1. INTRODUCTION

This document interprets The Faculty Manual of Saint Louis University and applies its contents to the College of Arts and Sciences. The document discusses criteria for promotion and tenure for tenure-track faculty, types of evidence needed to support a case for promotion and tenure, and the process to be followed in a promotion and tenure case. All faculty members seeking promotion and/or tenure in the College of Arts and Sciences are subject to these procedures. Promotion of non-tenure track faculty is discussed in section 6.

2. CRITERIA

Each department contributes uniquely to the mission of the College, and each faculty member contributes uniquely to the mission of the Department. Each department in the College will develop specific criteria for tenure and promotion. The College's Rank, Tenure, and Sabbatical Committee must approve these criteria.

2.1 Criteria for Tenure and Promotion to Associate Professor

Ordinarily, in the College of Arts and Sciences, six years of service at the rank of assistant professor at the University or at another university of equal standing is required for tenure and promotion from assistant professor to associate professor. Thus, ordinarily, the candidate for promotion applies in the fall of the candidate's sixth year. In the College of Arts and Sciences early promotion is allowed for the exceptionally well-qualified candidate. The final decision to grant tenure must be made by the end of the candidate's sixth year. As noted in The Faculty Manual of Saint Louis University, previous service at institutions comparable to the University may be substituted for not more than three years of service, as negotiated at the time of the initial appointment or not later than the first calendar year of service to the University. A faculty member who enters the tenure track in January will ordinarily apply for promotion and tenure during the fall semester that marks completion of four and a half years of service (promotion and tenure becomes effective after five and one-half years of service).

2.1.1 Teaching

In evaluating the effectiveness of a candidate's teaching the following should be among the considerations: the candidate's command of the appropriate subject and evidence of activities that lead to continuous growth in the candidate's field; the ability to organize material and present it with logic and conviction; the capacity to awaken in students an awareness of the relationship of the subject to other...
fields of knowledge; objectivity; the creativity, spirit, and enthusiasm which vitalize learning and teaching; the candidate's ability to arouse curiosity in beginning students and to stimulate advanced students to creative work; the effectiveness of the candidate in exemplifying the mission of the University. Teaching methods can vary widely from discipline to discipline.

Primary evidence of teaching effectiveness includes the results of periodic and systematic peer evaluation based on class visitations; the review of course materials including syllabi and examinations; the results of the candidate's teaching in courses prerequisite to those of other members of the Department; and the results of periodic and systematic student evaluation, appropriately documented and explained. Supervision of research, theses, and dissertations is an important aspect of teaching.

Secondary evidence of teaching effectiveness includes, but is not restricted to the quality of presentations in public lectures, seminars, colloquia, or lectures before professional societies given by the candidate; evidence of development by the candidate of effective techniques of instruction and instructional materials; and publications by the candidate in respected journals devoted to pedagogy on the teaching of the candidate's discipline.

2.1.2 Advising

As a significant complement to teaching, advising is a major consideration in the evaluation of candidates for tenure and promotion. Evidence of advising effectiveness includes the following examples: participation in academic advising; number of students advised; number of letters of recommendation written; unsolicited letters of gratitude from students; and comments in the formal student letters of recommendation solicited at the time of rank and tenure review.

2.1.3 Scholarship, Research, and Creative Works

Scholarship and knowledge of their field is expected of all candidates. Although scholarship may differ significantly in type and amount among departments, all candidates are expected to be scholars as defined by the departmental criteria for tenure and promotion. Excellence in such endeavors is manifested in the creation, acquisition, and dissemination of new knowledge. There should be evidence that the candidate is effectively and actively engaged in research, scholarship, or creative work of high quality and significance.

Primary evidence of excellence in scholarship and research includes the following examples: publication of books; publication of articles in well-recognized journals and books in the field; funded research grants; and (in certain fields) display of creative works and performance of artistic works. Research publications should be evaluated with respect to content and significance and not just counted. The respectability of the journal or book in which the publication appears should be established. Instructional materials and pedagogical endeavors, normally considered evidence of teaching ability, may be considered only to the degree that they have national or international impact on the field.
Secondary evidence of scholarship and research include presentations at professional meetings, presentations in seminars or colloquia, reviews, and other professional service activities.

