5. How can TripIt users protect their privacy? .................................................................16
6. What information does TripIt collect from travelers? ..................................................16
7. Do you have more information about data security and privacy for TripIt users? ........17
8. Does the TripIt mobile app have all the same security as the Concur app? ..................17
1. What is TripIt?

TripIt is a comprehensive trip management service that helps travelers organize and share their travel plans – no matter where they book. The best way to think about TripIt is that it gives travelers peace of mind while traveling. TripIt enables travelers to combine all of their travel plans – whether booked in or outside their managed travel program – into master itineraries that can be accessed online at www.tripit.com and on mobile devices, imported to desktop calendars, integrated with networking sites and hundreds of other apps, and easily shared with colleagues, friends, and family.

TripIt Pro is a premium service that includes a suite of features geared to the frequent traveler and is like giving your employees a personal travel assistant.

Learn more at www.tripit.com.

2. How does TripIt work?

Travelers can authorize their corporate travel agent to automatically place business itineraries into their TripIt account and keep them synchronized or simply forward booking confirmation emails to plans@tripit.com to automatically create a master itinerary for a trip. TripIt will then enrich itineraries with maps and directions, airline seating advice, links to online check-in, and more.

With TripIt, a traveler can:

- **Customize** itineraries with additional plans, notes, and even photos.
- **Share** travel plans with family, colleagues, and friends on TripIt and on network sites like LinkedIn, Facebook, and Twitter.
- **Collaborate** on trips with travel planners and other travelers.
- **Connect** with other travelers using "Who's Close" updates and TripIt Groups.
- **Integrate** with helpful third-party apps like Yapta, Cubetree, and Taxi Magic.
- **Go mobile** with the free TripIt app for iPhone, Android, and BlackBerry.

3. What is TripIt Pro?

TripIt Pro is a premium (paid) service that is layered on top of TripIt's core functionality. It proactively monitors travelers' travel plans and reaches out with important travel alerts.

TripIt Pro service includes:

- **Itinerary Monitoring and Mobile Alerts:** Receive SMS and email alerts about flight delays, cancellations, and gate changes on any mobile device, for any airline – regardless of where the flight was booked.
- **Alternate Flight Options:** Get instant re-booking options when flights are delayed or cancelled – including flight status and available seats – on all available airlines.
- CLIENT FAQ -
TripIt and TripIt Pro
May 19 2011
Page 5 of 17

• **Point Tracker**: Keep track of frequent travel and loyalty program accounts, with point balances, expiration dates and account status – all in one place.

• **Inner Circle**: Automatically share every trip with people who need to know your travel details, like an administrative assistant or spouse.

• **Fewer Ads**: Fewer advertisements on the TripIt website – no ads in TripIt's mobile app for iPhone, BlackBerry, and Android.

• **Integration**: Integration to Concur's Expense solution (future functionality)

4. **What's the difference between TripIt and TripIt Pro?**

TripIt’s core functionality is free and offers comprehensive trip management services, enabling a traveler to manage all travel plans in one place and providing tools to leverage that trip information – making the traveler's life on the road easier and more efficient.

TripIt Pro is an upgraded or premium level of service that layers advanced features on top of the free TripIt service.

5. **How can I share trip information on TripIt?**

There are several ways to share trips with TripIt:

• Email trip-share invitations to your contacts

• Generate a public URL that links to an itinerary and send it to people or post it online

• Join a company group and automatically share trips with colleagues

• Use TripIt to post your basic travel plans (destination and dates) on social networking sites like LinkedIn, Facebook, and Twitter

6. **Where do users go for TripIt or TripIt Pro support?**

Travelers in need of TripIt support should always go directly to TripIt. TripIt provides assistance in two ways:

• The TripIt Help Center displays common questions and answers (access www.tripit.com then click **Help Center** at the bottom of the page).

• Contact support at www.tripit.com/uhp/feedback.
Mobile Deployment and Installation

1. How is TripIt's mobile app useful?

TripIt's mobile app enables travelers to access valuable travel information while on the road. All of the travel information is stored locally on the traveler's mobile device so it can be accessed without being connected to the Internet.

2. Does the TripIt mobile app offer the same functionality as TripIt's full-featured, web-based service?

TripIt's mobile app offers travelers the ability to fully manage a trip and obtain useful information while on the road. The mobile app does not include all of the functionality found on the website, specifically much of the setup functionality, like setting up calendar feeds and – for Pro users – setting up point tracking, etc.

