Saint Louis University Transgender Health Collaborative: Strategic Map 2020

Promote the Health and Well-being of the Transgender Community

- Advance respectful, inclusive, and patient-centered care for the transgender community
  - Elevate the transparency of clinical practice sites
  - Support new/emerging clinical practice sites
  - Increase access to gender-inclusive healthcare; address known barriers
  - Support continuing education opportunities for healthcare professionals

- Promote research productivity related to transgender health
  - Increase the number of peer-reviewed publications with interdisciplinary authorship
  - Submit and obtain grants that represent interdisciplinary research teams
  - Deliver scholarly presentations at local, regional, and national conferences

- Train future healthcare professionals to be competent in gender-inclusive practices through clinical education
  - Integrate existing education materials into clinical education curricula
  - Develop new clinical education materials for both discipline-specific and interdisciplinary use
  - Support the development of clinical rotations, internships, externships, etc. in gender-inclusive healthcare
  - Foster relationships with relevant community-based organizations

Promote the Health and Well-being of the Transgender Community