2.1.4 Professional Service

Candidates have service responsibilities to their profession, university, college, department, and community. Although there will be differences in expectations among departments, each candidate is expected to provide professional service as defined by the respective departmental criteria. Activities that do not benefit the profession or the University or are not related to a faculty member's professional role and expertise will not be considered as evidence of professional service.

Evidence of service includes but is not limited to the following: participation in the governance of the University at the departmental, college, or university levels; contributing to departmental projects and programs; mentoring student and faculty colleagues; serving in leadership roles in professional organizations; serving as journal editor or referee of scholarly papers or proposals; and applying professional expertise in public service activities.

2.1.5 Skill and Knowledge of the Field

Skill and knowledge of the field is expected of all candidates. This means that there must be recognition by colleagues in the same discipline, both inside and outside the University, that the candidate possesses the appropriate skill and knowledge of the field. Candidates may present evidence of knowledge of the field through such things as the following: external and internal evaluation of research; invitations to present papers at professional meetings; invitations to review or referee professional books or articles; and consulting.

2.1.6 Collegiality

Collegiality is expected of all candidates. That is, the candidate must be able to work constructively and professionally with colleagues in the candidate's department and the College. Evidence of collegiality is provided by the colleague letters which give a colleague's view of whether the teaching, research, and service of the candidate are done in a professional manner and also directly addresses collegiality.

2.2 Criteria for Promotion to Professor

Ordinarily, five years in rank at the University or another university of equal standing is required for promotion from associate professor to professor. A candidate for promotion to professor may apply early for promotion in the fall of the fifth year in rank. In the College of Arts and Sciences, early promotion is allowed for exceptionally well-qualified candidates.
In addition, there must be evidence of such outstanding abilities in teaching, advising of students, service to the University and community, and collegiality as to merit recognition among faculty and students as an effective educator and faculty member. Finally, there must be evidence of such outstanding achievements in scholarship and research, particularly scholarly publication and other academically recognized, creative achievements, as to merit attention among recognized scholars. The opinions of graduates who have achieved notable professional success after leaving the University and the number as well as caliber of students who have been guided in research by the candidate should be considered.

3. CAS Tenure and Promotion Dossier
   CAS Faculty Council Approved Revisions, February 2019
   UCART Review Completed, April 2019

3.1 Candidate's Part of the Dossier

A: Candidate CV
The information in the CV should appear in the following order. Fill in all categories. If an item is not applicable, mark N/A.

1. General Information
   a. Name, present rank, and department affiliation(s).
   b. Degrees earned, including institutions and dates.
   c. Academic experience, including institution(s), rank, and dates.

2. Teaching
   a. List of courses taught at Saint Louis University during the last five years.
   b. List of teaching awards, including a brief narrative description of the criteria and method of selection.
   c. Grants or fellowships for teaching innovations, including a brief narrative description of the criteria and method of selection.
   d. New courses prepared. Candidates should distinguish between courses that are entirely new to the department and courses included in the catalog but reconceived by the candidate.
   e. Involvement in curricular development.
      Sample materials such as syllabi and exams are not a part of the dossier but may be included in the appendices.
   f. Other pedagogical activities.

3. Advising and Mentoring
   a. List of advising and mentoring assignments at SLU.
   b. Evidence of advising effectiveness. This may include information about undergraduate and graduate advising as well as involvement in student professional development, counseling, and extracurricular activities.
   c. Awards for advising and mentoring, including a brief narrative description of the criteria and method of selection.
   d. Grants or fellowships for advising and/or mentoring innovations, including a brief narrative description of the criteria and method of selection.
4. Research, Scholarship, and/or Creative Endeavor
   a. Publications critically evaluated by experts.
      Indicate at each citation the nature of critical evaluation; i.e., is it a refereed journal? Do the editors do the evaluation?
      If a publication is in press, include in the appendices the referees' reports as well as the contract from the press or letter from the editor stating a commitment to publish and expected date of publication.