3. Why would a traveler need to organize their travel plans using their smartphone?

Using a smartphone gives a traveler instant and easy access to his/her most up-to-date travel plans – eliminating the need to carry around paper confirmations. It can also enable travelers to remain connected with colleagues, friends, and family.

4. Which platforms does TripIt's mobile app support?

TripIt has a mobile app for iPhone/iPod touch, iPad, Android, and BlackBerry platforms. In addition, TripIt offers a mobile website at m.tripit.com, which is device-neutral and can be accessed from any mobile device with Internet access.

5. Why isn't TripIt offered for Windows, Palm, or Symbian mobile applications?

TripIt offers mobile applications for the three most widely utilized mobile platforms today and is constantly evaluating adding additional mobile platforms as demand grows.

6. How does a user install TripIt's mobile app?

**BlackBerry:** Users can access the app in these ways:

- Get it at BlackBerry App World badge on the Mobile Registration (Profile > Mobile Registration) page in Concur Travel or Concur Expense, then search for TripIt.
- Companies using BlackBerry Enterprise Servers can also push it to its users.

**iPhone, iPad, and iPod touch:** On the device, users can go to the App Store and search for TripIt.

**Android:** Users can go to the Android Market and search for TripIt.
7. Can TripIt be deployed via a BlackBerry Enterprise Server (BES)?

Yes. TripIt can provide the installation files directly to the client, who can then provide them to its users. The client can install these files on the BlackBerry Enterprise Server and automatically push the application to all user BlackBerries.

Clients using the push installation method must also manage the upgrade of new releases of the app. These upgrades may occur 2-4 times/year. Clients will download a new set of files from Concur Client Central and push the new files to their users. There is a grace period before users are required to upgrade.

8. How is TripIt's mobile app activated?

TripIt's mobile app is activated by the user once it is installed.

9. Do clients need a project team to deploy the app?

No. TripIt's mobile app is activated by each user and does not require additional resources from the client's side.

10. How does a user sign up for TripIt and log in to the application?

A user can sign up for TripIt in the following places:

- On the TripIt website by simply entering an email address and creating a password.
- On the Purchase confirmation page in Concur Travel.

11. What is the average time to get up and running on the TripIt mobile app?

A user can complete the sign-up process and access the app in about five minutes.

12. As TripIt enhances the app, how will users receive software updates?

The method for receiving software updates depends on the device and how the application was first installed.

**Android, iPhone, iPad, iPod touch**: Users who downloaded the application from the Apple App Store or Android Market will automatically be notified by the store/market when an update is available. Users should download updates promptly.

**BlackBerry**:

- Users who downloaded the application from BlackBerry App World will automatically be notified by App World when an update is available. Users should download updates promptly.
- BlackBerry users who work for companies that deploy applications using the BlackBerry Enterprise Server (BES) will either have the updated application pushed to their BlackBerries or receive other instructions from their administrator.
13. What should a user do in case of a lost smartphone with TripIt's mobile app installed?

The user should immediately change his/her password using the web version of TripIt.

To do so, the user should log in to TripIt and go to the Change Password section of Account Settings at www.tripit.com/account/edit/section/change_password.

14. In which countries is TripIt's mobile app supported?

TripIt's mobile app can be used around the world, though SMS alerts are not available to users with mobile service based in specific countries, such as Canada and Mexico.

If you set up mobile alerts on the TripIt website and if you enter a cell phone number based in a country that is not served, TripIt will immediately advise you and suggest an email alert workaround.

Learn more at help.tripit.com/entries/89095.

15. Must the mobile user have access to the Internet?

A user does not need to have access to the Internet unless the user wants to refresh TripIt itineraries.

16. If a mobile user has a smartphone but not a data plan, can he/she use the mobile app?

Yes. Users can connect over Wi-Fi.

17. Can one person use multiple devices for TripIt's mobile app?

Yes. The same user name and password can be used on multiple devices.

18. Can one mobile device be used for multiple people?

Yes. Each user logs in with his/her unique TripIt user name and password.

19. Is there a fee for the TripIt mobile app?

TripIt offers a free mobile app for iPhone/iPod touch, Android, and BlackBerry devices. There is an additional charge for users who wish to upgrade to TripIt Pro, although they will use the same free TripIt mobile app.

TripIt offers paid TripIt iPhone and iPad apps which are ad-free; however, TripIt Pro users see no ads in mobile so it is unnecessary to pay for the ad-free TripIt app if you are a TripIt Pro member.
Concur's Travel and TripIt Integration

1. What is the integration between TripIt and Concur?

Users of Concur's Travel solution have the capability to authorize Concur to automatically add Travel itinerary information to TripIt and keep the itineraries synchronized with any changes or updates – without having to forward any emails.

