPA within two semesters subsequent to the assignment of probation status or reaches a grade point deficiency of more than 15 points. Any student on contract status who does not satisfy the contract he or she signed with Parks College may be dismissed. In addition, any student who fails a course three times can be dismissed from the college.
Appeal Options for Dismissed Students
A dismissed student may attempt to again attend Parks College by appealing to the Dean. Information regarding this appeal may be obtained from the Dean’s office.

Parks College Core Curriculum
In addition to general requirements specified by the University, all students in degree programs leading to Bachelor of Science degrees must satisfy the Parks College Core Curriculum requirements and additional requirements specified by the individual academic programs.

Parks College of Engineering, Aviation and Technology has established educational objectives for students graduating from Bachelor of Science degree programs. Some objectives are specific and unique to degree programs, while others are broader in scope and may include students and instruction from outside of the degree program and college. The Parks College Core Curriculum describes the educational experiences that the faculty and administration of the college have identified as being “essential” for all Parks College students, and it describes the methods by which selected academic objectives may be accomplished.

Notice to students:
Individual degree programs may require specific courses in order to satisfy these requirements. It is recommended that students consult their Academic Advisor, Department Chairperson or Program Director for guidance in choosing core curriculum courses.

Professional Orientation (minimum of 1 credit)
One course designed for incoming freshman students providing an orientation to careers in the intended field of study. Also included is presentation of resources available to students from the department, college, and university.

Jesuit Tradition (minimum of 12 credits)
Theology (3 Cr.)
Philosophy and/or Ethics (3 Cr.)
Humanistic Values (6 Cr.)

Knowledge (minimum of 16 credits)
Science with laboratory experience (4 Cr.)
Aerospace & Mechanical Engineering

Aerospace Engineering (B.S.)

The Aerospace Engineering program has the following objectives:
1. To prepare our graduates to practice the principles of engineering in aerospace or allied organizations.
2. To prepare graduates to pursue further learning in aerospace engineering or in allied disciplines.
3. To prepare graduates to function as effective engineers with professional knowledge, skills, and values.

To this end, the design process, as exemplified by the assignment of open-ended problems, is experienced in nearly all engineering courses. The design experience is developed throughout the program by introduction of problem identifying and solving tasks that are assigned in those courses that precede the two semester capstone design course. The student is instilled with an awareness of the impact of design decisions, not only on vehicle performance, but on society as well. Excellent laboratories emphasize measurements and experimental methods. Every effort is made to establish in each graduate, the incentives to pursue the learning process throughout his or her career.

With a solid core of mechanics, thermodynamics, fluid dynamics, electrical engineering, and linear control systems, the student is able to progress to the discipline specific areas of structures, flight dynamics and control, aerodynamics, and propulsion. There is an emphasis on both aeronautics and astronautics. The humanistic value courses, including Engineering Ethics, provide a well rounded engineering education.

Students are encouraged to participate in the activities of the student chapter of the American Institute of Aeronautics and Astronautics (AIAA) and to enter the regional and national paper competition conducted by the AIAA.

Technical Electives
Choose 6 credit hours from the list below. Each course is 3 credit hours. Check Self Service Banner to see if the course is currently being offered.
AENG 414-50 Hypersonics
AENG 422-50 Flight Simulation
AENG 423-01 Flight Testing
AENG 424-01 Helicopter Theory – Performance
AENG 432-50 Aeronastics
AENG 433-01 Comp. Structure & Design
AENG 441-01 Orbital Mechanics
AENG 442-01 Intro to Space Dynamics
AENG 453-50 Intro. To Comp. Fluid Dynamics
AENG 493-01 Space Mission Design
AENG 493-06 Engineering Entrepreneurship
AENG 493-50 Intro to Turbulence
AENG 493-55 A/C Materials Selection and/or Design & Analysis Structure Repair
AENG 498 Special Topics
Any AE Graduate course if student satisfies requirements
MENG 435-01 Computational Structure Mechanics
MENG 493-50 Product Realization & Development
MENG 493 Engineering Entrepreneurship
MGT 300-01 Management Theory & Practice
MGT 320-01 Entrepreneurship
MATH 311 Linear Algebra for Engineers – spring only
MATH 315 Linear Algebra
MATH 451 Introduction to Complex Variables
MATH 454 Applied Partial Differential Equations
MATH 473 Fourier Series & Related Boundary Value Probs
MATH 493 Numerical Analysis

Dual Degree Candidates
If you are seeking a secondary degree in Mechanical Engineering, the courses listed below cannot be used as technical electives, these are required for Mechanical Engineering.
MENG 335-01 Applied Thermodynamics
MENG 339-01 Measurements
MENG 345-01 Machine Design
MENG 351-01 Material Science
MENG 425-01 Manufacturing Process
MENG 445-01 Principle of Mechatronics

Mechanical Engineering (B.S.)

The Mechanical Engineering program has the following objectives:
1. To prepare graduates to practice the principles of engineering in mechanical or allied organizations.
2. To prepare graduates to pursue further learning in mechanical engineering or allied disciplines.
3. To prepare graduates to function as effective engineering with professional knowledge, skills, and values.

The Mechanical Engineering curriculum emphasizes Design and Manufacturing, which are the two most important functions of an engineer. Design is well integrated into all levels of the curriculum. An attempt is made to solicit industry sponsored projects for the capstone senior design course. In addition to basic science, mathematics, and engineering science courses, the curriculum includes courses in both the energy stem and the structures & motion stem. The humanistic value courses, including Engineering Ethics, provide a well rounded engineering education. Since modern mechanical systems are controlled by electronic systems, a course on Principles of Mechatronics has been included to provide the necessary interdisciplinary experience. The technical electives in the curriculum allow the student to specialize in the energy stem, the structures and motion stem or the electronics and computer science area. Designing and developing high speed transportation (cars, trains, ships, planes), automated manufacturing, rapid prototyping, advanced robots, energy efficient devices, alternate energy sources, smart materials, and artificial devices for humans are some of the future challenges for a mechanical engineer. This curriculum provides the necessary building blocks and prepares the graduate to be a part of this future.
Students are encouraged to participate in the activities of the student chapter of the American Society of Mechanical Engineers (ASME) and to enter the regional and national technical paper and design competition conducted by the ASME.