   b. Other publications.

   c. Production, performance, exhibition of creative works. In an addition to a list of productions, performances and/or exhibitions of creative works, candidates may provide a brief narrative summary (no more than 1/2 page) of reviews of creative works. The full text of reviews should not be included in item 4c but rather placed in the appendices.

   d. Work in progress.

   e. National or international awards for research, including a brief narrative description of the criteria and method of selection.

   f. Grants, scholarships, fellowships for research (external/internal, proposed/funded), including a brief narrative description of the criteria and method of selection.

   g. Lectures, papers, speeches (contributed/invited) presented at professional meetings or educational institutions.

   h. Other.

5. Service
   a. Professional
   b. University
   c. College
   d. Department
   e. Community
   f. Awards for service, including a brief narrative description of the criteria and method of selection.
   g. Grants or fellowships to pursue service, including a brief narrative description of the criteria and method of selection
   h. Other

B. Candidate’s Statement
   This statement gives the candidate's assessment of the candidate's role in the missions of the University, College, and Department. The statement must not exceed two pages.

C. Summary of Candidate’s Teaching Evaluations
   Student evaluations should be periodic and systematic; that is, evaluations should be given for most courses taught. The summary should include at least the course name, the semester taught, the number of students in the section, the number of students responding, the questions being asked, and a report of the student responses.
   A one-paragraph narrative of the candidate’s teaching philosophy and statement on teaching effectiveness can precede the summary of evaluations.
D. Appendices
Include appendices when appropriate (e.g., copies of books, reviews of the candidate’s publications or creative work, referees’ reports on publications in press, letters from editors and/or contracts from presses regarding commitments for future publications, reprints, preprints, student evaluations, etc.).

3.2 Department's Part of the Dossier
The Department Chair is responsible for assembling the departmental dossier. In some departments, a departmental committee is responsible for assembling the departmental dossier. If the Department Chair is the candidate, the Dean will consult with department members to select a faculty member to assemble the dossier and shepherd the evaluation process.

The various committees consider many candidates; therefore, it is important that the dossiers be assembled in a standard order. The following order is from the top down.

1. Front Matter
   a. UCART Cover Sheet
   b. CAS Department Vote Report Form
   c. If applicable, documentation regarding negotiated years of credit toward tenure

2. The candidate's part of the dossier

3. Chairperson's form and recommendation. Forms are available on the Office of Faculty Affairs Website. If the chairperson is the candidate, a colleague appointed by the Dean in consultation with faculty will write the evaluation. To the extent possible, letters from Deans and Chairs should address both positives and negatives in the candidate's dossier. Especially important is to explain the reasons behind any dissenting votes in the committees at the school or department level. Specific votes totals should always be included in the chair’s letter. Avoid “unanimous” as a substitute for vote totals. Provide totals as follows: # in support, # opposing, # of abstentions, # of recusals. Chairs should explain the nature of recusals and, when possible, the motivations for any abstentions.
   If applicable to the candidate, the chair’s letter must include the number of years of credit toward tenure negotiated at time of hire. (See also Sec. 4.3 of the CAS Policy Manual.) The chair must also provide documentation of any negotiated terms of service, to immediately precede the candidate’s part of the dossier.

4. Recommendation of the departmental committee, if this is a part of the departmental process.

5. If requested by the candidate, an evaluation by the affiliated Program Director. Forms are available on the Office of Faculty Affairs Website.
6. Two recommendations from colleagues. The candidate selects one colleague, and the Chair selects one colleague. Forms are available on the Office of Faculty Affairs Website. (See item 10 for selection process.)