2. What is the benefit of itinerary imports from Concur into TripIt?

The benefit of the TripIt and Concur integration is that it enables a traveler to have his/her Concur itineraries automatically delivered to TripIt – eliminating the need for the traveler to manually forward Concur email confirmations to TripIt.

By using TripIt, a traveler can manage all aspects of his/her travel itinerary – from air, car, and hotel booked with Concur to dining reservations, activities, and more booked elsewhere. All of a traveler's reservations may be managed in a single master itinerary, making travel much easier.

3. How do Concur users utilize this integration?

When users log in to Concur's Travel service, they will find a link to TripIt in places like:

- On the purchase confirmation page (the page that says "Finished")
- At the top and bottom of itinerary confirmation emails received from Concur

After clicking the link, the user will be prompted to set up the TripIt connection to grant Concur access to automatically deliver itinerary information to TripIt.

**NOTE:** Users will be prompted to sign-in to TripIt or sign-up for TripIt to complete this step.

After this one-time authorization, their active trips will automatically synch with TripIt – making travel itinerary management seamless.

4. Will the links continue to appear on the itinerary review pages even after a user has accepted and account is established?

The links will still appear but the text will change, to "this trip and updates are available on TripIt" and "View in TripIt".

5. Will links to TripIt appear for all Concur Travel users?

Links to TripIt will appear for users of Concur's Travel service who have noted their primary language as English (US) or English (UK).
6. What about travel arrangers and guest bookings?

The TripIt links do not appear for arranger or guest bookings – the only person who can link a Concur account to a TripIt account is the traveler him/herself.

Bookings made by an arranger will be sent to the user’s TripIt account if the user has signed up for TripIt and connected their Concur Travel account to TripIt.

7. Do users need to provide authorization for each trip they book in Concur?

No. Only a one-time authorization is required. Once a user has completed the steps above, then – moving forward – all trips booked in Concur will automatically feed into TripIt.

8. Do users need to have their company email address listed in their TripIt account?

New TripIt users should sign up for TripIt with the same email address as is in their Concur profile to ensure the TripIt connection works. If a user has an existing TripIt account registered with a different email address, the user simply needs to add the email address that is in the Concur profile to his/her TripIt account settings (in the About You section at www.tripit.com/account/edit/section/about_you).

There is no limit to the number of email addresses a traveler can include in the TripIt account.

9. When TripIt consumes a Concur Travel Itinerary, what personal information is passed to TripIt and stored? (eg. First Name, Last Name, Frequent Flyer, Business Phone Number, Credit Card, etc..)

We only store the relevant travel information contained in the PNR including traveler/passenger name, supplier confirmation number, supplier name, etc. We do not store payment (credit card) information.

10. Can my users sign up for TripIt if they’re based outside of the U.S.?

Yes. Regardless of your geographic location, your users can use TripIt or TripIt Pro.

**NOTE:** The TripIt Web and mobile applications are only available in English (US) today.

11. When is language support planned?

Localization is on the roadmap but no specific languages or timing has been confirmed. We will likely add French and German first followed in no particular order with Spanish, Italian, and French Canadian.
12. Where should we direct our questions or issues?

If administrators encounter questions or issues on the integration, open a support ticket in Concur Client Central. Enhancement ideas for the integration can be submitted as a Solution Suggestion.

Travelers in need of TripIt support should always go directly to TripIt. TripIt provides assistance in two ways:
- The TripIt Help Center displays common questions and answers (access www.tripit.com then click Help Center at the bottom of the page).
- Contact support at www.tripit.com/uhp/feedback.

13. When will the integration be available for Expense?

The integration available in May is only applicable to Concur's Travel solution. In the future, we will develop integration between Concur's Expense solution and TripIt so all TripIt transactions automatically feed into Concur's Expense solution as a part of the TripIt Pro solution.

**NOTE:** Expense integration will be available only to users whose company purchased a bulk TripIt Pro subscription for their entire company. Expense integration will not be available for users who just purchase TripIt Pro on their own via tripit.com.

14. We used TripIt before the acquisition and are thrilled with the new product integration. How can we share our success story?

If you are interested in sharing your company’s success using TripIt and Concur, please reach out to your Account Manager or concurstar@concur.com.

15. Do users have the opportunity via Concur to disable the link that is established between Concur and TripIt, to stop sharing information?

