INTRODUCTION

Overview

This handbook has been developed to provide you with information that may be helpful while you are a student in the Accelerated Masters of Science in Nursing Program at Saint Louis University. A copy of this handbook is available at: https://www.slu.edu/nursing/about/current-students/asmn.php

This student handbook includes information specific to the Accelerated Master’s of Science in Nursing Program Information regarding Saint Louis University policies may be found in the Academic Catalog on the Saint Louis University Office of the Registrar Website http://www.slu.edu/registrar General Saint Louis University policies apply to all students attending Saint Louis University unless superseded by policies of the School of Nursing.

Accreditation

Saint Louis University School of Nursing is fully accredited by the Higher Learning Commission (HLC) of the North Central Association of Colleges and Schools. SLU has been continuously accredited since 1916.

The baccalaureate degree in nursing/master's degree in nursing/ and Doctor of Nursing Practice at Saint Louis University is accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation).

The School of Nursing is fully approved by the Missouri State Board of Nursing.

Prior to 2005, Saint Louis University School of Nursing was accredited by the National League for Nursing Accrediting Commission from 1928 through 2006.

Approval Body: Undergraduate and Prelicensure Program Committee

Revised and Accepted: 5/2017
Mission Statement
The mission of the School of Nursing is education of “the whole person”—mind, body, heart and spirit, within a dynamic, diverse and technological society. The School of Nursing, an integral unit of Saint Louis University, seeks to fulfill its mission of education and leadership in the development of nursing as a discipline and profession through teaching, research, practice, and service in ways consistent with the Catholic, Jesuit values of the University. The School of Nursing acts responsibly by setting priorities and exercising stewardship to assure the best use of its resources.

The School, through the teaching component of the mission, prepares students at baccalaureate, master's, post-master's, and doctoral levels for professional nursing practice and interprofessional collaboration to care for the whole person, the “cura personalis”. The School creates a student-centered environment that recognizes and actively addresses the diverse learning needs of students and an academic climate that promotes intellectual inquiry among faculty and students.

The School, through the research component of the mission, advances the active engagement of faculty and the involvement of students in the innovative scholarly process of discovery, dissemination, and translation of knowledge. The School promotes interprofessional collaboration in the conduct of research to maintain or improve health.

The School, through the service/practice component of the mission, promotes quality health care of individuals, families and communities to alleviate ignorance, poverty, injustice and hunger; extend compassionate care to the ill and needy; and to maintain and improve the quality of life for all persons. Saint Louis University School of Nursing faculty, staff, students, and graduates provide this holistic care by working with people in diverse environments to maintain or improve health.

Statement of Philosophy
The School of Nursing, as an integral component of Saint Louis University, upholds the Judaeo-Christian philosophy and mission of the University to pursue truth for the greater Glory of God and for the service of humanity. The faculty of the School of Nursing believes that all persons are created by God and possess intrinsic worth and dignity. We believe the very origin of nursing lies in the fundamental capacity to care for those in need. Recognition of cura personalis requires that acceptance, compassion and respect characterize relationships among faculty, staff, administrators, and students in the School, and relationships with individuals, families, and communities and other health care professionals in nursing practice settings. The School of Nursing provides a collegial environment of academic freedom in which students develop knowledge, insight, values, accountability, and professional competence.

Study of the liberal arts provides an essential foundation for the development of an educated person. Such an education assists students to develop greater knowledge of self, of God, of other people, and of the world in which they live. Attributes, such as intellectual insights, collaboration, communication, logical and analytical skills, and the exercise of independent judgment, are acquired through study of the humanities and the biological, physical, behavioral, and social sciences. This foundation also facilitates the study and practice of professional nursing.

Nursing as a profession and as a discipline is concerned with the promotion and maintenance of health, prevention of illness, care and rehabilitation of sick and disabled persons, and compassionate care of the dying. As a discipline developing its own science, nursing continues to expand its body of knowledge and to identify its articulations with the theories and practices of other relevant disciplines.

Nursing education is a collaborative endeavor of faculty and students in which each contributes and shares talents to enhance learning. Faculty members, having achieved expertise, facilitate each student’s search for knowledge and self-actualization. Given students’ individual abilities, interests, and career goals and changing societal needs, the faculty provides a range of educational programs and uses a variety of teaching methods. All educational experiences are designed to help students develop as critically reflective and socially responsible persons who are capable of making informed, prudent ethical decisions. The faculty encourages student self-assessment and evaluation, thereby preparing graduates for continuing
personal and professional development. The faculty believes that continuing education is an integral component of nursing education and offers continuing education programs as a community service.

Initial preparation for professional nursing practice at Saint Louis University is organized around explicit concepts that structure the nursing content in the curriculum; such structure facilitates learning. Upon completion of the baccalaureate generalist program, the graduate possesses the theoretical base in nursing and related disciplines and the skills – both interpersonal and technological – required for practice. The graduate demonstrates the ability to integrate knowledge with skills and to collaborate with individuals, families, communities and other health care professionals in nursing practice settings. The graduate is prepared to begin a career in the practice of nursing in a variety of health care settings with individuals of diverse cultural backgrounds and ages. Education at the baccalaureate level prepares graduates for advanced study in nursing.

Master’s education provides for the attainment of advanced knowledge and the ability to apply nursing theories in practice and for the development of clinical leadership skills. Upon completion of the AMSN program, the graduate is prepared with the ability to provide leadership for nursing care at the microsystem level. Nurse practitioner education at the master’s level provides for the mastery of a methodology for advanced practice to address patient needs within a population focus. Graduates of the master’s program contribute to the development of nursing through their practice, leadership, scholarly activities, and involvement in professional associations. Education at the master’s level prepares graduates for doctoral-level study in nursing.

Doctoral education provides leadership for the continuing development of nursing as a discipline and a profession. The Doctor of Nursing Practice (DNP) prepares nurses for advanced practice with the specialized knowledge and skills needed to diagnose and manage health and illness and improve the quality of health care in all practice settings using evidence and outcome-based methodologies. DNP graduates demonstrate clinical expertise, and promote high quality patient-centered care with an emphasis on interprofessional collaboration within the health care delivery system.

The Doctor of Philosophy in Nursing (PhD) fosters commitment to knowledge generation and expanding the science of the discipline. As stewards of the profession, graduates apply methods of knowledge discovery to advance nursing scholarship and practice. The study of nursing as a scientific discipline is complemented by advanced study in related disciplines to address complex healthcare issues.

Cura Personalis

Cura Personalis is a Latin phrase that translates as “care for the entire person.” The expression is a hallmark of Ignatian spirituality and describes the Jesuit ideal of encouraging the fullest possible development of all people.

Nurses provide this holistic care by working with people and environments to maintain or improve health.

Person: Recipients of nursing care are integrated bio/psycho/sociocultural/spiritual beings in constant interaction with the environment. This includes individuals, families, groups, and communities. The person is an adaptive system who interacts with the environment to maintain integrity in those physiological, psychological, spiritual and sociocultural dimensions. Adaptation is a positive process which allows the individual to meet basic needs, maximize function, and progress toward self-actualization.

The physiological dimension includes processes involved in nutrition/metabolism, activity/exercise, elimination, sleep/rest, sensory/perception, and sexuality/reproduction. The psychological dimension relates to cognitive, emotional and developmental processes, self-perception and self-concept, coping and stress tolerance, and learning and decision-making. The spiritual dimension involves values and beliefs regarding the meaning and purpose of life as well as the individual’s relationship to a higher being. The sociocultural dimension refers to the broader community, cultural, and other groups, the family, health care and other organizations, and support systems for the person. Learned patterns of behavior, cultural values, norms, customs, roles and relationships with others, and health/illness practices are included in this dimension.

Environment: All external factors that surround or interact with the person. These factors influence development and behavior, and stimulate the person to make adaptive responses. It may include individuals, families, groups, communities, physical surroundings, settings, milieu, and influences from the social, financial, and political arenas.

Health: A dynamic state of being that fluctuates along a continuum from high level wellness to death. These fluctuations occur in response to change in the person and/or in the external environment. The person strives to achieve maximal physiological, psychological, sociocultural, and spiritual integrity.

Nursing: A science and an art concerned with assisting individuals who have actual or potential health-related difficulties in adaptation. The goal of nursing is to assist the person toward maximal physiological, psychological, sociocultural, and spiritual integrity.

Nursing as a discipline includes content and processes related to the role of nurse as designer and provider of care, manager/coordinator of care, educator, politician, consultant, counselor, and researcher. Core concepts for nursing are communication, collaboration, curiosity, competence, care, and cure.

Professional values are the foundation for practice; they guide interactions with patients and families, professional colleagues, and the public. Nurses, guided by their values, demonstrate ethical behaviors in providing safe, compassionate health care. The core professional values are: altruism, autonomy, human dignity, integrity and social justice.