**Minor in Aerospace Engineering**

Students pursuing a Bachelor’s degree in Aviation Science, Mathematics, Computer Science, Physics, Electrical Engineering, Computer Engineering, and Biomedical Engineering programs may earn a minor in Aerospace Engineering. The Minor in Aerospace Engineering requires at least 18 credits of coursework that include a course in Introduction to Aeronautics and Astronautics (AENG 200) and at least five AENG and ESCI courses at 200 level or above. The grades in all AENG/ESCI courses must be C or better.

**Minor in Mechanical Engineering**

Students pursuing a Bachelor’s degree in Aviation Science, Mathematics, Computer Science, Physics, Electrical and Computer Engineering, and Biomedical Engineering programs may earn a minor in Mechanical Engineering. The Minor in Mechanical Engineering requires at least 18 credits of coursework that include a course in Introduction to Design (MENG 200) and at least five MENG and ESCI courses at 200 level or above. The grades in all MENG/ESCI courses must be C or better.

Mission of the Department
The mission of the Department is to actively engage in the fulfillment of the University’s mission so that our students are formed as global citizens who are intellectually, technically, and ethically prepared to be responsible leaders in the aviation profession and their community.

Degree Programs - Undergraduate
The Department of Aviation Science offers a Bachelor of Science in Aeronautics degree program with a concentration in Flight Science (FSCI) and a Bachelor of Science Degree in Aeronautics with a concentration in Aviation Management (AMT).

Degree Programs – Graduate
The Department of Aviation Science offers both a Master’s Degree and Doctoral Degree in Aviation. The Master of Aviation includes three alternate tracks for the Aviation Professional including: ATP – Advanced Qualification, Flight Operations Administration and Collegiate Flight Education.

Undergraduate Programs

Flight Science (B.S. in Aeronautics)
Parks College is the first federally certificated flight school in the country and it is the only Jesuit University with a flight program. Students of our Flight Science program have the opportunity to experience state-of-the-art learner-centric instruction; be trained in a performance-based flight instruction environment, and earn one-year’s actual flight instruction experience prior to graduation or minor in a variety of other disciplines. Upon graduation, our alumni become part of a community of leaders who will continue their professional development through a unique structured mentoring program that continues long after graduation.

The Flight Science program has flight courses integrated with science and advanced aviation subjects and it prepares the graduates for entry-level positions in charter, corporate, or airline flight operations. Flight instruction is regulated by a Federal Aviation Regulations Part 141 approved syllabi.

The goal of the Flight Science program is to not only prepare our students to fly aircraft, but also prepare them as socially responsible leaders who have a strong foundation with significant technical skills and are equipped with sufficient breadth of experiences in liberal arts and sciences that they are prepared for life.

The Department offers flight instruction at its Center for Aviation Sciences at the St. Louis Downtown Airport in Cahokia, Illinois. A fleet of Diamond DA–20 single-engine aircraft, Piper Seminole PA-44 twin-engine aircraft, and several flight training devices (simulators) are available for instruction. In order to further enhance the quality of flight education Saint Louis University recently added two state-of-the-art Advanced Training Devices (ATD): one CRJ-200 ATD and one reconfigurable PFC modular flight deck ATD.

The CRJ-200 ATD is a full-scale, precise replication of the actual CRJ-200 cockpit with all cockpit controls and components. It is built specifically to meet the need of today’s airlines, colleges, universities and flight schools. With a three-channel visual system providing a 170 degree wrap-around horizon and significant computer processing power, the CRJ-200 provides amazing realism.

The PFC modular flight deck, located at the Center for Aviation Science, simulates students on 20 different airplanes, including the new Diamond DA20s. It has an avionics stack that supports up to two Garmin GNS 430s or 530s and a four-way intercom.

Students enrolled in both the Flight Science and Aviation Management programs are encouraged to diversify their educational experience and explore areas outside of their major. Flight Science and Aviation Management students are required to pursue either an academic minor or a 12-hour grouping of affiliated electives approved by the department chair.

For those students interested in an aviation minor, the department offers the following:

Minor in Air Traffic Control (Open to all university students)
Minor in Flight Education (Flight Science students only)
Minor in Flight Science (Non Flight Science majors only)
Degree Requirements

Basic Science & Math
PHYS 135 Aviation Physics I 4
PHYS 135 General Physics I Lab 0
Students should complete one of the two math sequences.
MATH 120 College Algebra 3
MATH 132 Survey of Calculus 3
Or
MATH 141 Pre Calculus 3
MATH 142 Calculus I 4

Communications
CMMA 120 Public Speaking 3
ENGL 150 The Process of Composition 3
ENGL 192 Adv. Writing for Prof. 3

Liberal Arts
THEO 100 Theological Foundations 3
PHIL 105 Introduction to Philosophy 3
PSY 101 General Psychology 3
Additional English course at the 200 level or higher 3
PHIL 205 Ethics 3
Cultural Div Elective 3

Cultural Diversity elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.

Aviation Science
ASCI 100 Professional Orientation 3
ASCI 220 Concepts in Aerodynamics 3
ASCI 301 Jet Transport Systems I 3
ASCI 302 Jet Transport Systems II 3

ASCI 435 Team Resource Management 3
FSCI 130 Aviation Weather 3
FSCI 275 Accident Investigation 3
FSCI 445 Aviation Law 3

Flight Training
All flight training must be completed at Saint Louis University. Students with prior flight experience or certification will be evaluated for proficiency at the corresponding flight certification level. More information is available in the Parks College General Information section of this catalog.

PP 160 Fundamentals of Flight II 2
PP 210 Intermediate Flight I 2
PP 220 Prin. of Inter. Flight I 2
PP 254 Intermediate Flight II (single engine) 2
PP 260 Prin. Intermediate Flight II 3
PP 352 Multi Engine Add-On 1

Aviation Management (B.S. in Aeronautics)
The Aviation Management program prepares the graduate for entry-level positions within the aviation and space industries, and/or government agencies. Career opportunities for graduates include: management and supervisory positions with commercial airlines, the aircraft/aerospace industry, airports and governmental agencies, as well as positions as contract negotiators, budget analyst, project administrators, personnel directors, and positions in marketing and advertising.

The goal of the Aviation Management program is to not only prepare our graduates to manage aviation operations, but also to prepare them as socially responsible leaders who have a strong foundation in technical skills and are equipped with sufficient breadth of experience in liberal arts and sciences to make a difference in both their professional and personal lives.

Students enrolled in both the Flight Science and Aviation Management programs are encouraged to diversify their educational experience and explore areas outside of their major. Flight Science and Aviation Management students are required to pursue either an academic minor or a 12-hour grouping of affiliated electives approved by the department chair.