Yes. Users have the ability to remove the connection in the Account Settings of Concur.
TripIt Features

1. How do you create a master itinerary with TripIt?

Travelers have three options to add itinerary information to a master itinerary:

- Forward their booking confirmation emails to plans@tripit.com
- Manually add trip information including notes, documents, or photos via www.tripit.com or the traveler’s mobile device
- Utilize Concur’s integration with TripIt to allow Concur to automatically send trips booked within Concur to TripIt and keep them synchronized with any changes. This requires a one-time authorization by the user.

These three options can be used separately or together. TripIt enriches master itineraries with maps and directions, airline seating advice, and more.

2. How do I sync my TripIt itineraries with my calendar?

You can set up an iCal feed to sync your trip plans with your calendar. iCal feeds are available for Outlook 2007 and 2010, Lotus Notes 8.5, iCal, and Google Apps.

For older email systems such as Outlook 2003 and earlier versions of Lotus Notes, you can download ICS calendar entries and import them to your calendar.

Find the setup steps at www.tripit.com/uhp/calendarInfo.

3. How do TripIt Groups work?

TripIt Groups is a free opt-in service that gives companies a private environment for sharing employee travel information. Groups use the company’s email domain (e.g. @tripit.com) to verify whether a traveler is eligible to join. Groups show basic trip information, including destinations and travel dates, for all members.

4. Which third-party apps are available for integration with TripIt?

TripIt has an open API allowing third-party developers to create apps that integrate with TripIt. This includes helpful third-party apps like Planely, FlightCaster, Tripline, and ArrivedOK. Find a complete list of apps at www.tripit.com/uhp/tools.

5. Which ads will travelers see on TripIt? Can ads be suppressed?

In order for us to provide our service at a low cost, advertising is present on TripIt. We work to ensure ads are relevant and not offensive.

TripIt Pro users receive a reduced ad experience on the TripIt website and see no ads in mobile.
6. (This is from the other one) What types of ads appear on TripIt?

We primarily serve 4 types of ads: travel suppliers, financial institutions, luxury brands, and local deals.

7. What should I do if I can't see trips on my phone?

- **Get the mobile app:** The app can be downloaded on the phone directly from the iTunes Store, Android Market, and BlackBerry App World. Download information and links are also available on the TripIt Apps page (www.tripit.com/uhp/mobile).
- **Authorization:** Prior to trips displaying on the TripIt app, the user must grant access to mobile app.
- **Past trips:** Past trips are deleted from the app 48 hours after the conclusion of the final trip item (flight, hotel, etc.). If they are not automatically removed, manually refresh the app to clear the old trips.

---

**NOTE:** All past travel can be accessed in the user's account on the web version of TripIt (www.tripit.com) at any time.

8. Can I contact TripIt for support on third-party apps?

There are numerous third-party vendors (FlightTrack Pro, TripDeck, Flight Update Pro, and more) with apps that allow access to user TripIt accounts as well. As these are not TripIt products, the user must contact the vendor for support issues.

9. How do I add an email address to my TripIt account?

Simply go to www.tripit.com/account/edit/section/about_you, which is the **About You** page within **Account Settings**.

10. How do I merge two separate TripIt accounts?

Go to www.tripit.com/account/merge to merge an account into another TripIt account.
TripIt Pro Features

1. How does a user turn on TripIt Pro?

There are two ways:

- Users can purchase an individual annual subscription for TripIt Pro on www.tripit.com/pro. Once the user enters payment information, the TripIt Pro service will be active.
- Users for whom their company purchases a corporate license of TripIt Pro are activated after the user matches the Concur account to the TripIt account and authorizes Concur Travel to access their TripIt account.

No matter how a membership is purchased, users can confirm if their account is TripIt Pro by seeing the word "Pro" in a blue box next to the user's name on the TripIt home page or on the TripIt website on the billing page (go to Settings > Billing Info).

2. What happens when a TripIt Pro user is no longer employed by the company that purchased the corporate membership?

The traveler owns their TripIt account so if their employment changes, their TripIt account and all trip information will remain intact. However, be aware that the company's travel department can suspend their integration with the traveler's TripIt account and their company-purchased Pro service.

3. How does airfare monitoring work?

For TripIt Pro users, TripIt monitors the fare paid versus the current economy class, non-refundable fare. If TripIt detects that the airfare has gone down – minus the applicable change fee for the airline – TripIt will alert the traveler that he/she may be eligible for a refund or credit and provide instructions on how to pursue the refund/credit with the ticket issuer or airline.