Student Learning Outcomes:
The graduate of Saint Louis University's Accelerated Master's of Science in Nursing Program is an advanced generalist who is able to:

1. Relate to people as unique individuals possessing worth, dignity, and potential for self-actualization.
2. Synthesize theoretical and empirical knowledge from the humanities and natural, social, behavioral, and nursing sciences to provide safe, effective nursing care.
3. Establish relationships based on understanding of self and others and of interpersonal and group dynamics.
4. Use the nursing process to design, coordinate, implement and evaluate the care given to individuals across the lifespan, families, groups, communities and populations with particular emphasis on health promotion and the assessment and reduction of risk.
5. Use knowledge of political and regulatory process, evidenced based practice and sociocultural diversity to advocate for high quality health care for individuals, families and communities.
6. Synthesize systems data, information and evidence based and theoretical knowledge to reduce risk, improve safety, and achieve optimal client adaptation and outcomes.
7. Utilize appropriate information and health care technologies to improve health care outcomes.
8. Serve as a leader and partner in the interprofessional health care team.
9. Manage human and fiscal nursing team resources.
10. Use appropriate teaching/learning principles and strategies as well as current information, materials and technologies to facilitate learning of clients, groups and other health care professionals.
11. Provide leadership in the application of the professional code of ethics and professional standards of practice to nursing clinical practice.

The Health Professions Covenant
As a health care professional dedicated to enhancing the well-being of individuals and communities, I am committed to achieving and sustaining the highest level of professional competence, to fulfilling my responsibilities with compassion for patients’ suffering, and to helping patients make their own informed choices about health care whenever possible. Recognizing that effective health promotion, disease prevention, and curative and long-term care are products of the combined efforts of teams of health professionals, I pledge collaboration with all of my colleagues similarly committed to meeting health care needs of individuals and their communities. Further, I will work within my profession to encourage placement of the patient's and the public's interests above the self-interests of my individual profession.
Saint Louis University Policy on Academic Integrity

Academic integrity is honest, truthful and responsible conduct in all academic endeavors. The mission of Saint Louis University is “the pursuit of truth for the greater glory of God and for the service of humanity.” Accordingly, all acts of falsehood demean and compromise the corporate endeavors of teaching, research, health care, and community service via which SLU embodies its mission. The University strives to prepare students for lives of personal and professional integrity, and therefore regards all breaches of academic integrity as matters of serious concern. The governing University-level Academic Integrity Policy was adopted in the spring of 2015, and can be accessed on the Provost’s Office website at: http://www.slu.edu/the-office-of-the-provost/academic-affairs-policies

The Policy on Academic Integrity is designed to promote ethical conduct within the University community by:
1) Defining the responsibilities of various members of the University community;
2) Defining violations of academic integrity;
3) Setting minimum standards for reporting and adjudicating violations of academic integrity;

1. Responsibilities of Members of the Community
To create a learning environment in which high standards of academic integrity are prized requires the efforts of everyone in the University community. Faculty are responsible for adhering to high standards of academic integrity and following procedures for reporting and adjudicating possible violations both in and out of their academic unit. Students are responsible for adhering to University standards of academic integrity, helping to create an environment in which academic integrity is respected, and reporting violations of the policy to instructors, department chairs, or administrators, as appropriate.

2. Violations of Academic Integrity
Definitions to guide academic units in setting and applying their academic integrity policies are as follows (more than one violation may apply):
Falsification entails misrepresentations of fact for academic gain. Instances include:
1. Lying to or deceiving an instructor about academic work;
2. Fabricating or misrepresenting documentation or the data involved in carrying out assignments;
3. Fabricating, misrepresenting, or altering in unauthorized ways information in academic records belonging to an instructor or to any academic department or administrative unit in the University.

Plagiarism involves the representation of someone else’s thoughts, words, and/or data as if they were one’s own or “self-plagiarism” which is the use of material prepared for one class and submitted to another without proper citation and without the permission of the instructor. Instances include:
1. Quoting directly from someone else’s written, artistic or spoken work without using quotation marks or indented quotations and without giving proper credit to the author or artist; for example, cutting and pasting text from the internet and making it appear to be your own work.
2. Paraphrasing or incorporating someone else’s ideas, concepts, arguments, observations, images, objects, music, or statements without giving proper credit;
3. Submitting as one’s own work a paper or other assignment/project that has been prepared, either wholly or in part, by another person, group, or commercial firm without citation or acknowledgment.

Cheating involves the use of unauthorized assistance to gain an advantage over others. Instances include:
1. Copying from another student’s examination or using unauthorized assistance, aids, technological resources such as cell phones, calculators, translation software or Internet based applications in taking quizzes or examinations;
2. Using resources beyond those authorized by the instructor to complete assignments such as writing papers, preparing reports, giving oral presentations, making models, multi-media projects, sound recordings, creating visual materials such as drawings, videos, or photographs or presenting material on the internet;
3. Acquiring, disseminating, or using tests or any other academic forms of assessment belonging to an instructor or a member of the staff through any means (including social media) without prior approval;
4. Influencing, or attempting to influence, any University employee in order to affect a grade or evaluation;
5. Hiring or otherwise engaging someone to impersonate another person in taking a quiz or examination or in fulfilling other academic requirements.

**Sabotage** entails disrupting or seeking to prevent the academic pursuits of others. It includes:
1. Interfering with work or undermining the academic success of others in the university community in an intentional way for the purpose of negatively impacting that person's academic performance;
2. Modifying, stealing, or destroying intellectual property such as computer files, library materials, artwork, personal books or papers.
3. Performing any action that would impact research outcomes such as lab tampering, falsification of data, or destruction of research resources.

**Collusion** involves unauthorized collaboration with another person or persons for the purpose of giving or gaining an academic advantage in such activities as completion of assignments or examinations without explicit permission of the instructor. Collusion may include any or all of the other violations of academic integrity as defined above. For example, if two students developed a plan that enabled them to improve their performance on an assignment that was supposed to be completed independently, they would be guilty of collusion.

**Concealment** entails failing to call to the attention of a faculty member or administrator violations of academic integrity that an academic unit requires be reported.

3. **Minimal procedures** for infractions of academic integrity include:
   1. Maintenance of confidentiality
   2. Formal charges of violations of academic integrity
   3. Notification of charges
   4. Definition of the roles of faculty, administrators, students, staff and students in the proceedings
   5. Opportunity for response by those charged

**Sanctions** will be imposed according to the policy standards of the School of Nursing. Formal charges of violations of academic integrity do not preclude other disciplinary action that the University may take if circumstances warrant additional sanctions.

Sanctions are to be commensurate with the nature of the offense and with the record of the student regarding any previous infractions. Sanctions may include, but are not limited to,
- A lowered grade;
- Failure on the examination or assignment in question;
- Failure in the course;
- Notice of the infraction in the violator’s permanent record;
- Participation in training sessions;
- Probation;
- Suspension from the School of Nursing
- Suspension from the University;
- Expulsion from the School of Nursing
- Expulsion from the University;
- Revocation of University degree; or
- A combination of the above.

Additionally, each SLU College, School, and Center has adopted its own academic integrity policies. The SLU School of Nursing standards for professional and ethical conduct follow. All SLU students are expected to know and abide by these policies (University and School of Nursing) which detail definitions of violations, processes for reporting violations, sanctions, and appeals. Please direct questions about any facet of academic integrity to your faculty, the option coordinator, the Associate Dean for Undergraduate and Prelicensure Education, or the Dean of the School of Nursing. *Adopted Spring 2015

**The School of Nursing Standards on Professional and Ethical Conduct**

The University is a community of learning whose effectiveness requires an environment of mutual trust and integrity. As members of this community, students share with faculty and administrators the responsibility to maintain this environment of academic integrity. Nursing students are expected to have high standards of integrity in academic and in clinical settings. Integrity is a reflection of the respect that one holds for oneself and others. It is manifested through a student’s behavior in class and in the clinical setting.
Saint Louis University School of Nursing has established standards for determining the professional and ethical conduct of students. All students enrolled in the School of Nursing are expected to adhere to a standard of behavior that is consistent with the high standards of their profession. Compliance with all institutional rules and regulations, city, state, and federal laws is required. For additional information on professional integrity, please refer to the American Nurses Association Code of Ethics.

Not all forms of inappropriate behavior that would raise serious questions concerning a student’s status as a health professional can be listed. However, students are expected to display respect, trust, and integrity in the classroom and clinical area through the following examples:

I. **Professional Demeanor. Students are expected to:**
   - Maintain a neat and clean appearance in attire that is acceptable as professional to the patient population and in keeping with the uniform/dress policy (see The Uniform Policy)
   - Maintain equilibrium under pressure of fatigue, professional stress, or personal problems.
   - Avoid the effects of alcohol, narcotics, intoxicants, hallucinogens, or illegal substances.
   - Demonstrate respect for the expertise and responsibility of faculty both in the classroom and clinical areas.
   - Refrain from damage to, the abuse of, or theft of any person or any property owned by the University, or any hospital/clinic or other affiliated organization.
   - No possession of a firearm, weapon, explosives, or other dangerous objects or substances on university property or at healthcare agencies (see University policy and healthcare agency policies).

II. **Concerns for the welfare of patients. Students are expected to:**
   - Perform all aspects of nursing care with a thoughtful, and professional attitude.
   - Refrain from making inappropriate remarks and remarks with sexual overtones.
   - Treat patients with respect and dignity both in their presence and in discussions with peers.
   - Display concern for the total patient.

III. **Concerns for the rights of others. Students are expected to:**
   - Deal with class peers, professional and staff personnel, faculty, and all other members of the health care team in a considerate, respectful manner and with a spirit of cooperation.
   - Avoid offensive language or gestures, physical and/or verbal violence, threats, or intimidation.
   - Treat all persons encountered in a classroom setting or a professional capacity with respect regardless of race, religion, gender, sexual orientation, or disability.
   - Maintain confidentiality of information regarding patients, classmates, and faculty.