For those students interested in an aviation minor, the departments offers the following:

Minor in Air Traffic Control (Open to all university students)
Minor in Flight Education (Flight Science students only)
Minor in Flight Science (Non Flight Science majors only)

Degree Requirements

Basic Science & Math
PHYS 135 Aviation Physics I 4
PHYS 135 General Physics I Lab 0
Students should complete one of the two math sequences.

Minor in Flight Science
(Open to All University Students)
All University majors (including those who have not declared a specific major or are pursuing pre-professional programs such as pre-law and pre-medicine) are eligible to obtain a minor in Flight Science. This minor will enable the students to obtain Private Pilot Certificate, Instrument Rating, Commercial Pilot Certificate, and Multiengine Rating. The following courses are required. Note: additional flight fees apply to all flight courses—contact the Department for current rates.

PP 110 Basic Flight I 2
PP 153 Basic Flight II 2
PP 120 Fundamentals of Flight I 2
PP 160 Fundamentals of Flight II 2
PP 210 Intermediate Flight I 2
PP 220 Prin. of Inter. Flight I 2
PP 254 Intermediate Flight II 2
PP 260 Prin. Intermediate Flight II 3
PP 309 Multi Engine Add-On 1

Minor in Air Traffic Control
(Open to All University Students)
FSCI 130 Aviation Weather 3
PP 120 Fundamentals of Flight I 2
ASCI 102 Intro to Air Traffic Control System 2
ASCI 202 Fundamentals of Air Traffic Control 3
ASCI 303 Basic ATC Tower & Radar 3
ASCI 304 Advanced ATC Tower & Radar 3

Minor in Flight Education
(For Flight Science Majors Only)
Students majoring in Flight Science may obtain a minor in Flight Education by completing the following courses. These courses enable the students to obtain their Flight Instructor certificates and pursue one year of practicum study (provide instruction under the supervision of fulltime instructors).

PP 310 Flight Instructor Prep I 2
PP 320 Principles of Flight Instruction I 3
PP 350 Flight Instructor Prep II 2
PP 360 Principles of Flight Instruction II 3
PP 410 CFI Practicum I 3
PP 450 CFI Practicum II 3
Biomedical Engineering

David W. Barnett, D.Sc., Chair

Faculty:
David W. Barnett, D.Sc.
Gary Bledsoe, Ph.D.
Hanthorn, David B., Ph.D.
Cheryl Miller, Ph.D.
Cecil W. Thomas, Ph.D.
Jessica Wagenseil, D.Sc.

The Department of Biomedical Engineering (BME) offers an undergraduate degree program that combines math, chemistry, and physics, as well as biology-physiology to form a unique engineering discipline. The first two years build a strong foundation of basic sciences and liberal arts, with introductory engineering. In the next two years, courses and labs build on the basic sciences and math to provide a focus of integrative courses in Biomedical Engineering. The BME courses span a range of subspecialties, including biomechanics, biomaterials, biosignals, biomeasurements, and biotransport. Within these courses, topics may address problems in areas like cardiology, orthopedics, neurobiology, biology, or psychology. Students develop research and design skills in courses and laboratories throughout the curriculum, but the senior project provides a culminating experience by focusing on a specific yearlong problem that may be done individually or in teams.

The undergraduate degree program offers considerable flexibility, allowing time for electives within and outside the Department. The curriculum is designed for students whose post-baccalaureate career plans are graduate school, industry, or professional schools. The courses and laboratory experiences provide a broad fundamental preparation for any of the three career paths. At the same time, students can choose advanced courses, senior project, and lab experience to define their specific areas of interest. For students seeking an even broader engineering experience, the Department offers an Interdisciplinary Engineering degree that combines the fundamentals of engineering with a variety of enrichment areas selected by the student in consultation with the faculty mentor.

Program Mission
The mission of the Department of Biomedical Engineering is to prepare students for careers in health care delivery, ranging from fundamental research to the direct application of knowledge, to problem solving and improving the quality of life for humanity.

Program Educational Objectives
The undergraduate program is designed to meet the following specific objectives in order to fulfill the Departmental and Institutional missions.

1. Prepare graduates for wide ranging careers in biomedical engineering and health related positions in industry, government, or academia.
2. Prepare graduates to pursue advanced degrees in biomedical engineering or other fields related to their long-term career goals.
3. Produce graduates that will achieve a major milestone in their career development within the first three to five years.

Biomedical Engineering (B.S.)

The Biomedical Engineering curriculum satisfies the SLU and Parks College requirements, and includes the flexibility, through electives, to tailor the curriculum for each individual student.

All BME courses with the exception of BME 100 have prerequisites that require a ―C‖ or better. The prerequisites for BME courses are available in the Department office. Any waiver of a specified prerequisite for a course must be approved by the BME Faculty member offering that course.

The minimum curriculum includes:

Basic Science & Math
CHEM 163 General Chemistry I 3
CHEM 165 General Chemistry I Lab 1
CHEM 164 General Chemistry II 3
CHEM 166 General Chemistry II Lab 1
BIOL 104 Biology I & Lab 4
BIOL 106 Biology II & Lab 4
BIOL 260 Human Physiology 3
PHYS 161 Engineering Physics I 3
PHYS 162 Engineering Physics I Lab 1
PHYS 163 Engineering Physics II 3
PHYS 164 Engineering Physics II Lab 1
PHYS 341 Thermodynamics 3
MATH 142 Calculus I 4
MATH 143 Calculus II 4
MATH 244 Calculus III 4
MATH 355 Differential Equations 3
MATH 403 Probability & Statistics 3

Basic Engineering
BME 320 Mechanics 3
ECE 200 Electrical & Computer Eng 3
ECE 201 Electrical & Computer Eng Lab 1
MENG 201 Engineering Shop 1
Communications
ENGL 190 Adv Strategies of Rhet & Research 3

One credit hour of the four credit hour Parks College Core requirement for written and oral communication will be satisfied by BME 100 Orientation, BME 101 Intro, or CMM293 Small Group Presentations. 1

Liberal Arts
THEO 100 Theological Foundations 3
PHIL 205 Ethics 3
Humanities 3
Cultural Diversity 3
Social & Behavioral Sciences 3
Non-Technical Elective 3

Cultural Diversity, Humanities, and Social/Behavioral Science elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.

