Message from the VP of Human Resources

August marks the six month anniversary of the Cura program. Since the program’s launch in February, hundreds of our faculty and staff colleagues have participated in Cura-related events and programs like the Cura in-services. Hundreds more have either sent or received a SLU Spark to recognize their colleagues for the contributions that they make every day. Check out this infographic to learn more about how our faculty and staff colleagues have gotten involved with the Cura program so far.

While these events and programs will continue to be available to the SLU community, each month there are new opportunities to learn about the Cura program, share examples of Cura in action, and grow our knowledge of how we contribute to a culture of collegiality here at SLU. Below are three ways that you and your team can get engaged during the months of August and September:

1. **Nominate a peer for the SLU Stars Award**
   SLU Stars is a peer-to-peer award for SLU faculty and staff that is held once in the fall and once in the spring. It is our opportunity to recognize colleagues whose accomplishments continuously further the mission of the University. Nominations will be open August 17 - September 21. Click here to learn more about the SLU Stars program.

2. **Check out the new Cura Learning Bundle**
   The Cura Learning Bundles include videos, courses and other resources to help us foster healthier relationships at work or in our personal lives. Click here to explore this quarter’s learning bundle, which includes videos and courses on topics like managing for diversity, maintaining a positive workplace culture, and communicating effectively.

3. **Register for the Cura Community Event**
   The Cura program regularly sponsors events for members of our community to come together to learn how we can all contribute to a trusting, respectful and appreciative workplace. In the month of September, we invite you all to attend the Cura Community Lunch & Learn to watch and discuss Gretchen Rubin’s presentation, “Working Better than Before: Understanding Habits to Manage Yourself, and Others, Better”. Click here to register.