   To understand the limits of appropriate use of social media, it is important to have an understanding of confidentiality and privacy in the health care context. Any patient information learned by the nursing student during the course of treatment must be safeguarded by that nursing student. Such information may only be disclosed to other members of the health care team for health care purposes. Confidential information should be shared only with the patient’s informed consent, when legally required or where failure to disclose the information could result in significant harm" (NCSBN, August, 2011, www.ncsbn.org).

IV. **Responsibility to duty. Students are expected to:**
   - Perform duties to the best of one’s ability and persevering until duties are complete or notifying responsible persons of problems.
   - Be punctual in attendance at class, clinical, conferences, and other clinical duties or offering appropriate explanation when unable to be present.
   - Notify instructor and supervising preceptors prior to absence or inability to carry out duties
   - Assume responsibility for patient care with appropriate supervision.
   - Identify emergencies and respond appropriately.
   - Ensure that he/she can be located by faculty or staff personnel when on duty.

V. **Trustworthiness. Students are expected to:**
   - Maintain honesty in written and verbal documentation on health/patient records, course work and other documents.
   - Complete assignments and tests without solicitation, receipt, or provision of any unauthorized assistance. (see Academic Dishonesty Statement).
   - Accurately and honestly report clinical hours for all nursing courses.
Should a violation of this policy occur, sanctions may include a range of responses depending on the severity of the violation. These could include a written warning, referral to the appropriate Administrator within the School of Nursing (SON) or University to review the alleged violation, or immediate removal from the classroom or clinical site. Significant and/or continued violations may result in administrative withdrawal from the class or the school.

Procedure
Any alleged or suspected violation of academic or professional integrity will be reported by the instructor to the course coordinator/coordinator of the option and the Associate Dean. Steps of procedure are as follows:

Preliminary investigation
1. An investigation (discussion) will occur between student and instructor. If the issue is not resolved, then the following steps will be taken.
2. A complaint of the alleged student violation will be submitted in writing to the option coordinator by the instructor. This should occur as close in time to the incident as reasonably possible.
3. A subsequent investigation (discussion) will occur between student, instructor and coordinator/or another faculty. A copy of the written complaint and of this policy statement will be given to the student. On the basis of the preliminary investigation, the coordinator will decide whether there is reasonable cause to believe that a violation of academic or professional integrity has occurred. If there is reasonable cause to believe a violation has occurred, and a resolution cannot be agreed upon by the instructor, coordinator and student, then a formal hearing shall be scheduled. If there is not reasonable cause to believe a violation has occurred, then the complaint will be dismissed. The Associate Dean will be informed of the outcome of this investigation.

Formal Hearing
1. Notice of the alleged violation and date of the hearing will be given in writing by the coordinator to the student.
2. The Hearing shall be held before the Admissions, Progression and Graduation Committee (APG) of the School of Nursing.
   a. The student, the faculty, and the (APG) Committee have the right to present witnesses and to ask questions of witnesses at the hearing.
   b. Pertinent records, exhibits, and written statements may be accepted as evidence for consideration by the committee at the discretion of the chairperson.
   c. After the hearing, the committee shall determine by majority vote whether it believes the student has violated the policy. The committee’s determination shall be made on the basis of whether it is more likely than not that the accused student committed the violation.
   d. A letter shall be sent by the chairperson of the APG Committee to the student, complainant and the option coordinator of findings of fact and making a recommendation to the director as to whether a violation has been committed and, if so, the appropriate sanction.
   e. The Chairperson of the APG committee’s decision shall be sent in writing to the student and complainant with a copy to the committee.
   f. Sanctions shall include:
      i. Repeating the assignment – which could affect the grade
      ii. Repeating the course
      iii. Probation
      iv. Suspension
      v. Dismissal from the school
   g. In accordance with the University wide statement of Student Rights and Responsibilities, in the Code of Student Conduct, the disciplinary sanction of dismissal is required to be recorded on the student’s permanent academic record.
   h. The student may appeal the decision of the committee to the Dean of the School of Nursing by written letter filed within two weeks after the committee’s decision. The Dean of the School of Nursing’s decision shall be put in writing to the student, faculty, option coordinator and committee within two weeks.

Approval Body: Undergraduate and Prelicensure Program Committee and Master’s Program Committee, Approved: May 5, 2005 Academic Records
**Academic Records**
The student’s official academic record is maintained as the transcript in the University Registrars’ Office. Clinical evaluation documents are housed in the School of Nursing Building.

**Use of Records within the School of Nursing**
1. Within the School of Nursing, faculty members with a legitimate educational interest have access to student records through the Associate Dean, Undergraduate and Prelicensure Education.

2. References directed to the school will be answered by form letter giving only the facts of public knowledge, which are defined as facts of attendance, dates of attendance, and the date of graduation if a degree was conferred or is anticipated to be conferred soon.

3. The students’ names, dates of attendance, degrees and honors conferred, and other information which appeared in public form are considered public information and thus, may be confirmed upon request.

4. If a student wishes any academic or personal information released outside the School of Nursing, he/she must complete the appropriate form, which can be obtained from the Saint Louis University Registrar’s office. If a comprehensive letter of reference regarding the student’s professional abilities is requested, the student should request such from a faculty member with this knowledge. Copies of such reference letters will remain the property of that faculty member and will not be added to the student’s academic record.

5. Records of student course grades are retained by faculty for at least three years; final examination papers and clinical evaluations are retained for at least six months after the end of a course.

**Academic Advising and Mentoring**
You will be assigned a faculty mentor/advisor upon enrollment in the program. The faculty mentor will be an active participant in the students’ professional decision-making process, exploration of career goals, program choices and curriculum planning, and recommend courses of study and experiences that would be advantages for the student post-graduation.

Students are required to have contact with their faculty mentor each semester,

**Class and Clinical Practice Attendance**
Students are expected to attend all classes, laboratory and clinical sessions. Students enrolled in clinical nursing courses are notified by the instructors at the beginning of each course of the procedure to follow in the case of an absence. Unauthorized absence is a serious matter and must be resolved to the satisfaction of the instructor before a final grade will be issued.

Examinations are to be taken and assignments are to be submitted as scheduled. Students are expected to adhere to guidelines.

For instances of excused absence, make up examinations, or late assignments; the responsibility for making special arrangements remains with the student.

Students are responsible for their own transportation to assigned areas for clinical experiences. For some of these experiences, access to an automobile is necessary. Assignment to experiences cannot be made to accommodate transportation requests. Clinical experiences may take place any day of the week, any shift, based on the learning experience, agency and faculty availability.
**Evaluation**

**Course** Students complete a summative evaluation of each nursing course. Teaching methodology and effectiveness are also evaluated. Faculty review results carefully and utilize feedback to make course improvements.

**Faculty** Students evaluate individual faculty performance each semester. These evaluations contribute to the faculty members’ annual performance appraisal. For promotion in rank, students evaluate each instructor, and these evaluations are submitted to the University Committee on Faculty Rank and Tenure.

**Student Performance** Students are evaluated in nursing courses according to the specific behavioral objectives of each course. These are discussed with students at the beginning of the course, and each student is given online access to the objectives. The student must demonstrate attainment of these behaviors in order to successfully complete the course. The clinical instructor discusses the evaluation with the student during and at the end of each nursing course. Students and faculty sign the clinical evaluation after it is discussed.

**Grading Policy**
The following grading scale applies to all courses in the nursing major:

- **A** 93-100  4.0
- **A-** 91-92  3.7
- **B+** 89-90  3.3
- **B** 85-88  3.0
- **B-** 83-84  2.7
- **C+** 80-82  2.3
- **C** 77-79  2.0
- **C-** 75-76  1.7
- **D** 70-74  1.0
- **F** 69 and below 0.0

**Directives for Scientific Writing in the School of Nursing**
The faculty of the School of Nursing believe that as graduates of Saint Louis University, students should be able to write in an organized, coherent and effective manner. Grammar and spelling should be correct. Proper credit should be given to the appropriate sources. Credit should be given not only for direct quotations, but also for paraphrasing the findings of others. The format suggested in the Publication Manual of the American Psychological Association (current edition) has been approved by the faculty and is to be used for assigned papers in all nursing courses.

- The Graduate Writing Center is located in Verhaegen Hall, Room #210, 314-977-3231
- Online Writing Center information can be found at: [http://www.slu.edu/life-at-slu/student-success-center/academic-support](http://www.slu.edu/life-at-slu/student-success-center/academic-support)

**Progression Policies**

**A grade of C- or better is required for all prerequisite, required and Interprofessional Education (IPE) courses and a grade of C or better is required in nursing courses to complete the degree.**

Required courses (including IPE) may be repeated only one time whether repetition is due to withdrawal or academic failure. For courses that have both theory and clinical components, 80% of the grade is earned from testing, 20% of the grade is earned from clinical assignments unless otherwise noted in the syllabus. The percentage of clinical points earned will be added to the student’s grade only if a 77% test average is attained.

In addition students must satisfactorily fulfill clinical objectives and/or laboratory objectives to satisfactorily complete nursing courses with a clinical component.

Progression from one course to another is contingent upon successful completion of each prerequisite course.

</table>
The Clinical Probation Contract can be found on the Saint Louis University Intranet. A student may not progress to NURS 561 Practicum in Clinical Leadership or NURS 560 Clinical Nursing Leadership for Advanced Generalist courses while on clinical probation.