Biomedical Engineering Core
BME 100 BME Orientation 1
BME 101 BME Introduction 1
BME 200 BME Computing 3
BME 305 Measurements 3
BME 310 Signals 3
BME 330 Transport Fundamentals 3
BME 340 Materials Science 3
BME 495/496 Senior Project I & II 6

Required Related Courses:
Students must take 18 credit hours from the Advanced Biomedical Engineering area and an additional 9 credit hours among BME-Related General Electives.

A. Advanced Biomedical Engineering
BME 405 Biomedical Instrumentation 3
BME 410 Biomedical Signals 3
BME 415 Sensory Systems 3
BME 420 Biomechanics 3
BME 430 Biotransport 3
BME 431 Advanced Topics in Biotransport 3
BME 440 Biomaterials 3
BME 450 Numerical Methods in BME 3
BME 460 Quantitative Physiology 3
BME 441 Tissue Engineering 3
BME 442 Tissue/Material Interfaces 3
BME 498 Independent Research 3

B. BME-Related General Electives
BME-Related general electives should be selected in accordance with the student’s long-term educational and career goals. Often, students use these credits for advanced work in math, science, and engineering. However, students may also select courses designed to broaden their education in areas such as liberal arts or business. In all cases the permission of the academic advisor and Department Chairperson is required. Under no circumstances can prerequisite courses be used as general electives, e.g., Pre-Calculus (MATH141) or The Process of Composition (ENGA150).

Minimum BS Credits (BME) 127

Minor in Biomedical Engineering

The Minor in Biomedical Engineering requires 18 credits of coursework including a course in physiology (e.g., BIOL 260 or PPY254 Human Physiology) and at least five BME courses. At least three of the BME courses must be selected at the 400-level, i.e., from the Advanced BME courses. The grades in all BME courses must be C or better.

To initiate a Minor in BME, a student should file a "Minor in BME" plan with the BME Department after meeting with a BME Faculty member to discuss the minor courses and their prerequisites. The "Minor in BME" form serves as a planning tool and that will be on file in the BME Department and with the student's academic advisor in the major area. The completion of a Minor in BME must be certified by the Chair of the BME Department as part of the graduation check.

Interdisciplinary Engineering (B.S.)

The Interdisciplinary Engineering (IDE) curriculum offers a new option and a new approach to the study of engineering. The IDE program is based in science, engineering, and liberal arts, and is tailored to the individual student’s interests. Students define their own Study Plan, in preparation for careers that build on a broad foundation.

A student’s Study Plan need not focus on an academic department. Instead, each student will identify a career goal, build a career plan, and define a unique Study Plan. While the program offers great flexibility, it does set some boundaries and constraints. Primarily in the first two years, all IDE students take a set of common courses in science, engineering, and liberal arts. The common courses provide a common foundation and knowledge base for all IDE students.

After the common courses, each individual student will define a Focus Area that will be the topic of the Senior thesis, and will include courses that provide the necessary depth of knowledge in the general area of the Senior thesis. The Focus Area may reflect the interest of an individual faculty member, but more likely will
require the expertise of several faculty members. A Focus Area may be unique to a single student, or it may involve multiple students. The IDE program has mentors who will assist students in exploring options for Focus Areas and with finding other faculty members with the appropriate expertise.

The minimum IDE curriculum includes:

### Basic Science & Math
- **CHEM 163 General Chemistry I** 3
- **CHEM 165 General Chemistry I Lab** 1
- **CHEM 164 General Chemistry II** 3
- **CHEM 166 General Chemistry II Lab** 1
- **BIOL 104 Biology I & Lab** 4
- **BIOL 106 Biology II & Lab** 4
- **BIOL 260 Human Physiology** 3
- **PHYS 161 Engineering Physics I** 3
- **PHYS 162 Engineering Physics I Lab** 1
- **PHYS 163 Engineering Physics II** 3
- **PHYS 164 Engineering Physics II Lab** 1
- **PHYS 341 Thermodynamics** 3
- **MATH 142 Calculus I** 4
- **MATH 143 Calculus II** 4
- **MATH 244 Calculus III** 4
- **MATH 355 Differential Equations** 3
- **MATH 403 Probability & Statistics** 3

### Communications & Liberal Arts
- **ENGL 190 Adv Strategies of Rhet & Research** 3
- **THEO 100 Theological Foundations** 3
- **PHIL 205 Ethics** 3
- Humanities 3
- Cultural Diversity 3
- Social & Behavioral Sciences 3
- Non-Technical Elective 3

Cultural Diversity, Humanities, and Social/Behavioral Science elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.

### Engineering Core
- **BME 100 BME Orientation** 1
- **BME 101 BME Introduction** 1
- **BME 200 BME Computing** 3
- **ECE 200 Electrical & Computer Eng** 3
- **ECE 201 Electrical & Computer Eng Lab** 1
- **ESCI 220 Thermodynamics** 3
- **BME 310 Signals** 3
- **BME 320 Mechanics** 3
- **BME 330 Transport Fundamentals** 3
- **BME 340 Materials Science** 3

Substitution of other core engineering courses may be approved by the faculty mentor.

### Enrichment
Elective courses 15
Courses selected for breadth and career building.

### Focus Area
Focus courses 12
IDE 495/496 Senior Thesis I & II 6
Courses directly related to preparation and completion of the senior thesis.

### Minimum BS Credits (IDE) 120
Civil Engineering

John Woolschlager, Ph.D., Chair (jwoolsch@slu.edu)

Faculty:
Megan Hart, Ph.D.
Riyadh Hindi, Ph.D.

Civil Engineering (B.S.)
The Civil Engineering program has been developed with the following objectives:
1. To prepare students for employment as an entry-level engineer and/or to pursue graduate studies.
2. To prepare students with current knowledge and the skills necessary to become practicing civil engineers and to pursue further professional development.
3. To provide an education that will allow students to understand his or her career within a broader societal and ethical context.

The Civil Engineering program provides a solid foundation of course work in the engineering sciences, including graphics, mechanics of solids, fluid sciences, vibrations and electronics. The curriculum is designed so that the theoretical studies are complemented with laboratory “hands-on” approaches. Computer-Aided Design using state-of-the-art computer software is introduced during the freshman year. As students advance, they will use other computer software for structural and fluid flow analysis.

