## GRADUATE EDUCATION

### Supply Chain Management

#### + Richard A. Chaifetz School of Business

Saint Louis University is a world-class Catholic, Jesuit institution educating nearly 13,000 students on two dynamic, urban campuses - in St. Louis, Missouri, and Madrid, Spain. Founded in 1818, the University is celebrating its bicentennial.

With a legacy of innovative academics and research, compassionate health care and faithful service, Saint Louis University attracts a diverse community of scholars who push intellectual boundaries in pursuit of creative, meaningful ways to impact the world, striving to serve a higher purpose and seek a greater good.

#### OVERVIEW >>

The graduate business programs at Saint Louis University's Richard A. Chaifetz School of Business prepare students for the global business world with a curriculum firmly grounded in business theory and academic learning. Students develop a thorough understanding of values, teamwork, communication and leadership skills, and learn how to use them for strategic problem solving.

Through the Master of Science in supply chain management at the Richard A. Chaifetz School of Business, students learn the key business processes that drive profitable business growth, positioning them to hold a sustainable competitive advantage in the business world.

Consistently ranked among the top 20 in the nation by U.S. News & World Report, the supply chain management program teaches students how to use quantitative and computer models to provide and distribute the right quantities of the right goods or services to the right location at the right time.

Students will also gain additional exposure to the design, implementation and management of efficient ways to integrate the flow of materials and information among suppliers, manufacturers, warehouses and stores. The curriculum focuses on the theoretical as well as the applied supply chain and logistics skills that are essential in today's competitive global supply chain environment. Students learn operations management, logistics, information technologies, finance, lean/six sigma, ERP, project management and simulation to deliver the analytical skills employed in the public and private sectors.

The Chaifetz School's health care supply chain track in our Master of Science in supply chain management program offers a unique opportunity for students and professionals to learn the most up-to-date supply chain management tools specific to the health care industry. Students in this program not only gain classroom knowledge, but more importantly they will be integrated with industry experts in the health care area to obtain hands-on learning. This collaborative program with the College for Public Health and Social Justice at Saint Louis University is designed for working professionals, which enables them to complete the entire program within two years.