**Clinical Withdrawal**
Students may be advised to withdraw from a clinical course or a course with a clinical component at any time prior to the final examination when it becomes numerically impossible to successfully pass the co-requisite theory course or the theory component of the course with a “C” or better.

**Clinical Failure**
Clinical failure is based on the behavior of the student in the clinical area in relation to the course objectives including professional behavior. Reasons for Clinical Failure include but are not limited to the following:

1. Earning a final rating of unsatisfactory in any clinical course objective.
2. Consistently coming to the clinical setting unprepared.
3. Repeated tardiness or unexcused absence on the clinical day.
5. Providing unsafe care.

**Dismissal**
Students are subject to dismissal from the School of Nursing for academic or professional reasons under the following conditions:

1. Failure to attain a cumulative grade point average of at least 2.50 after two consecutive semesters on academic probation.
2. Being placed either on academic or clinical probation for a second time.
3. Being unsuccessful in two or more required courses during the course of study
   a. “Unsuccessful” is defined as:
      i. A grade of less than C- in any prerequisite course.
      ii. A grade less than C in a nursing course (including elective)
      iii. Withdrawing from a required nursing course for academic reasons (withdrawing for non-academic reasons must be substantiated by appropriate documentation)
   iv. Any combination of the three.
4. Consistently exhibiting behavior considered unacceptable for both study and a career in nursing.
5. Failure to remove clinical probation status.

Students, who are dismissed from the School of Nursing and wish to appeal their dismissal, must submit a letter requesting review by the Admission, Progression and Graduation Committee within 5 business days of the receipt of the dismissal letter (See section on “Appealing a Grade, Probation or Dismissal”). Students will have the opportunity to present their cases to the committee. Decisions of the Admissions, Progression, and Graduation Committee are final and may only be appealed as described in this handbook.

**APPEAL of an Academic Decision:** *E.g. Course grade, clinical probation, etc.*
A grade may be appealed only if there is evidence of capricious or arbitrary grading, abuse of discretion or lack of due process. An appeal gives the student the opportunity to present evidence that the assigned grade was capricious and/or arbitrary; there was abuse of discretion; or there was a lack of due process.

If a student believes the above is true, the student must:

1. Appeal to the faculty member who assigned the grade.
2. Appeal beyond the faculty member is to be made to the course coordinator. The student meets with the course coordinator with supporting evidence.
3. If a resolution is not obtained, the student contacts the option coordinator.
4. If a resolution is not obtained, the student contacts the Associate Dean of Undergraduate and Prelicensure Education;
5. If resolution is not obtained, the student can appeal to the Admissions, Progression and Graduation Committee (APG). *See below for specific procedures.*
It is the responsibility of the APG committee Chair to communicate the Committee’s appeal decision to the student. The option coordinator, faculty mentor/advisor, and the appropriate administrator of the student’s program are also informed of the decision and are responsible for follow up.

**Appeal of a Program Dismissal:**
A student has the right to appeal a program dismissal. The appeal process gives the student the opportunity to explain extenuating circumstances or conditions which adversely affected their behavior or academic performance. The student must present plans for preventing future problems if the requested reinstatement is granted.

The appeal is heard by the School of Nursing APG Committee. The Committee makes the decision to grant or deny the student’s appeal. It is the responsibility of the Chair of the APG Committee to communicate the Committee’s decision to the student. The option Coordinator of the student’s program is also promptly informed of the committee’s decision on the student’s appeal and is responsible for follow-up with the student.

**Admission, Progression, and Graduation Committee Procedures:**
Following posting of course grades, the appropriate SON administrator identifies those students who have not met all curricular and academic requirements as described in the respective program student handbook and/or catalog.

The appropriate SON administrator communicates in writing to the student(s) notifying them concerning their status in the School of Nursing. The letter will explain the specific issue and the appeal process. A copy of the letter is sent to the student’s mentor and/or advisor and the APG chairperson. The student must acknowledge receipt of the notification in writing.

When a student chooses to appeal, a request must be made in writing to the appropriate APG Committee Chairperson. The request must be made within 5 business days following receipt of written notification communicating the academic issue.

The appeal letter should, at a minimum, include the following:
1. A concise statement of the purpose of the appeal;
2. A description of the relevant circumstances that may have influenced the student’s academic performance;
3. The student’s plan for future success.

A hearing is scheduled based on the availability of a majority of the committee members. The administrator of the student’s program will not be a voting member of the hearing committee. If a committee member(s) believes they cannot fairly review the evidence and render a decision, the committee member should recuse themselves from the meeting.

The student is provided with a list of the committee members prior to the scheduled appeal. At the student’s request, the APG Committee Chairperson will make a substitution of one committee member, which may include the APG Committee Chairperson, if the student believes that the committee member may not render an impartial decision.

The student is encouraged to attend the hearing meeting of the APG Committee. If the student is unable to attend the meeting in person, the student may arrange to have a conference phone meeting with the committee. The student is responsible for informing the APG Committee Chairperson whether she/he is attending the meeting in person, meeting via a telephone conference call, or not attending the meeting at all. If the student will be attending the meeting either in person or via a conference call, the Committee Chairperson will discuss the hearing process with the student prior to the hearing.

A student may submit a written request to the APG Committee Chairperson that he/she be accompanied by one person at the hearing. The person may attend the meeting and speak to the petitioner, but is not allowed to address the committee. If the designated person is an attorney, disclosure must be provided. The designated person may not be a student in the same academic program. Recording of the committee hearing is not permitted. Prior to the APG Committee hearing, the Committee Chairperson will contact the student’s faculty mentor and /or advisor and the faculty involved in courses pertinent to the appeal inviting
them to provide germane information regarding the student’s appeal. Information from the mentor and faculty must be submitted to the APG Committee Chairperson in writing prior to the hearing.

No later than the day of the hearing, the Committee members are provided with a copy of the student’s appeal letter and the completed APG Committee Summary form. (Reference Appendix A.) The appropriate SON administrator may provide information related to any previous academic issues.

The hearing will proceed as follows:
1. APG Committee Chairperson describes the academic eligibility issue including a review of the applicable policy and pertinent background information.
2. Faculty member(s) may be invited to provide information to the committee.
3. The student joins the hearing and an introduction is made of all those present.
4. The student will make a statement to the committee.
5. The committee members will ask the student questions germane to the issue.
6. The student will make a final statement to the committee, and then be excused from the meeting room.
7. The committee will discuss the issue in a private session and make a majority decision regarding the appeal. The Committee Chairperson will vote only in case of a split decision.
8. If the appeal is granted, the committee will make recommendation(s) regarding progression.

The mandated conditions listed by the committee will be documented on the confidential Progression Committee Summary Form. This form will be kept in an APG Committee file in the appropriate Associate Dean’s office until the student graduates or three years from the date of appeal. Minutes of each meeting will be maintained.

The decision regarding the student’s appeal will be communicated to the student by the APG Chairperson via the student’s SLU e-mail within 24 hours of the Committee meeting. Within five business days, a letter will be sent to the student using traceable mail. If the appeal is granted, the decision will be stated, as appropriate, in the letter. A copy of the letter will be sent to the appropriate SON administrators and the appropriate University department(s). A copy of the letter will be placed in the student’s file.

If the appeal is denied, the student can file an academic grievance with the Dean of the School of Nursing.

Legal Sanctions
Specific acts under which students are subject to sanctions are outlined in detail in the Saint Louis University Student Handbook. See the Office of Student Responsibilities and Community Standards website for a copy of the handbook and additional information about student responsibilities and standards https://www.slu.edu/life-at-slu/community-standards/index.php

Registration
After the first semester of the program, students will register themselves with guidance from the option coordinator. REGISTRATIONS ARE SUBJECT TO ADMINISTRATIVE CHANGE TO INSURE THAT ALL STUDENTS ARE PLACED IN COURSES THEY NEED AND COURSES AND CLINICAL GROUPS ARE BALANCED ACCORDING TO FACULTY AVAILABILITY AND CLINICAL AGENCY REQUIREMENTS.

Failure to Register
Students who fail to register for courses for two consecutive semesters will be required to reapply to the School of Nursing in order to reactivate their records. Such students will be required to meet the curriculum requirements in force at the time of readmission.

Late Registration for Nursing Courses
Students are expected to be present for the first scheduled class in nursing courses in order to receive full benefit of the course orientation. Students are not allowed to report late for these courses without the prior permission of the course coordinator.

Students may be administratively withdrawn from courses with clinical components if, in the opinion of the course coordinator and program coordinator, they have insufficient information to progress in the course without considerable individual orientation.
**Course Extension / Incomplete Courses**
To receive additional time to complete courses students must:
1. Submit completed Petition for Course Completion Extension (Student Form #2: https://www.slu.edu/registrar/register/forms.php) and
2. Receive approval by the instructor.

Students must complete the course work by the approved deadline, which cannot be longer than one year after the course’s final grades were due.

Two exceptions are:
1. Incompletes in prerequisite courses must be completed and graded prior to the first meeting for which the course is a prerequisite.
2. Incomplete courses for a graduating student must be completed and graded 30 calendar days after the conferral date.

An Incomplete Course will be awarded a grade of “F”, by the Office of the University Registrar, if the course is not completed by the approved deadline.

**Withdrawal or Leave of Absence from Saint Louis University**
If needed, contact your advisor, faculty mentor, and/ or option coordinator to determine which option would be best for you, given your situation. See https://www.slu.edu/registrar/register/forms.php or information about the process and things to consider when making this decision.