Modern and well-equipped laboratories emphasize experimental methods and measurement techniques. The Civil Engineering laboratory facilities include a variety of equipment. In addition to the existing laboratory facilities in Oliver Hall, such as universal testing machines, vibration apparatus, and a fluid dynamics laboratory, a state-of-the-art soil mechanics laboratory and a concrete laboratory are currently under development. Students in the Civil Engineering program may specialize in areas such as infrastructure evaluation and design, transportation analysis and planning, and green engineering and sustainable design.

Degree Requirements

Basic Science & Math
CHEM 151 Engineering Chemistry I Lecture 3
CHEM 165 General Chemistry I Lab 1
PHYS 161 Engineering Physics I Lecture 3
PHYS 162 Engineering Physics I Lab 1
PHYS 163 Engineering Physics II Lecture 3
PHYS 164 Engineering Physics II Lab 1
MATH 142 Calculus I 4
MATH 143 Calculus II 4
MATH 244 Calculus III 4
MATH 355 Diff. Equations 3
MATH 403 Probability and Statistics 3
Math/Science and Computer Science Electives 6
Choose one 3 credit hour Math/Science and one 3 credit hour Computer Science discipline course. The Math and Science elective cannot be a prerequisite course for required courses in the curriculum. Contact the Faculty Mentor for approval of the Math/Science and Computer Science Electives choices.

Communications
ENGL 192 Advanced Writing for Professionals 3

CVNG 401 Senior Engineering 1
CVNG 403 Engineering Project Management 3
CVNG 450 Senior Design I 3
CVNG 451 Senior Design II 3

**Professional Development Electives** 15
Professional Development Electives are not required to be engineering courses, but must support professional development goals. Courses can be selected from pre-approved elective tracks or students can develop individualized plans with departmental approval. A minimum of 9 hours must be upper division courses.

Minimum 125
Electrical and Computer Engineering

Huliyar S. Mallikarjuna, Ph.D., Chair
(mallikhs@slu.edu)

Faculty:
Will Ebel, Ph.D. (ebelwj@slu.edu)
Roobik Gharabagi, Ph.D. (gharabr@slu.edu)
Armineh Khalili, M.S.E.E. (khalilxa@slu.edu)
Kyle Mitchell, Ph.D. (mitchekk@slu.edu)
Habib Rahman, Ph.D. (rahmanmh@slu.edu)

The Department of Electrical and Computer Engineering offers two undergraduate programs leading to the degree of Bachelor of Science in Electrical Engineering or Computer Engineering. The department provides programs that incorporate analysis, design and development of electrical, electronic, and computer systems, and prepares graduates for entry into the profession as productive and effective engineers.

Electrical Engineering (B.S.)

The program is directed toward sequential development of course work to provide breadth and depth in engineering. It provides instructions to cover broad areas that include electronics, communication systems, computer systems, control systems, power systems, electromagnetics and signal processing. The program is intended to develop the ability of graduates to apply knowledge of mathematics, sciences and engineering. It ensures that graduates have an opportunity to work on multi-disciplinary teams, and also develop effective communication skills. In addition to a strong focus on computer skills and computer software, the program provides a design experience, which is developed and integrated throughout the program by introducing fundamental elements of design process in course work. The program includes a two-semester design sequence to provide a meaningful, major engineering design experience that also focuses on professional practice.

Several modern laboratories in the program provide “hands-on” experience. There is a strong emphasis on the studies of humanities and social sciences that serve not only to fulfill an objective appropriate to the engineering profession but also to meet Saint Louis University’s educational objectives. The overall program provides an integrated educational experience and training to maintain professional competency through life-long learning.

Students also have the option to receive B.S. in Electrical Engineering with concentration in Bioelectronics. (Emphasis in Engineering or Pre-Med)

Students are highly encouraged and assisted to seek internship and co-op opportunities with local and national companies. Qualified students are also invited to join department faculty to carry out cutting edge research.

Student professional organizations such as the Institute of Electrical and Electronics Engineers (IEEE), Society of Women Engineer (SWE) and others are active and very successful in local and national competitions such as “Black Box”, Hardware Design, Robotics, and Ethics.

Program Mission
Within the context of Saint Louis University and Parks College of Engineering and Aviation, the mission of the Electrical Engineering Program is to adequately prepare graduate to enter into the engineering professions, especially in the areas of analysis, design, and development of electrical and/or computer systems and components.

Program Educational Objectives
- To pursue scientific and technical careers beginning with entry-level electrical engineering positions in industry or government.
- To pursue continuing education through graduate studies in related engineering fields, as well as law, business, or management.
- To fulfill the needs of society in solving technical problems using electrical engineering principles, tools, and practices.

The Electrical Engineering Program at Parks is accredited by the Accrediting Board of Engineering and Technology (ABET).

ECE Electives taken from the following:
Students are required to take at least six (6) credit hours from the following list. Please check with ECE Dept. for a complete list of approved electives.

- Radar Systems
- Cellular Communications
- Digital Signal Processing
- Space craft Communications
- Analog Filter Design
- Image Processing
- Computer System Design
- Advanced Digital Design
- Power Systems Analysis I
- Power Systems Analysis II
- Special Topics

Two Technical Electives
2 approved course (3 hours) selected from courses in science, mathematics, or engineering, at the 300-level or higher, or computer science at any level. This course must not be used to satisfy other curriculum requirements.

Internship and Co-op
Although not required, students are encouraged to participate in an internship or cooperative experience before graduation.
ECE 275 Co-op 0-3
ECE 375 Co-op 0-3
ECE 475 Co-op 0-3
ECE 276 Internship 0-3
ECE 376 Internship 0-3
ECE 476 Internship 0-3

Minimum BS Credits 125

Computer Engineering (B.S.)

The Computer Engineering degree program is directed toward sequential development of course work to provide breadth and depth in electrical engineering and computer science. It provides instructions to cover broad areas that include analog and digital electronics, signal processing, computer systems, Computer Architecture, Operating Systems, Advanced Digital Design, Computer Networks and others. The program is intended to develop the ability of graduates to apply knowledge of mathematics, sciences, engineering and computer science. It ensures that graduates have an opportunity to work on multi-disciplinary teams, and also develop effective communication skills. In addition to a strong focus on computer skills and computer software, the program provides a design experience which is developed and integrated throughout the program by introducing fundamental elements of design process in course work. The program also includes a two-semester design sequence to provide a meaningful, major engineering design experience that also focuses on professional practice.

