If we could shrink the earth's population to a village of precisely 100 people, with all the existing human ratios remaining the same, it would look something like the following:
57 Asians

21 Europeans

14 from the Western Hemisphere, both north and south
8 Africans

52 would be female

48 would be male
70 would be nonwhite

30 would be white
70 would be non-Christian

30 would be Christian
89 would be heterosexual

11 would be homosexual

6 people would possess 59% of the entire world's wealth, all 6 would be from the United States.
80 would live in substandard housing

70 would be unable to read
50 would suffer from malnutrition

1 would be near death

1 would be near birth

1 would have a college education
1 would own a computer

IF THE WORLD WERE 100 PEOPLE

Geography

Race

Sexuality

Health

Religion

Education

Wealth

Housing

Sex

If we could decide the earth's population to consist of precisely 100 people, with all the differing nations, races, religions, and various levels of wealth, it would look something like this following.