**Matriculation for the AMSN student to Advanced Nursing Practice Programs at Saint Louis University School of Nursing (Post-Master’s Nurse Practitioner Certificate and DNP)**
As an AMSN student, you have completed a 3.0 credit hour Advanced Health Assessment Course (NURS 5115). This course meets the Masters Essentials for accreditation for MSN education, but does not meet the requirements for an advanced practice nurse. Therefore, in order to matriculate to the Advanced Practice Programs, you will need to take a 2 credit hour Advanced Health Assessment course that contains essential content to prepare you for your role as a nurse practitioner.

The following courses will be credited toward your matriculation: Advanced Pathophysiology, Advanced Pharmacology and Health Promotion (updated August 2017).

**CAMPUS ACTIVITIES AND PROJECTS**

**National Nursing Student Association**
Students are urged to become members of the National Nursing Student Association, which is part of the State Association. The School of Nursing does have a constituent organization in which TBSN, ABSN, and AMSN students are invited. Students will be made familiar with the Student Association. A schedule of meetings will be posted on the student bulletin board on the ground floor of the School of Nursing.

**SIGMA, Global Nursing Excellence/ Delta Lambda at Large**
The Delta Lambda At Large Chapter of Sigma, Global Nursing Excellence, the honor society for nursing, was established at Saint Louis University in 1980. The chapter currently includes members inducted from Saint Louis University, Webster University, and community nursing leaders.

The mission of Sigma is advancing world health and celebrating nursing excellence in scholarship, leadership, and service. (https://www.sigmanursing.org/why-sigma/about-sigma/sigma-organizational-factsheet)

Students who have achieved superior scholastic achievement and meet the criteria below will be invited to join the honor society. Induction into Sigma is usually held in spring, close to commencement.
Membership Criteria:
Graduate Students
- Complete ¼ of the nursing curriculum
- Achieve academic excellence with GPA of 3.5 or higher
- Meet the expectation of academic integrity

Reviewed and revised 5/11; 5/18

COMMUNICATION

Catalog
Information regarding University policies and programs may be found in the Saint Louis University Academic Catalog. The catalog may be found on the Saint Louis University Office of the Registrar website: http://www.slu.edu/registrar

E-Mail
Students are responsible for checking their e-mail, including SLU Blackboard, regularly for messages from their instructors, advisors, or others in the School of Nursing for information related to specific courses or School of Nursing activities and events.

ID Cards
The Health Sciences Center policy requires all students to display photo identification at all times. This policy will be rigorously enforced for all persons entering the buildings east of Grand. Students will have a University photo ID that can be adapted for regular wear by using a plastic holder. Public safety will challenge any and all individuals in the complex who do not display one of the acceptable forms of identification. The ID cards will be necessary to gain access to the School of Nursing after 4:00 pm weekdays and all day on weekends. In addition, students may be required to display their University photo ID during nursing examinations and other activities.

Student Opinions
Students are encouraged to actively participate in activities which affect their educational program in nursing by volunteering for faculty committee membership, attending faculty committee meetings as observers, and informing their student representatives of their suggestions and/or opinions. The philosophy of the School of Nursing states: “Nursing education is a collaborative endeavor of faculty and students in which each contributes and shares talents to enhance learning.” In keeping with this belief about education, students have both the right and responsibility to discuss and explore issues affecting this education and to express their opinions. Therefore, students are encouraged to interact, in this spirit, with faculty and administration both formally through committees and classroom discussion and informal discussion. Student opinions and suggestions are valuable for curriculum and course revisions and, as such, are sincerely welcomed by faculty.

Student Representatives on Faculty Committees
All students are informed via email of SON committee vacancies and the dates of various meetings. A student who is interested and whose schedule permits, may submit an expression of interest to the Associate Dean for Pre-licensure and Undergraduate Programs or the Committee chairperson. If selected, student responsibilities include:
1. Attend all meetings or notify alternate to attend.
2. Gather suggestions and comments from the student body in order to represent student thinking.
3. Report back to their respective classmates either in a class meeting or through a written communication. This report may be sent to each student individually or posted where students meet for class.

SCHOOL OF NURSING SCHOLARSHIPS AND LOANS
Saint Louis University makes every effort to assist students with financial aspects of their education.

The University’s Office of Financial Aid is your most important resource for financial assistance. The “Getting Started” packet is mailed to all admitted and re-enrolling students. It contains information about the various scholarships, grants and loan programs along with a FAFSA (Free Application for Federal Student
If you have been admitted or are a continuing student and have not yet completed the FAFSA, please call and request one from the Financial Office (314) 977-2350 or 800-325-6666. The FAFSA should be submitted as early as possible. WE RECOMMEND MAILING NO LATER THAN FEBRUARY 28.

Our FAFSA school code is 002506

The School of Nursing administers several scholarships and loans primarily for currently enrolled nursing students. For additional information see: https://www.slu.edu/nursing/scholarships/index.php

Consider checking the local public libraries’ reference section for information on scholarships, loans, and fellowships for college students. The Financial Aid Office also has lists of work-study job opportunities for those students who qualify for the Federal Work Study Program. Ask a Financial Aid counselor if you qualify. Should you have questions, feel free to call the Office of Marketing and Recruitment at 977-8995.

GRADUATION

Degree Application
Deadlines for applying for a degree on the next graduation date are noted in the University Academic calendar. Application is made according to the direction of the Registrar’s Office and all candidates must complete a graduate survey as part of the application process. Degree conferral dates for the University are in March, May, June, August, October, and December and commencement ceremonies are held in May and December.

Graduation Requirements
Graduation requirements are as follows:

- Completion of all program requirements.
- Cumulative grade point average of 2.5.
- Last 30 hours in residence at Saint Louis University.

Formal application for degrees must be made prior to the posted deadline.

Assessment and Achievement Examinations
Throughout the nursing curriculum students are required to complete surveys and examinations to measure levels of performance related to specific outcomes of the curriculum. Prior to program completion, a comprehensive nursing examination will be administered. Students discuss the examination results with their academic mentors in preparation for the licensure examination. Cost of the examinations is borne by the student.

National Council Licensure Examination (NCLEX)
In 1991, the governing body of the National Council of State Boards of Nursing Delegate Assembly voted to implement computerized adaptive testing (CAT) for the administration of the NCLEX-RN. The examination is assembled interactively as the candidate answers the questions creating an examination tailored to each candidate’s skill level. Candidates do not need any computer experience in order to take the CAT examination; all candidates will receive the same training prior to taking the examination. The examination will be administered at designated sites around the state. There is no minimum amount of examination time; however, the successful candidate will answer a predetermined minimum number of 75 questions with a predetermined maximum of 265 throughout a 6-hour testing period. The Associate Dean will provide more specific information when it is time to apply to take the NCLEX examination. Application to sit for the exam in Missouri will include finger printing and criminal background checks. Information regarding eligibility to write the examination is found in the MO Nurse Practice Act. If a student plans to take the NCLEX-RN outside Missouri, they are encouraged to consult the Associate Dean for Undergraduate and Prelicensure Education’s Office about specific state application procedures.

Commencement, Cap and Gown Information
General Information for Commencement activities and events can be found at: http://www.slu.edu/saint-louis-university-commencement. Information for ordering caps and gowns can be found at: http://www.slu.edu/saint-louis-university-commencement/caps-gowns-and-more. A special graduate fair is held in March. At the fair, students may purchase rings and personalized announcements. The Office of Community Relations will provide additional information to the graduates in the spring semester.
School of Nursing graduation pins
Graduates are eligible to purchase the School of Nursing pin during their graduation year which is to be worn only after the degree is conferred. Purchase is optional. The selected company will provide information regarding price and purchase in the spring semester. Saint Louis University School of Nursing is not responsible for any transaction including the delivery of the pin.

Accommodations for Students with Disabilities
Students who believe that, due to the impact of a disability, they may need academic accommodations in order to meet the requirements of any class at Saint Louis University are encouraged to contact the Office of Disabilities Services at 977-3484; Busch Student Center Suite 331. Confidentiality will be observed in all inquiries.

In order for a student to receive accommodations, faculty must receive official documentation from the Disabilities Services Counselor describing the student’s accommodation requirements. It is the student’s responsibility to contact the course coordinator at the beginning of the semester so appropriate accommodations may be provided.

HEALTH CARE AND STUDENT SERVICES

Health Services
The Student Health Services for the University are located on the ground floor of Marchetti Towers East, 3518 Laclede. The telephone number is (314) 977-2323.

Change in Health Status
If a student is/ or becomes pregnant, injured or ill prior to or while enrolled in a clinical course, a letter must be obtained from the physician regarding any limitation of activity. This information will aid in planning and appropriate scheduling. The assigned clinical instructor will be responsible for discussing with the student the various risks involved (i.e. exposure to radiation and measles.)

Evidence of Health Insurance
Each year, the School of Nursing must obtain evidence of health insurance from each student prior to that student’s assignment at a facility.

Castlebranch
Castlebranch is the online clinical and healthcare requirement tracking system used by the School of Nursing. Students are required to set up an account in Castlebranch and upload the appropriate documentation and required forms prior to starting clinical rotations. Castlebranch accounts will be reviewed by School of Nursing faculty or staff prior to each clinical rotation and students will be ineligible for clinical experiences if their accounts are not in compliance.

