COMPUTER SCIENCE, M.S.

Saint Louis University’s master’s program in computer science is designed to prepare students for rewarding and in-demand careers that leverage the power of computers, algorithms and data analyses to impact the world in a positive manner.

The graduate program in computer science provides students with the depth of knowledge necessary to pursue advanced academic or technological work in a modern, ever-changing world.

Students learn enhanced analytical skills through an in-depth understanding of theoretical and practical concepts, written and oral communication skills and the critical and creative thinking skills required to advance in the field.

Curriculum Overview
SLU’s research-based curriculum and externally funded support foster a strong student-faculty learning environment and extensive research involvement.

Fieldwork and Research Opportunities
The St. Louis region has a strong computer science ecosystem, including technical operations for many Fortune 500 companies, as well as a vibrant start-up community, including incubators such as CORTEX and T-REX, near to SLU’s campus.

Careers
Careers in computer science are regularly found on "best jobs" lists. They can be highly rewarding, and provide great compensation and excellent work environments.

Positions in this field include software developer, computer systems analyst, computer network architect, web developer, database administrator and information security analyst.

Admission Requirements
Application Requirements
• Application completion and fee
• Transcript(s)
• GRE general test scores, recommended
• One recommendation using an online evaluation form; 2 more recommendations are optional
• Résumé
• Statement of professional goals

Admission Requirements
• A bachelor's degree in computer science or closely related field
• Most successful applicants have an undergraduate grade point average of 3.0 or better

Requirements for International Students
All admission policies and requirements for domestic students apply to international students along with the following:
• Demonstrate English language proficiency. Some examples of demonstrated English language proficiency include minimum score requirements for the following standardized tests:
  - Paper-based TOEFL: 550
  - Internet-based TOEFL: 80
  - IELTS: 6.5
  - PTE: 54
• Academic records, in English translation, of students who have undertaken postsecondary studies outside the United States must include the courses taken and/or lectures attended, practical laboratory work, the maximum and minimum grades attainable, the grades earned or the results of all end-of-term examinations, and any honors or degrees received. WES and ECE transcripts are accepted.
• Proof of financial support, which must include:
  - A letter of financial support from the person(s) or sponsoring agency funding the time at Saint Louis University
  - A letter from the sponsor's bank verifying that the funds are available and will be for the duration of study at the University

Application and Assistantship Deadlines
The application deadlines for international students are: May 15 (fall), October 1 (spring) and February 1 (summer).

Students seeking assistantships should apply by Feb. 1.

Review Process
Application decisions are made per guidelines and a review process established by the department, school or college.

Scholarships, Assistantships and Financial Aid
For priority consideration for graduate assistantship, applicants should complete their applications by the program admission deadlines listed.

For more information, visit the Office of Student Financial Services online at http://www.slu.edu/financial-aid.

The Department of Computer Science also provides opportunities for students to receive funding through research grant projects led by the faculty.

Learning Outcomes
1. Graduates will be able to design, implement, evaluate and test a software system that meets a given set of computing requirements.
2. Graduates will be able to apply computer science theory, knowledge of computer systems and software development fundamentals to produce computing-based solutions.
3. Graduates will be able to assess relevant literature and technical documents in the field of computing.
4. Graduates will be able to communicate effectively to both professional and general audiences in both oral and written forms.
5. Graduates will be able to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
6. Graduates will be able to function effectively as a member of a team in developing computing technology and solving technical problems.

**Breadth Elective Requirement**
Select one course from at least two of the following categories: 6
- CSCI 5200-5299 Language/Compilers courses
- CSCI 5600-5699 Large Scale Systems courses
- CSCI 5700-5799 Knowledge Systems
- CSCI 5800-5899 or BCB 5200/5250 Advanced Applications

**General Elective**
Select an additional eleven credits (options listed below) 11
- Breadth Electives: Additional courses from Breadth Electives may be chosen.
- Closely Related Disciplines: With approval, students may include up to 6 credits of elective graduate coursework in closely related disciplines (e.g., Mathematics & Statistics, Bioinformatics & Computational Biology, Electrical & Computer Engineering)
- Colloquium: Students may repeat CSCI 5090 up to 2 additional credits
- Internship with Industry: Students may apply at most 3 credits of Internship with Industry (CSCI 5910) toward the degree requirements.

**Program Notes**

**Breadth Elective Requirement**
The general requirements must include a course from at least two of the following categories:
- CSCI 5200-5299 (Language/Compilers courses)
- CSCI 5600-5699 (Large Scale Systems courses)
- CSCI 5700-5799 (Knowledge Systems)
- CSCI 5800-5899 or BCB 5200/5250 (Advanced Applications)

**Thesis Option**
A Master’s Thesis is optional. Students completing a thesis should take 6 credits of Thesis Research (CSCI 5990) as part of the elective requirements.

**Internship with Industry**
Students may apply at most 3 credits of Internship with Industry (CSCI 5910) toward the degree requirements.

**Closely Related Disciplines**
With approval, students may include up to 6 credits of elective graduate coursework in closely related disciplines (e.g., Mathematics & Statistics, Bioinformatics & Computational Biology, Electrical & Computer Engineering)

### Contact Information
Learn more and apply for admission at [slu.edu/globalgrad](http://slu.edu/globalgrad). Contact us at [globalgrad@slu.edu](mailto:globalgrad@slu.edu) with any questions.

**Continuation Standards**
Students must maintain a cumulative grade point average (GPA) of 3.00 in all graduate/professional courses.