7. Departmental criteria for promotion and tenure.

8. Three or more letters from outside evaluators. The candidate should not see these letters. The outside evaluators should be recognized scholars in the candidate's field. The outside evaluators primarily evaluate the candidate's research and professional reputation but may add any relevant information. Outside evaluators must be sent the department criteria for promotion and tenure. Outside evaluators must submit letters on letterhead. As stipulated in the Faculty Manual, “Ordinarily, peer evaluators will hold a higher rank than that of the applicant.” If the chair determines a scholar at or below the rank of the candidate is more appropriate, an explanation must be offered in the Chair’s letter. The Chair should avoid requesting evaluation by scholars with conflict-of-interest affiliations, including the candidate’s mentors and scholars who have been co-authors and/or co-collaborators with the candidate within the past five years. The CAS Rank and Tenure Committee generally disregards letters that evidence close connections or conflicts of interest. Outsider evaluators must be asked to comment in their letters on any connections with the candidate, i.e., mentoring, collaboration, co-authorship. The candidate should provide a list of potential evaluators. The Chair can add names to that list. The Chair chooses the evaluators (see item 10 for selection process).

9. A minimum of two recommendations from students, unless the department requires more. The candidate provides a list of students from which one student is chosen. The Chair chooses a second student.

10. The selection process for choosing peer reviewers and any comments about the selection of additional colleague or student evaluation letters should be explained in the chair’s letter, i.e., which respondents were selected by the candidate, recommended by the candidate but chosen by the chair/committee, or selected independently by the chair/committee. The latter two methods lend credibility to the reference and are viewed as preferable practices.

3.3 College's Part of the Dossier

The Dean adds the following to the dossier:

1. The vote of the College's Rank, Tenure, and Sabbatical Committee. The Dean adds the result of the vote to the cover sheet.
2. Recommendation of the Dean. The Dean places this recommendation before the candidate's part of the dossier.
3. Recommendation of the College's Rank, Tenure, and Sabbatical Committee. The Dean places this recommendation after the Dean's recommendation.
College of Arts and Sciences
Tenure/Promotion Vote Report

Candidate Name:

Department:

Date of Department Vote:

Department Vote: Supporting _____ Opposing _____ Abstentions _____ Recusals ____

Recusals are for departmental colleagues who vote later in the process, such as members of the CAS Rank and Tenure Committee or UCART, or colleagues with a conflict of interest, such as a spouse.

Abstentions are for departmental colleagues eligible to vote who choose not to vote at all.

CAS R/T Committee Vote: Supporting ____ Opposing ____ Abstentions ___ Recusals ___
(To be added by CAS Dean)
*In some departments, a committee will examine the dossier before the departmental deliberations and give their recommendations to the department.

4.3 Role of the Department Chair

Normally the Department Chair is responsible for administering the promotion process at the departmental level (but see section 4.3.1). The Department Chair assembles the Department's part of the dossier (see section 3.2). The Department Chair chairs the meeting of the departmental faculty that evaluates the candidate (see section 4.2). After the departmental faculty votes, the Chair adds this vote to the dossier. The Chair communicates the recommendation of the Department to the candidate. If the application is marginal, the Chair should discuss the application with the candidate and, if the candidate wishes, provide a written summary of the discussion. In such a case it is crucial that the Department Chair make a reasonable effort to ascertain the perceived weaknesses of the candidate's application* and communicate those perceived weaknesses to the candidate in order that the candidate may work to overcome deficiencies. The candidate may withdraw the application at this time. If the dossier is to go forward, the Chair adds the Chair's recommendation. The Chair's recommendation should include detailed reasons for the recommendation. The complete dossier must be submitted to the Office of the Dean by October 1.

For candidates seeking early consideration of their applications, Deans and Chairs should provide documentation to "specifically address and substantiate a request for early recommendation" (Fac. Manual III E. 1) and specify dates of hiring, changes of status, and indicate any special arrangements made with the candidate. Where relevant, the evaluator should inform the committee that a candidate has begun service other than at the usual beginning of the fall semester and explain how candidates have been given to understand these partial calendar year arrangements.

*If these weaknesses did not become clear from the discussion in the departmental meeting, the Chair should either meet with individual faculty members or solicit comments from them. Comments may be submitted anonymously.

4.3.1 Alternate Forms of Administration

Some departments may delegate part of the Department Chair's administrative duties to a committee of senior faculty or to one faculty member with the rank of professor.

4.3.2 When the Chair is the Candidate

When the Department Chair is the candidate, the administration of the process is handled as in section 4.3.1. A senior faculty member is chosen to chair the departmental faculty committee to evaluate the candidate.