Immunization Requirements (submitted and monitored via Castlebranch system)
1. **Diphtheria, Tetanus and Pertussis**
   Documentation of a primary series of diphtheria and tetanus toxoid (DTaP), 1 TDaP, then Td booster every ten years.

2. **Measles, Mumps and Rubella**
   Documentation of 2 immunization (4 weeks apart) OR positive surface aby titers (IgG).

3. **Tuberculin Test (An Annual Test)**
   Documentation of a negative tuberculin skin test within the past 12 months. The initial test must be a 2-step PPD skin test 7-30 days apart. Positive skin tests require a separate physician statement documenting treatment and/or absence of active/infectious tuberculosis. QuantiFERON Gold or T-SPOT will be accepted annually in lieu of PPD.

4. **Polio**
   Polio vaccine is not routinely given to adults, and therefore students are not required to receive a booster or a primary series if they were not previously immunized. Students should, however,
document their childhood polio vaccine immunization, in the unlikely event of epidemic disease, special requirements may be instituted.

5. **Hepatitis B**
   Evidence of three Hepatitis B vaccinations **AND** a positive surface antibody titer (IgG). If titer is negative, repeat the series of 3 immunizations then repeat titer 1-2 months after re-immunization #3.

6. **Chicken Pox**
   Documentation of 2 immunization, 4 weeks apart **OR** a positive surface antibody titer (IgG) for varicella.

7. **Influenza**
   Annual influenza immunization is required in the fall semester for all students who are in or will be participating in clinical during the flu season (October through May).

**Documentation and Enforcement**
Students must document compliance with these health care requirements via the Castlebranch system prior to the start of the first clinical. Failure to do so will result in the administrative cancellation of student’s registration in the nursing courses. Late registration fees will also be incurred.

**Acquired Immune Deficiency Syndrome (AIDS), Human Immunodeficiency Virus (HIV) and other Infectious Diseases: School of Nursing Supplement to the University Student Handbook**
Consistent with the School of Nursing philosophy that all persons have dignity and worth, School of Nursing faculty will include individuals who have AIDS, HIV, or other infectious diseases in their consideration of patients/clients for learning assignments, which are consistent with specific course objectives. In turn, School of Nursing students will accept learning assignments with patients/clients who have AIDS, HIV, and other infectious diseases unless such assignment would not be compatible with the student’s health condition, e.g., pregnancy, immunosuppressant. Similarly, in their University roles, faculty members, students, and staff members will not discriminate against 42 persons who are known to have or are suspected of having AIDS, HIV, or other infectious diseases.

Prior to the first learning experience with a patient/client in each course, the faculty member will ascertain that each student has the knowledge necessary to practice infection control management, as required for assignments related to general or specific

**Reporting an Injury or Illness**
If an injury should occur during a student’s clinical shift, the student MUST report it to the clinical instructor who will assist the student in completing an incident report at the agency (if required) and School of Nursing (Room 221). This must be completed within 48 hours of the incident. If medical care is necessary for either injury or illness, it must be arranged through the student’s individual medical insurance plan. Students maintain the right to seek medical treatment from the provider of their choice, but any expenses incurred will be borne SOLELY by the student. The School of Nursing cannot be responsible for the cost of any medical or health provider care.

A student may be unable to participate fully in a clinical activity due to illness, injury or pregnancy. Documentation from their health care provider that states it is safe to return to clinical practice must be submitted to the clinical instructor and course coordinator prior to their return to clinical.
ADDITIONAL POLICIES AND REGULATIONS

Computer Requirements for School of Nursing
All students in the School of Nursing are required to have a computer and certain accessories for secure testing. Students can have a Windows device or a Mac device, but it should meet the minimum specifications outlined below. Specifications may change over time. Chromebooks are not supported. The only supported tablet device is the Surface Pro.

All Devices
- All device operating systems require administrator-level rights/permissions.
- All devices require a working USB port. Newer devices may require an adapter.
- All devices must have a supported internet browser installed.
- Supported browsers: Chrome, Firefox, Microsoft Edge, Safari
- All devices require an Ethernet port (PC/Mac) or an Ethernet adapter appropriate for the device.
- An Ethernet cable is required for all devices.

Windows Requirements
- Operating system: Window 7, Windows 8, or Windows 10
  - Microsoft .NET Framework version 4.6 or higher
  - Internet Explorer 11.0 subsystem installed
  - Alternate versions of Windows 10, such as Windows RT, and Windows 10 S are NOT supported at this time.
  - Only genuine, U.S.-English versions of Windows Operating Systems are supported.
- CPU Processor: 1.86Ghz Intel Core 2 Duo or greater
- RAM: highest recommended for the operating system or 2GB
- Hard drive: highest recommended for the operating system or 1GB of available space
- Screen resolution: 1024x768 or higher

Surface Pro Requirements:
Surface Pro, Surface Books, and Surface Laptop devices are supported. Non-Pro Surface devices are not supported.
- An external keyboard (USB or Bluetooth) is required.
- Operating system: See Windows Requirements.
- Hard drive: 1GB or higher available space
- Screen resolution: 1920x1080

Mac requirements
- Operating system: Apple OS X 10.10 or higher
- CPU: Intel processor
- RAM: 2GB
- Hard drive: 1GB or higher free disk space
- Screen resolution: 1024x768 or higher

CPR Requirement
All students are required to be certified by the American Heart Association at the completion level for infants, children and adults and to maintain the certification throughout their clinical courses. Certification must be completed prior to the 1st day of the first clinical or registration will be cancelled. Late registration fees will be incurred. Documentation of CPR compliance occurs via Castlebranch.

Examination of Records by Students
Students desiring to examine their unofficial academic record maintained in the School of Nursing shall make a written request to the Associate Dean. The student will then be advised as to the time and place the record can be reviewed.

Parking
Student parking facilities are provided at both campuses. Parking is on a first-come, first-serve basis for a fee payable each semester. Public safety personnel are available to escort students to their cars. When
traveling between the Frost and Health Sciences Center Campuses, the Billiken shuttle service may be used. Billiken shuttle schedules are available at https://www.slu.edu/facilities-services-home/departments/transportation-services. Students are advised not to use street parking.

**SLU Ride Program**
Don't walk alone at night. Call 977-RIDE. A van escort, golf cart escort, or walking escort will be provided for those individuals traveling from one area of campus to another. The mode of transportation provided will be based on designation and availability.

**Professional Liability**
Students at Saint Louis University Health Sciences Center are covered by the voluntary professional liability program begun in 1976. Under this program, Saint Louis University, subject to the provisions and limitations of a Letter of Indemnity, herefore executed by the University setting forth the terms of the program, will pay “all sums those protected may become legally obligated to pay as compensatory damages because of injury or death to any person arising out of the rendering of or failure to render health care services.”

This protection is provided under this agreement to any student performing health services without remuneration, on or off the University premises, upon recommendation of the Dean of the School of Nursing or other designate. In other words, this protection applies under the terms of this agreement only when performing health services under the supervision of a faculty member as part of specific course requirements in the School of Nursing. The student must be registered for the class to be covered by the liability program.

This protection does not apply to injury or damage resulting from the acts or omissions of a student while intoxicated, under the improper influence of drugs or narcotics, engaged in a criminal act, or willfully or intentionally causing harm.

Upon becoming aware of any alleged incident to which this protection applies, written notice containing detailed information should be forwarded to the Dean of the School of Nursing’s Office.

The extent of annual protection provided to students shall be $2,000,000, per occurrence per student with a maximum annual total of $2,000,000 per student. The annual limit of financial liability of Saint Louis University for all claims shall not exceed $6,000,000. A complete copy of the letter of indemnity may be examined in the Dean’s office.

**Missouri Nurse Practice 335.066**
Students must have successfully completed the prescribed course of study as required by the Saint Louis University School of Nursing in order to apply to take the state board examination for licensure. Application to sit for the exam in Missouri will include finger printing and a criminal background check.Students may view the Missouri Nurse Practice Act at http://www.moga.mo.gov/mostatutes/chapters/chapText335.html

Applicants should be aware that completion of the program of study does not guarantee eligibility to write the licensure examination and that the Missouri State Board of Nursing may refuse to issue a nursing license for the following causes:

1. The board may refuse to issue any certificate of registration or authority, permit or license required pursuant to Sections 335.011 to 335.096 for one or any combination of causes stated in subsection 2 of this section. The board shall notify the applicant in writing of the reasons for the refusal and shall advise the applicant of his rights to file a complaint with the administrative hearing commission as provided by chapter 621 RSMo.
2. Violation of the drug laws or rules and regulations of this state, any other state, or the federal government.
3. Placement on an employee disqualification list or other related restriction or finding pertaining to employment within a health-related profession issued by any state or federal government or agency following final disposition by such state or federal government or agency.

The Missouri State Board of Nursing has adopted the following rule:
An applicant for licensure by examination who answers yes to one or more of the questions on the application which relate to possible grounds for denial of licensure under section 335.066, RSMo, shall submit copies of appropriate documents related to that answer before his/her application will be considered complete. The copies shall be certified if they are records of a court or administrative government agency.
This means that, in addition to the separate notarized statement, the applicant must provide the State Board of Nursing office with supporting documents. This information need not accompany the application, but must be provided before a decision can be made regarding eligibility to take the licensure examination.

Examples of court documents related to a conviction or convictions could be Information Complaint or Indictment Sheets, the Judgment or other documents showing disposition of the case. This can also be referred to as the Order of Probation. The court documents MUST BE CERTIFIED.