Several modern laboratories in the program provide “hands-on” experience. There is also a strong emphasis on the studies of humanities and social sciences that serve not only to fulfill an objective appropriate to the engineering profession but also to meet Saint Louis University’s educational objectives. The overall program provides an integrated educational experience and training to maintain professional competency through life-long learning.

Students are highly encouraged and assisted to seek internship and co-op opportunities with local and national companies. Qualified students are also invited to join department faculty to carry out cutting edge research.
Student professional organizations such as the Institute of Electrical and Electronics Engineers (IEEE), Society of Women Engineers (SWE), and others are active and very successful in local and national competitions such as “Black Box”, Hardware Design, Robotics, and others.

Program Mission
Within the context of Saint Louis University and Parks College of Engineering and Aviation, the mission of the Electrical Engineering Program is to adequately prepare graduates to enter into the engineering professions, especially in the areas of analysis, design, and development of electrical and/or computer systems and components.

Electrical & Computer Engineering Electives
Students are required to take at least six (6) credit hours from the following list. Please check with ECE Dept. for a complete list of approved electives.
- Digital IC Design
- Robotics
- Hardware Software Co-design
- Digital Signal Processing
- Controls Systems
- Electromagnetic
- Analog Filter Design
- Programmable Logic Controller
- Analog IC Design
- Space Craft Communication
- Special Topics

One Technical Elective
1 approved course (3 hours) selected from courses in science, mathematics, or engineering, at the 300-level or higher, or computer science at any level. This course must not be used to satisfy other curriculum requirements.

Internship and Co-op
Although not required, students are encouraged to participate in an internship or cooperative experience before graduation.
ECE 275 Co-op 0-3
ECE 375 Co-op 0-3
ECE 475 Co-op 0-3
ECE 276 Internship 0-3
ECE 376 Internship 0-3
ECE 476 Internship 0-3

Minimum BS Credits 127
Bioelectronics Concentration (B.S. in Electrical Engineering)

The newly established Bioelectronics concentration is a joint effort by the Electrical and Computer Engineering Department and the Biomedical Engineering Department of Parks College. The course of study combines science and engineering, incorporating courses in biology, chemistry, math, biomedical engineering, electrical and electronic engineering, and others. Students in the Bioelectronics track will pursue either of two emphases, engineering or pre-med, and will graduate with a B.S. in Electrical Engineering and a minor in Biomedical Engineering.

While pursuing the degree, the students can expect to spend a good deal of their time in our well-equipped laboratories, complementing classroom instruction with hands-on experience. Design experience is well integrated throughout the four-year curriculum; student begins to conduct laboratory experiments immediately, starting from the freshman year. The program culminates with a full-year senior design experience in which students work in interdisciplinary teams to carry out major projects. Students are also welcome to work with faculty to carry out research and further enhance their educational experience. Faculty members strongly encourage students to bolster their learning experience by seeking internship and co-op opportunities locally and nationally within the bioengineering industry.

When students graduate from the program with the Electrical Engineering Degree with Bioelectronics concentration in hand, they will find a wealth of career opportunities open to them as effective engineers in bioengineering industries. Graduates can find employment with hospitals’ Clinical Engineering Divisions, medical equipment and medical device manufacturers, healthcare R&D centers, healthcare services companies, medical laboratories, university laboratories, and equipment vendors. Degree-holders could also choose to work in the electrical engineering and biomedical engineering industries. Graduates will be able to provide much needed training and support in the use of highly sophisticated medical equipment to researchers, clinicians, medical doctors, and other healthcare professionals.

Students pursuing pre-med emphasis are well prepared to enter a highly challenging and rewarding field of medicine. Bioelectronics with pre-med emphasis provides an excellent opportunity for future medical doctors to be well versed in technological advances. It allows for much greater integration and innovation of technology in medicine. Technological advances such as MRI, CAT scan, and many others are clear examples of such innovative integration.

Degree Requirements

Basic Science & Math
- BIOL 104 Biology I & Lab 4
- BIOL 106 Biology II & Lab 4
- BIOL 260 Human Physiology 3
- CHEM 163 General Chemistry I 3
- CHEM 165 General Chemistry I Lab 1
- CHEM 164 General Chemistry II 3
- CHEM 166 General Chemistry II Lab 1
- PHYS 161 Engineering Physics I 3
- PHYS 162 Engineering Physics I Lab 1
- PHYS 163 Engineering Physics II 3
- PHYS 164 Engineering Physics II Lab 1

Faculty:
Leslie P. Benofy, Ph.D.
Gregory L. Comer, Ph.D.
Vijai V. Dixit, Ph.D.
John C. James, Ph. D.
Martin Nikolo, Ph. D.
Jean Potvin, Ph.D.
Ian H. Redmount, Ph.D.
Thalanayar S. Santhanam, Ph.D.
Larry M. Stacey, Ph. D.
William D. Thacker, Ph.D.

The Department of Physics offers two undergraduate degrees in Physics: the Bachelor of Science (B. S.) degree for students enrolled in Parks College and the Bachelor of Arts (B. A.) degree for students in the College of Arts and Sciences. The department also offers a Bachelor of Science (B. S.) degree in Engineering Physics for students enrolled in Parks College. (See College of Arts and Sciences Section for the B. A. degree program.) In addition, the department offers Minors in Physics, useful primarily to students majoring in mathematics, computer science, engineering fields, and other sciences. Major-minor links between physics and other disciplines provide opportunities for students to acquire valuable analytical and problem-solving skills and to distinguish themselves from others pursuing similar career paths.

Physics (B. S.)

The Bachelor of Science degree stresses undergraduate research and applications of computers in physics, taking advantage of the unique facilities of Parks College within the University. A focused set of electives, the Allied Electives, allows a student to adapt the program to his or her own post-baccalaureate plans. For example, a student may use these electives to earn a minor in some other field, a double major in physics and mathematics or, in nine or ten semesters, to earn a double major in physics and engineering, or computer science. A student might use these electives to prepare for graduate school in physics or a related field, or for medical school.

The required courses listed below are accompanied by the Parks College core. This degree is conferred by Parks College. This curriculum also satisfies all requirements for a Minor in Engineering Mathematics.

