Health Care Ethics
+ Albert Gnaegi Center for Health Care Ethics

Saint Louis University is a world-class Catholic, Jesuit institution educating nearly 13,000 students on two dynamic, urban campuses - in St. Louis, Missouri, and Madrid, Spain. Founded in 1818, the University is celebrating its bicentennial.

With a legacy of innovative academics and research, compassionate health care and faithful service, Saint Louis University attracts a diverse community of scholars who push intellectual boundaries in pursuit of creative, meaningful ways to impact the world, striving to serve a higher purpose and seek a greater good.

OVERVIEW

Established in 1979 to provide ethics education and consultations within the Saint Louis University School of Medicine, the Albert Gnaegi Center for Health Care Ethics has grown into an academic department with a multidisciplinary faculty with vibrant research, service programs and educational offerings.

The mission of the Center for Health Care Ethics is academic research integrated with teaching, learning and service in health care ethics. Consistent with this mission, the interdisciplinary Ph.D. program in health care ethics was established in 1996. The center’s faculty are nationally recognized, teach the vast majority of courses and supervise all dissertations in the center. The main program objective is to prepare individuals for careers in academic, corporate, research and clinical bioethics settings.

Students with master’s level or higher degrees complete 48 credit hours of coursework in four areas: foundations, context of health care, topics and scholars, and dissertation research. Student dissertations are on topics related to biotechnological, clinical, professional, organizational or research ethics. Students admitted directly after receiving their bachelor’s degree are required to complete an additional 12 credit hours of coursework.

Recognition:
Faculty from the center have influenced numerous bioethics debates in U.S. society, serving as consultants to the Nancy Beth Cruzan case, NASA, the Institute of Medicine, the United Network for Organ Sharing, the Agency for Healthcare Research and Quality and the Department of Health and Human Services. The faculty are well-respected in disaster relief ethics, clinical ethics, research ethics and integrity, as well as religion and medicine. The faculty are also recognized for their numerous publications in academic journals and internationally renowned books.

Career Paths:
Students from the fields of law, medicine, nursing, public health, philosophy and religious studies have joined the Ph.D. program in health care ethics. Graduates have been highly successful in finding excellent full-time positions both in the academy (teaching and conducting research in health care ethics) and in health care systems (as professional ethicists).

PROGRAM HIGHLIGHTS »

Our health care ethics program:

Has an integrated interdisciplinary curriculum and faculty.

Trains students to be both scholars and practitioners, placing graduates in academic as well as clinical, research and health care administration positions.

Provides funding to most full-time students.

FINANCIAL SUPPORT »

Graduate assistantships are awarded competitively to students who apply for full-time study in the Ph.D. program. The program seeks to fund coursework for all full-time students. Students engaging in dissertation research may be awarded graduate or research assistantships, external funding or dissertation research fellowships.