4.3.3 Joint Appointments
Since the nature of joint appointments varies, the exact method of evaluation should take into account the nature of the joint appointment. An agreement should be reached between the Provost, the Dean, the Department Chairs, and the candidate concerning the method of evaluation during the candidate's first year.

4.4 Role of the College's Rank, Tenure, and Sabbatical Committee

The role of the College's Rank, Tenure, and Sabbatical Committee is to make sure that the recommendations of the Department Chair and faculty are consistent with the documentation in the dossier. The College's Rank, Tenure, and Sabbatical Committee should meet, discuss, vote, write a recommendation for or against the promotion of the candidate, and submit this recommendation to the Dean. The recommendation should include detailed reasons for the recommendation.

4.5 Role of the Dean

The Dean is responsible for administering the promotion process at the college level. The Dean sees to it that the recommendations of the College's Rank, Tenure, and Sabbatical Committee and the Department are consistent with the documentation. The Dean adds the vote and recommendation of the College's Rank, Tenure, and Sabbatical Committee to the dossier as well as the Dean's own recommendation. The recommendation should include detailed reasons for the recommendation. The Dean communicates the recommendation of the College's Rank, Tenure, and Sabbatical Committee to the candidate. If the application is marginal, the Dean should discuss the application with the candidate and, if the candidate wishes, provide a written summary of the discussion. The candidate may withdraw the application at this time. Otherwise the dossier is submitted to the University Committee on Academic Rank and Tenure.

4.6 Role of the College Representation on the University Committee on Academic Rank and Tenure

The responsibility of the College's representative on the University Committee on Academic Rank and Tenure is to represent the views and interests of the College before the University Committee on Academic Rank and Tenure. The representative should attend the meetings of the College's Rank, Tenure, and Sabbatical Committee to be familiar with the reasons for their recommendations and should consult with the Dean to be familiar with the reasons for the Dean's recommendations.

5. MENTORING AND EVALUATION OF UNTENURED TENURE-TRACK FACULTY

One of the most important duties of a Department Chair is to look after the best interests of the Department's untenured faculty. The Chair should make sure that the untenured faculty member is aware of what is expected of him or her as a member of the profession and as a faculty member at Saint Louis University. The Chair should in particular be sure that the untenured faculty member is familiar with the tenure requirements and process at Saint Louis University. The Chair should assist and encourage an untenured faculty member to overcome deficiencies. In
some departments the Chair may delegate these mentoring duties to a departmental committee of tenured faculty.

5.1 Third-Year Review

A minimum requirement is that during the third year, the Chair and a departmental committee of tenured faculty will evaluate untenured faculty concerning progress towards tenure.* Written copies of this evaluation will be given to the candidate and forwarded to the Dean of the College of Arts and Sciences by February 1. Some departments may choose to evaluate untenured faculty for progress toward tenure on a yearly basis.

*Depending on departmental policy, the committee may consist of all tenured faculty in the Department, be elected, or be appointed by the Chair.

6. PROMOTION OF NON-TENURE-TRACK FACULTY

The process to be followed in the case of promotion of a non-tenure-track faculty member is the same as that for tenure-track faculty except that the criteria should be modified to fit the responsibilities of the candidate. Since the responsibilities can vary greatly within the College, criteria should be established for each case within the first year of service. The Dean and the College's Rank, Tenure, and Sabbatical Committee should approve such criteria.

Updated, 7 May 2015
Promotion Policy for Non-Tenure Track Faculty

A person serving as a permanent non-tenure track faculty member may be eligible for promotion. Departments should establish criteria for promotion of non-tenure track faculty within their first year of service. These criteria should be consistent with the responsibilities assigned to the faculty member, and must be approved by the Dean and the College's Rank, Tenure, and Sabbatical Committee. At least one (1) year prior to making the application for promotion, the faculty member and the Chairperson shall establish procedures to be used for the promotion review, and should be analogous to the procedures for tenure-track faculty of the Department in which the non-tenure track faculty member serves.

August 30, 2011
