#### **Profile Tips**

- **How-to:** To begin editing your profile, hover over your photo in the top right corner, select "profile" and then "edit profile"
- **Photo:** We recommend a professional headshot for your profile, it's visible not only to referring physicians but to patients as well, and makes a big difference. You can edit your photo during registration, however, after registration it must be done via desktop.
- **Private Line:** The "private line" field is only visible to another clinician you have acceptedas a "colleague". The Private Line settings button can be found next to edit profile.
- **Update:** Update all of your profile fields so referring physicians have the most accurate information.