Prerequisites (28 cr):
PHYS 111 Intro to Physics (as a Career) 1
CHEM 163/165 General Chemistry I/Lab 4
PHYS 161/162 Engineering Physics I/Lab 4
PHYS 163/164 Engineering Physics II/Lab 4
MATH 142 Calculus I 4
MATH 143 Calculus II 4
MATH 244 Calculus III 4
CSCI 145 Scientific Programming 3

Required Physics & Mathematics Courses (36 cr)
PHYS 261/262 Modern Physics/Lab 4
PHYS 311 Classical Mechanics 3
PHYS 421 Electricity and Magnetism I 3
PHYS 461 Quantum Mechanics 3
PHYS 331/332 Optics/Lab 4
PHYS 341 Thermo & Statistical Mechanics 3
PHYS 351 Analog and Digital Electronics 4
MATH 355 Differential Equations I 3
MATH 370 Adv Mathematics for Engineers 3
MATH 403 Probability & Stats for Engn 3
MATH 320 Numerical Methods 3

Additional Requirements (6 cr)
Two additional upper division physics courses (minimum 6 hours) selected from the list below.
PHYS 312 Advanced Classical Mechanics 3
PHYS 421 Electricity and Magnetism II 3
PHYS 462 Applied Quantum Mechanics 3

Research Experience (3 cr)
PHYS 386 Physics Research I 0
PHYS 487 Physics Research II 0
PHYS 488 Physics Research III 3

Allied Electives (24 cr)
Eight Courses Selected with Mentor 24

College Core (22 cr)
ENGL 190 or 192 Advanced Writing 3
CMM 293 Small Group Presentation 1
THEO 100 Theological Foundations 3
PHIL 205 Ethics 3
Social/Behavioral Science Elective 3
Humanities Elective 3
General Elect (Soc/Behav or Humanities) 3
Cultural Diversity Elective 3

Cultural Diversity, Humanities, and Social/Behavioral Science elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.

Open Elective (3 cr)
One Course 3

23
# Physics Minor

A Parks College student can earn a minor in physics by completing at least 22 hours of physics consisting of:

- PHYS 161/162 Engineering Physics I/Lab 4
- PHYS 163/164 Engineering Physics II/Lab 4
- PHYS 261/262 Modern Physics/Lab 4

Three physics courses (one with Lab) numbered PHYS 300 – PHYS 470 10

A College of Arts & Sciences student can earn a minor in physics by completing at least 18 hours of physics consisting of:

- PHYS 161/162 Engineering Physics I/Lab 4
- PHYS 163/164 Engineering Physics II/Lab 4
- PHYS 261/262 Modern Physics/Lab 4

Two physics courses numbered PHYS 300–PHYS 470 6

# Engineering Physics (B. S.)

The Department of Physics, in collaboration with the Engineering Departments of Parks College offers a Bachelor of Science Degree in Engineering Physics that prepares students for a broad range of careers requiring scientific and technical knowledge. This program is ideally suited for those students who have an interest in and aptitude for both physics and engineering. The curriculum satisfies the requirements for a minor in Engineering Mathematics and has essentially the same physics content as our traditional B. S. degree. Students may select a concentration in Aerospace, Biomedical, Computer, Electrical, or Mechanical Engineering, or choose the Interdisciplinary Option. Each student completes a senior design project, typically as a member of a multidisciplinary team.

The required courses listed below are accompanied by the Parks College core. This degree is conferred by Parks College. This curriculum also satisfies all requirements for a Minor in Engineering Mathematics.

## Concentration in Aerospace Engineering

### Professional Orientation (1cr required)

Selected from the following:

- PHYS 111 Introduction to Physics (as a Career) 1
- ESCI 101 Freshman Engineering I 1
- BME 100 Biomedical Engineering Orientation 1
- ECE 101 Introduction to ECE 1

(It is recommended that students in this Concentration take PHYS111 and ESC1101)

- Humanities Elective 3
- Cultural Diversity Elective 3

Cultural Diversity, Humanities, and Social/Behavioral Science elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.

### Open Electives (6 cr)
- Two Courses 6

### Concentration in Electrical Engineering

### Professional Orientation (1cr required)
- Selected from the following:
  - PHYS 111 Introduction to Physics (as a Career) 1
  - ESCI 101 Freshman Engineering I 1
  - BME 100 Biomedical Engineering Orientation 1
  - ECE 101 Introduction to ECE 1

### Basic Science and Mathematics (46 cr)
- CHEM163/165 General Chemistry I/Lab 4
- MATH 142 Calculus I 4
- MATH 143 Calculus II 4
- MATH 244 Calculus III 4
- MATH 355 Differential Equations I 3
- MATH 370 Adv Mathematics for Engineers 3
- MATH 403 Probability & Stats for Engn 3
- MATH 320 Numerical Methods 3
- PHYS 161/162 Engineering Physics I/Lab 4
- PHYS 163/164 Engineering Physics II/Lab 4
- PHYS 261/262 Modern Physics/Lab 4
- PHYS 311 Classical Mechanics 3
- PHYS 461 Quantum Mechanics 3

### Engineering Physics & Engineering Topics (50-51 cr)
- CSCI 145 Scientific Programming 3
- ECE 202 Engineering Circuits I 3
- ECE 203 Engineering Circuits II 3
- ECE 204 Electrical Science Lab 1
- ECE 340 Electromagnetic Fields 3
- ECE 330 Semiconductor Devices 3
- PHYS 331/332 Optics/Lab 4
- PHYS 341 Thermo & Statistical Mechanics 3

### Two Engineering Physics Electives Selected From:
- PHYS 312 Advanced Classical Mechanics 3
- PHYS 421 Electricity and Magnetism II 3
- PHYS 462 Appl. of Quantum Mechanics 3
- PHYS 493 Special Topics (Selected w mentor) 3

### One of the Following Three Tracks:

#### Track 1 Electromagnetic Fields and Waves
- ECE 310 Electric Energy Conversion 3
- ECE 460 Communication Systems 3
- ECE 440 Electromagnetic Waves 3
- Two Engineering Electives selected in consultation with advisor 6

#### Track 2 Analog Electronics
- ECE 350 Signals and Systems 3
- ECE 331/332 Electronic Circuit Design/Lab 4
- ECE 420 Automatic Control Systems 3
- Two Engineering Electives selected in consultation with advisor 6

#### Track 3 Communication
- ECE 205/206 Digital Design / Lab 4
- ECE 350 Signals and Systems 3
- ECE 460 Communication Systems 3
- Two Engineering Electives selected in consultation with advisor 6

### Senior Design Project
- ECE 490 Electrical Engineering Design I 3
- ECE 491 Electrical Engineering Design II 3

### College Core (22 cr)
- ENGL 190 or 192 Advanced Writing 3
- CMM 293 Small Group Presentation 1
- THEO 100 Theological Foundations 3
PHIL 205 Ethics 3
PHIL 340 Engineering Ethics 3
Social/Behavioral Science Elective 3
Humanities Elective 3
Cultural Diversity Elective 3

Cultural Diversity, Humanities, and Social/Behavioral Science elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.

