Make sure that your Mac has all of the current updates before setup.

1. **Turn Wi-Fi off.**

2. **Select Network Preferences** from the Wi-Fi icon on your tool bar at the top right.

3. **Click the Advanced button** at the bottom right of the window.

4. **Click the + symbol** below the **Preferred Networks** box.
   - **Type slunet** for the Network Name.
   - **Select the WEP Enterprise** from the Security drop-down menu.
   - **Type in your SLU Net ID** for the Username.
   - **Type in your SLU Net Password** for the Password.

5. **Click OK** to close the window.

6. **Turn Airport On.**

7. **On the Network Name drop-down menu**, select **slunet**. It will take a few moments to connect. A new window will pop up.

8. **Click Show Certificate** and then **select “Entrust.net Secure Server Certification Authority.”**

9. **Check the Always Trust box** and **click continue**.