4. My flight was delayed but I didn't get a flight delay alert. Why not?

TripIt relies on a flight monitoring service that draws upon various sources, including the airlines, for our travel alerts. In general, this means a better experience for our users since we can get the most accurate alerts to them as quickly as possible. However, in rare cases, we may not receive the latest status from our monitoring partner, which prevents us from alerting a user to a delay.
Privacy and Security

1. Who can see my travel plans on TripIt?

By default, all travel information in a TripIt user's account is private. Trip sharing and social features are opt-in only and require explicit permission from the user. Even with sharing and social features activated, a traveler can make any TripIt itinerary private. (Private itineraries are not visible to anyone but the primary traveler on the trip.)

Sharing options on TripIt include:

- Adding other TripIt users to your TripIt Network so they can see when you're close
- Emailing trip share invitations to your contacts
- Generating a public URL that links to an itinerary
- Joining a company group and automatically sharing trips with colleagues
- Using TripIt to post your travel plans on LinkedIn, Facebook, and Twitter

All of these sharing options are user-controlled and can be changed at any time.

2. How safe is it to share travel information via TripIt?

Sharing itineraries on TripIt is safe and secure. Travelers share trip information only with individuals or networks they have specifically authorized.

TripIt also lets travelers designate how others can interact with a shared trip. A designated viewer can view the trip but will not see confirmation numbers and other sensitive data. A designated collaborator can modify the itinerary and see all trip details.

The trip owner can rescind trip access to anyone at any time. The trip owner also has visibility into who has viewed an itinerary and when.

3. Can I limit how my employees share information with TripIt?

The ability to share trip information is up to each individual TripIt user. There is no way to limit sharing across all of your employees.

4. How does the TripIt My Travel app on LinkedIn work?

A traveler can install the TripIt My Travel app on their LinkedIn profile to share trip plans with their professional network. Once the app is set up, only upcoming trip dates and locations will be visible. Sensitive trip details like hotels, confirmation numbers, or flight numbers will never be visible on LinkedIn.

Additionally, a traveler can always make any trip private so that no information about that trip will be shared on LinkedIn or any other social network.
5. How can TripIt users protect their privacy?

Travelers have complete control over the information that they share. Privacy, communications, and profile settings are completely customizable. Even if a traveler chooses to share his/her information with others as a general rule, any trip can be made private. (Private itineraries are not visible to anyone but the primary traveler on the trip.) You can learn more by reading the TripIt Privacy Policy.

TripIt is a licensee of the TRUSTe Privacy Program. TRUSTe is an independent organization whose mission is to build trust and confidence on the Internet by promoting the use of fair information practices. Because of TripIt's commitment to user privacy, our information practices have been disclosed and our privacy practices reviewed for compliance by TRUSTe.

TripIt also complies with the European Union Safe Harbor framework as set forth by the Department of Commerce regarding the collection, use, and retention of data from the European Union.

U.S. Department of Commerce certification for TripIt can be found here: http://www.export.gov/safehrbr/companyinfo.aspx?id=8600

6. What information does TripIt collect from travelers?

To set up a TripIt account, a traveler must provide an email address and choose a password and screen name. A traveler can choose to add detailed information (like home location and a photo) to their profile and can set preferences for building personalized travel itineraries.

If a traveler upgrades to TripIt Pro, TripIt will request certain personally identifiable information on the order form. This includes contact information (such as name, email, billing address, and mobile phone number) and financial information (such as credit card number and expiration date). This information is used for billing purposes and to fill orders. If TripIt has trouble processing an order, TripIt will use this information to contact the traveler.

TripIt will also store account details for each travel rewards points account, including login username and password.

For all site visitors – not just registered users – TripIt collects information such as IP address, browser type, domain name, access times, duration of visit, referring URL, platform, new and repeat information, time stamp, and exit page information.

If a traveler contacts TripIt member support, information about the nature of the question or problem may be collected to enhance the quality of service.
7. **Do you have more information about data security and privacy for TripIt users?**

Yes. There is a formal explanation of how data is managed and privacy is ensured on the TripIt web site.

Travelers can adjust their privacy settings manually to select how they want their information shared. Information such as photos, profile data, travel stats, locations, travel dates, activity feed subscriptions, and connections can all be managed from the Profile setting page.

All sensitive information (like credit card numbers) is encrypted using secure-socket layer technology (SSL).

8. **Does the TripIt mobile app have all the same security as the Concur app?**

Security and data protection is of the utmost concern for TripIt and Concur. TripIt's mobile application employs similar security protocols as Concur. The app has undergone numerous security audits. More information on security of the TripIt solution can be found on Concur Client Central in the TripIt Security Overview.