**Client’s right to privacy**
The nurse safeguards the client’s right to privacy by judiciously protecting information of a confidential nature. An accompanying interpretive statement elaborates:

> The right of privacy is an inalienable right of all persons, and the nurse has a clear obligation to safeguard any confidential information about the client acquired from any source. The nurse-client relationship is built on trust. This relationship could be destroyed and the client’s welfare and reputation jeopardized by injudicious disclosure of information provided in confidence. Since the concept of confidentiality has legal as well as ethical implications, an inappropriate breach of confidentiality may also expose the nurse to liability.

Students are expected, without exception, to observe the patient’s right to privacy. Students are required to complete the HIPAA training in order to participate in clinical. Sharing client information via any means, including electronic media is considered a breach of confidentiality. Failure to comply with this policy will result in serious consequences.

**Transportation of Patients**
Students are not to transport patients as a part of the educational experience. If a student does transport a patient, the School does not assume responsibility.

**Tobacco Policy**
_This policy applies to all members of the SLU community, including students, faculty, staff, patients, contractors, and visitors to campus._

For the purpose of this policy, “tobacco” is defined to include, but not be limited to, any lit cigarette, cigar, pipe, bidis, clove cigarette, e-cigarettes, any other smoking product; smokeless or spit tobacco, also known as dip, chew, snuff, or snus in any form; and any other tobacco product or device not approved by the FDA for the strict purpose of tobacco cessation.

The use, distribution, or sale of tobacco, including any smoking device, or carrying any lit smoking instrument, in University owned, leased, or occupied facilities or on University leased, owned, or occupied property, at events on University Properties, or in University-owned, rented or leased vehicles, is prohibited. This includes:

- All campuses, Parking facilities and lots (including in personal vehicles);
- SLU buildings located near city/municipality owned sidewalks, within 25 feet of entryways or exits, near air intakes, or near fire/explosion hazards;
- Off-campus housing managed by SLU; All university housing managed by SLU; and
- Hotels and other establishments operated by SLU.

For additional information about this policy see: [http://www.slu.edu/tobacco-free-policy](http://www.slu.edu/tobacco-free-policy)

Approval Body: President’s Coordinating Council (PCC)
Approved: May 7, 2015   Effective Date: July 1, 2016
The Uniform Policy
Some forms of dress or body adornment, while acceptable in social settings, interfere with developing an effective nurse-patient relationship. The following guidelines were established to assist in developing a professional appearance and to insure the safety of both the patient and the student.

Guidelines for Uniforms and Equipment for Clinical Courses
Students are to dress in a professional manner whenever they are in a clinical agency, with patients, in the skills lab, or in the simulation lab. Uniforms/scrubs are not to be worn outside of lab or clinical experiences. With the diversity of clinical agencies used by students for clinical experiences, acceptable uniforms may vary. Students should always follow instructions given by clinical instructors during orientation. Students may be dismissed from clinicals, lab, or simulations if the instructor deems attire is inappropriate.

GENERAL GUIDELINE:
1. All clothing must fit properly, be clean, pressed, and modest. Appropriate underwear must be worn. Underwear cannot be visible.
2. Navy blue scrubs are to be worn when caring for patients and when attending lab and simulations.
   a. Navy blue scrub tops with the Saint Louis University School of Nursing logo embroidered must be purchased from Saint Louis University Bookstore.
   b. Long sleeve t-shirts may be worn under the scrubs if they are solid, white, grey, black, brown, or navy.
   c. Navy blue scrub pants must be purchased from Saint Louis University Bookstore.
   d. Appropriate shoes must be worn with the navy blue scrubs. The shoes must have closed toe and heel with no mesh sides, and be of a neutral color (no neon), white, grey, black, brown, navy).
3. A white lab jacket with the Saint Louis University School of Nursing logo embroidered on it is to be worn over street clothes when going to health care areas to collect data, during observational experiences, and when identified as necessary by faculty. This lab jacket must be purchased from Saint Louis University Bookstore.
4. Hairstyles should be clean and well groomed. Hairstyles should be simple, with hair secured away from the face and hair color must be of a natural hue.
5. Facial hair should be neatly trimmed.
6. Jewelry:
   a. Wearing expensive jewelry is not recommended.
   b. Jewelry is to be limited to a wedding band or a ring with a flat setting.
   c. Only one pair of small button-type earrings worn in the earlobes is permitted.
   d. Necklaces and chains may be worn inside shirts.
   e. Bracelets should not be worn.
7. Nails:
   a. Nails must be kept clean, neat, well manicured, and of a reasonable length.
   b. Artificial nails may not be worn.
   c. Nail polish is not permitted.
8. Required equipment:
   a. Waterproof watch with a second hand or a digital second display.
   b. Stethoscope
   c. Bandage scissors
   d. Penlight
   e. Goggles/Safety glasses
   f. Basic calculator with no advanced features. It should only add, subtract, multiply, and divide.
   g. Nursing bags may be purchased from the bookstore.
   h. Sphygmomanometer (BP cuff) adult size
9. The Saint Louis University ID badge must be worn while in uniform. It is strongly encouraged that the student wears this ID badge whenever on campus.
10. No visible body piercings or tattoos are permitted.

Approval Body: Undergraduate and Prelicensure Program Committee Approved: 12/14/2006
Revised and Approved: 1/17/2008; 1/20/2010; 1/15/2015
**POLICIES/PROCEDURES IN THE CLARKE SKILLS LAB**

**Blood and body fluid precautions**

1. No student will be allowed to practice or perform any invasive procedure in the Clarke Skills lab without a faculty member present.
2. Non-latex gloves are available at all times for use during practice, demonstration, and check-off procedures for skills and physical assessment.
3. Students are taught proper use of gowns, masks, goggles, and gloves to prevent exposure to blood and body substances.
4. Students practice dressing and other skills on manikins with simulated wounds.
5. CPR manikins or any item used for ventilation is cleaned and disinfected after use. Disposable masks or plastic barriers are used when practicing CPR. One-way valves are used in masks and replaced after use.
6. NEEDLE USE AND DISPOSAL: Contaminated needles or sharps are not bent, broken, or sheared. They are not recapped or removed before placing in the sharps disposal container. If this is not feasible, students should use a mechanical device or the one-handed OSHA approved “scoop” method for recapping.
7. When performing invasive procedures on a human subject, students must wear gloves. After completion of a procedure, sharps are placed in appropriate containers. Any article containing blood, i.e. alcohol wipes, cotton balls, test strips, are disposed of by placing the item in one gloved hand, pulling the glove over the item and placing the entire contents into the second gloved hand. The second glove is pulled over the first glove, enclosing all contents. This package is then disposed of in a plastic lined trash container.
8. Disposal of contaminated materials is carried out according to OSHA standards and Saint Louis University Health Science Center policies for hazardous waste.
9. Any non-disposable equipment subject to contamination will be cleansed and disinfected using one part bleach to nine parts water, and/or an alternatively approved solution, for ten minutes.
10. All students must watch the CDC video “Exposure to Blood: What Healthcare Personnel Need to Know” each semester prior to beginning clinical experiences. The student must also pass the CDC Exposure to Blood exam.

**SIGNING OUT EQUIPMENT FROM THE CLARKE SKILLS LAB**

Equipment is available to check-out for student use while they are enrolled in Saint Louis University School of Nursing using the following procedure:

1. Faculty/Student must request to check-out equipment.
2. Faculty/Student will obtain equipment directly from a lab staff member.
3. A “check-out” form will be completed by the person responsible for the equipment. This must include the person’s name, e-mail address, phone number, and expected date to return the item.
4. The lab staff will keep a current record of checked-out equipment.
5. Equipment must be returned in a timely fashion preferably within 48 hours.
6. Equipment must be returned directly to a lab staff member. It may NOT just be placed on a counter in the lab.
7. Faculty/Students will be responsible for replacing or paying for any checked-out equipment that is damaged or lost. Failure to do so will result in grades being held until the situation is resolved.

**Procedure for Reporting Student Exposure to Blood-Borne Pathogens (For Campus-Based Students)**

Exposure requires completing a Report of Injury with SLU Employee Health and with the Business Office in the School of Nursing. The form can be obtained from the School of Nursing Business Office during normal business hours (8:00 a.m. – 5:00 p.m.), from this on-line SON STUDENT HANDBOOK or from the School of Nursing Faculty and Staff Manual (SON portal).

1. Complete the form as directed, documenting all information and appropriate signatures.
2. The individual who has incurred the exposure, e.g., needle stick, etc. (or if unknown, i.e., could have potentially incurred an exposure), should report immediately to one of the following for examination and testing:

   If the incident occurred at SLU Hospital during normal business hours (M-F from 7:30 a.m. - 3 p.m.):
If the incident occurred outside of normal business hours, or if the incident occurred at another agency:

- Emergency Department at the agency where the incident occurred and follow up with SLU Employee Health on the next business day
- Preferred provider of the individual

3. In events where injury with no exposure occurs, the clinical agency protocol should be followed.

4. Confidentiality will be maintained, and the individual who has incurred the exposure is expected to comply with procedures outlined by the applicable facilities for their treatment and follow-up.

5. Any medical expenses related to the incident will be the responsibility of the individual who has incurred the exposure and not the responsibility of Saint Louis University.

6. The individual who has incurred the exposure and source patients are required to obtain their own transportation to the testing/treatment site, if emergency transportation is not required.