Open Electives (6 cr)
Two Courses 6

Concentration in Mechanical Engineering

**Professional Orientation (1cr required)**
Selected from the following:
- PHYS 111 Introduction to Physics 1
- ESCI 101 Freshman Engineering I 1
- BME 100 Biomedical Engineering Orientation 1
- ECENG 101 Introduction to ECE 1
(It is recommended that students in this Concentration take PHYS 111 and ESCI 101)

**Basic Science and Mathematics (43 cr)**
- CHEM 163/165 General Chemistry I/Lab 4
- MATH 142 Calculus I 4
- MATH 143 Calculus II 4
- MATH 244 Calculus III 4
- MATH 355 Differential Equations I 3
- MATH 370 Adv Mathematics for Engineers 3
- MATH 403 Probability & Stats for Engr 3
- MATH 320 Numerical Methods 3
- PHYS 161/162 Engineering Physics I/Lab 4
- PHYS 163/164 Engineering Physics II/Lab 4
- PHYS 261/262 Modern Physics/Lab 4
- PHYS 461 Quantum Mechanics 3

**Engineering Physics & Engineering Topics (59 cr)**
- ESCI 102 Intro to Computer Aided Design 1
- CSCI 145 Scientific Programming 3
- ESCI 210 Statics 3
- ESCI 211 Dynamics 3
- ESCI 220 Thermodynamics 3
- ESCI 310/311 Mechanics of Solids / Lab 4
- ESCI 322/323 Fluid Mechanics/Lab 4
- ESCI 330 Linear Vibrations 3
- MENG 200 Foundations of Engineering Design 3
- MENG 345 Machine Design 3
- MENG 365 Computer Aided Engineering 3
- Upper Division Engineering Course 3
- PHYS 331/332 Optics/Lab 4
- PHYS 351 Analog and Digital Electronics 4
- PHYS 421 Electricity and Magnetism I 3

**Two Engineering Physics Electives Selected From:**
- PHYS 312 Advanced Classical Mechanics 3
- PHYS 421 Electricity and Magnetism II 3
- PHYS 462 Applic. of Quantum Mechanics 3
- PHYS 493 Special Topics (Selected w mentor) 3

**Senior Design Project**
- MENG 450 Engineering Design I 3
- MENG 451 Engineering Design II 3

**College Core (22 cr)**
- ENGL 190 or 192 Advanced Writing 3
- CMM 293 Small Group Presentation 1
- THEO 100 Theological Foundations 3
- PHIL 205 Ethics 3
- PHIL 340 Engineering Ethics 3
- Social/Behavioral Science Elective 3
- Humanities Elective 3
- Cultural Diversity Elective 3

Cultural Diversity, Humanities, and Social/Behavioral Science elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.

Open Elective (3 cr)
One course 3

Interdisciplinary Option

**Professional Orientation (1cr required)**
Selected from the following:
- PHYS 111 Introduction to Physics (as a Career) 1
- ESCI 101 Freshman Engineering I 1
- BME 100 Biomedical Engineering Orientation 1
- ECENG 101 Introduction to ECE 1

**Basic Science and Mathematics (55 cr)**
- CHEM 163/165 General Chemistry I/Lab 4
- CHEM 164/166 General Chemistry II/Lab 4
- BIOL 104 Principles of Biology I/Lab 4
- BIOL 106 Principles of Biology II/Lab 4
- MATH 142 Calculus I 4
- MATH 143 Calculus II 4
- MATH 244 Calculus III 4
- MATH 355 Differential Equations I 3
- MATH 370 Adv Mathematics for Engineers 3
- MATH 403 Probability & Stats for Engr 3
- MATH 320 Numerical Methods 3
- PHYS 161/162 Engineering Physics I/Lab 4
- PHYS 163/164 Engineering Physics II/Lab 4
- PHYS 261/262 Modern Physics/Lab 4
- PHYS 461 Quantum Mechanics 3
Engineering Physics & Engineering Topics (50 cr)

**Engineering Breadth**

**Engineering Mechanics** – One of the following options
- BME 320, BME 420 Mechanics and Biomech 6
- ESCI 210, 211 Statics and Dynamics 6

**Computation** – One of the following options
- BME 200 Biomedical Computing 3
- CSCI 145 Scientific Programming 3

**Thermodynamics** – One of the following options
- PHYS 341 Thermo and Statistical Mechanics 3
- ESCI 220 Thermodynamics 3

**Electricity and Magnetism**
- PHYS 421 Electricity and Magnetism 3
- And one of the following options: 3
- ECE 202 Electrical Eng Circuits I / Lab 4
- PHYS 351 Analog and Digital Electronics 4

**Optics**
- PHYS 331/332 Optics / Lab 4

**And two of the following three Engineering Breadth Areas:**

**Materials Science** – One of the following options
- BME 340 Materials Science 3
- ESCI 310 Mechanics of Solids 3

**Transport/Fluids** – One of the following options
- BME 330 Transport Fundamentals 3
- ESCI 322 Fluid Dynamics 3

**Signals/Systems** – One of the following options
- BME 310 Signals and Systems 3
- ECE 350 Signals and Systems 3

**Engineering Depth**

Focus Area:
- Three Upper Division Engineering courses 9

**Two Engineering Physics Electives Selected From:**
- PHYS 312 Advanced Classical Mechanics 3
- PHYS 421 Electricity and Magnetism II 3
- PHYS 462 Applic. of Quantum Mechanics 3
- PHYS 493 Special Topics (Selected w mentor) 3

**Senior Design Project**
- Two Course Sequence 6

**College Core (22 cr)**
- ENGL 190 or 192 Advanced Writing 3
- CMM 293 Small Group Presentation 1
- THEO 100 Theological Foundations 3
- PHIL 205 Ethics 3
- PHIL 340 Engineering Ethics 3
- Social/Behavioral Science Elective 3
- Humanities Elective 3
- Cultural Diversity Elective 3

Cultural Diversity, Humanities, and Social/Behavioral Science elective courses must be selected from an approved list. See the Parks College introduction in this catalog for more information.