7. Any concerns regarding medical bills for testing a source patient should be directed to SLU Risk Management (314-977-3952).

Approval Body: Administrative Council
Approved: 8/19/13
Revised and Approved: 8/18/15

Medication Calculation Competency (MCC)

**Policy**

The faculty at Saint Louis University School of Nursing (SLUSON) believe that the generalist nurse must be able to demonstrate the ability to calculate medication doses. This is consistent with the SLUSON end-of-program objectives, as well as our commitment to promoting and maintaining safe patient care. Therefore, the student must demonstrate proficiency at medication calculation before beginning clinical courses each semester. The student will be given three opportunities to achieve a 100% score on the MCC test. This ensures that the student is able to safely pass medications for the semester. Medication Calculation Competency certification is a prerequisite for clinical courses. This policy does not preclude specialty areas' medication calculation testing.

The content of the MCC test is approved by the Undergraduate and Pre-licensure Program Committee (UPPC). Any changes to the test plan or the testing procedure must be approved in advance by the UPPC. There are multiple versions of the MCC test; each version tests the same concepts.

**Procedure**

1. Medication calculation is taught in NURS 5005. Prior to beginning the required clinical experience in that course, the student must achieve 100% on the medication calculation exam. Student will have the opportunity to take the test up to 3 times in order to achieve the required 100%.

2. After successfully completing NURS 5005, students will be required to demonstrate medication calculation competence in each subsequent semester in which they are enrolled in the School of Nursing. The procedure for this will be as follows:
   a. During the 1st week of class each semester, faculty will arrange a day and time for the administration of the medication calculation exam.
   b. Students’ will need to achieve 100% on the medication calculation exam in order to participate in patient care in any course that semester.
   c. If 100% is not achieved on the first attempt, two subsequent attempts will be allowed outside of class time during the second week of the semester.
      i. A SON faculty member will be assigned to oversee retesting and remediation.
ii. Students are highly encouraged to use resources such as ProCalc for their own remediation
d. Students who do not achieve 100% after three attempts will be unable to pass medications and therefore will be unable to fulfill clinical course objectives. Students who are unsuccessful after 3 attempts will be dropped from clinical courses in which they are registered.

Approved: Undergraduate and Pre-Licensure Committee 8/19/13

REQUIREMENTS

**Competencies and Performance Standards Essential for Nursing Practice**

A nursing student must possess certain physical and mental attributes in order to provide safe and effective client care. The following competencies have been identified as essential to practice safely, with or without reasonable accommodations.

<table>
<thead>
<tr>
<th>Competencies and Performance Standards*</th>
<th>Examples (not all-inclusive)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Physical competence:</strong></td>
<td>Maneuver within confined spaces, move quickly, move and position clients, operate large and small equipment, lift objects up to 50 lbs., work entire 8-12 hr. shift.</td>
</tr>
<tr>
<td>Gross and fine motor skills, strength, mobility, and endurance sufficient to provide safe and effective nursing care.</td>
<td></td>
</tr>
<tr>
<td><strong>Sensory perception:</strong></td>
<td>Hear alarms, hear blood pressure &amp; heart sounds, observe client responses, read monitors &amp; charts, feel body surface characteristics &amp; pulses.</td>
</tr>
<tr>
<td>Hearing, vision and tactile function sufficient to assess and monitor health status and provide a safe environment.</td>
<td></td>
</tr>
<tr>
<td><strong>Critical and analytical thinking:</strong></td>
<td>Identify cause-effect, synthesize knowledge, transfer knowledge, process information, prioritize, problem solve, plan, implement and evaluate nursing care.</td>
</tr>
<tr>
<td>Critical and analytical thinking abilities sufficient for sound clinical judgment.</td>
<td></td>
</tr>
<tr>
<td><strong>Emotional stability:</strong></td>
<td>Adjust positively to stress/changing environment, keep attention focused, deal with unexpected, provide emotional support.</td>
</tr>
<tr>
<td>Emotional stability sufficient to maintain accountability and responsibility in a high stress environment.</td>
<td></td>
</tr>
<tr>
<td><strong>Interpersonal skills:</strong></td>
<td>Establish rapport with clients and colleagues, respect differences, negotiate conflicts.</td>
</tr>
<tr>
<td>Interpersonal skills/abilities sufficient to interact positively with others.</td>
<td></td>
</tr>
<tr>
<td><strong>Communication skills:</strong></td>
<td>Sharing information, teaching, explaining procedures, documenting, giving reports.</td>
</tr>
<tr>
<td>Communication abilities sufficient for interacting with others in verbal and written form.</td>
<td></td>
</tr>
</tbody>
</table>
Background Checks and Drug Screens
In order to promote a safe healthcare environment and meet program’s standards and requirements of the University, School of Nursing and clinical affiliates, prelicensure students are required to have a background check and drug screen prior to any clinical experience. The clinical agency maintains the right to deny a student to practice if a background check or drug screen is positive. In such cases, the inability to place a student in a clinical agency would prevent the student from completing the program. Costs of the background check and drug screen are borne by the student. The student must sign a statement allowing the School of Nursing to release background check and drug screen results at the request of the institution as a requirement of clinical placement. All information will be maintained in strict confidence by the School of Nursing. Drug screening will be done through the student’s Castlebranch account.

Reviewed: August 2004

Saint Louis University School of Nursing Drug Screening Policy
May 2005
The School of Nursing is committed to maintaining a safe, healthful, and efficient learning environment, which enhances the welfare of our employees, students, patients, and visitors. We therefore strictly prohibit the use of illegal substances by our students. This concurs with the University’s Drug and Alcohol abuse prevention policies that govern the actions of both its students and employees.

While Saint Louis University does not require drug testing of their students, an increasing number of our clinical affiliates do as a matter of individual institutional policy.

Therefore, in accord with the university’s position on drug abuse and as a direct result of certain individual institutional policies of our clinical affiliates any School of Nursing students whose curriculum and clinical placement mandates such are required to undergo drug screening prior to being assigned to their clinical rotations.

If the clinical affiliate requires that the university assure students have satisfactorily passed a drug screen, these screening procedures will be performed by Saint Louis University’s Student Health Department. Students will be responsible for any charges related to the drug screen. If the screening test results are not conclusive, then the student’s specimen sample must be sent to another facility for additional testing (i.e. confirmatory laboratory testing). While no additional specimen will be required an additional cost will be incurred for the confirmatory test.

The confirmatory test may result in the student being contacted by an independent physician, Medical Review Officer (MRO), who has been charged with interpreting test results. This would be the appropriate time for the student to produce documentation of current prescription medication that could influence the test results. This contact will not occur in all cases but students should be aware it is a possibility and should be ready to supply additional information if requested at that time. Students can facilitate the overall process by providing copies of prescription medications to the Student Health Department at the time they present for their urine test. Students are not required to disclose information related to prescribed medicine to their department/school faculty or staff.

A single negative drug screen does not preclude the requirement of additional screens at future clinical placements. The need for additional drug screens will be based on clinical affiliate requirements. Any student removed from a clinical affiliation based on the results of a drug screen will be subject to the process outlined in this policy.

Current procedure to obtain a drug screen:
1. Students will obtain initial drug screening through their Castlebranch account. All drug testing results must be submitted prior to the first clinical experience.

2. Students who are subject to repeat drug screens will fill out an authorization form at the program level for the release of student information. This will include the release of their name and school to student health for drug screening and the release of screen results if required by clinical affiliates. For repeat drug screens, students must go to the Student Health Services at Marchetti Towers (East) with their SLU picture identification badge. Screening tests will be performed on site.
Students fill out required student health paperwork and provide a urine sample on site for testing. If confirmatory testing is not required (i.e. the sample is clearly negative in the screening procedure), a negative report will be sent to a confidential fax located in the School of Nursing for all nursing students. Subsequently the report will be sent to the appropriate option coordinator. No further action is required.

If confirmatory laboratory testing is required (i.e. the test site requires additional clarification), the sample is sent to an independent laboratory. This will require 48 to 72 hours to obtain the results and may require that the student be contacted for additional information by the MRO charged with interpreting the confirmatory test. This may require students to produce documentation of prescription medication that could influence the test results. **The student must respond to the MRO in a timely manner (within 5 days of the MRO's inquiry) or the test will be reported as positive.** The lab confirmatory test will have an additional charge. If this confirmatory test is reported to the school as negative no further action is required.

If the lab confirmatory test is positive the Associate Dean will receive a copy of the report. Student Health will then directly refer the student to Counseling Services for an evaluation and a treatment plan will be outlined. Implementation and follow through on the treatment plan are required, including signing all requested consent forms and releases. Failure to fully comply with the treatment plan will be reported to the student’s Associate Dean. **Any student with a positive drug screen will be subject to a delay in clinical placement and face the potential for ultimate dismissal from the program.**

Upon receiving the results of the counseling evaluation and treatment plan, the Associate Dean will decide if a student may continue in the program. Students judged eligible to continue in the program will be required to submit to another drug test. This test must be negative or the student is subject to immediate dismissal from the program. Any student that has tested positive for illegal drugs may be subject to a random drug screen at any time during the remainder of their academic career at Saint Louis University.

Any student dismissed as a result of this policy has a right to appeal. The appeal will follow the guidelines and procedures outlined in this handbook.

3. For additional information on the drug screening policy, please contact the faculty member who coordinates field experiences.
