Use of Assessment Data
1. How and when will analyzed data be used by program faculty to make changes in pedagogy, curriculum design, and/or assessment practices?
   *Every other year, typically in the spring/summer, data will be analyzed and action plans will be developed.*

2. How and when will the program faculty evaluate the impact of assessment-informed changes made in previous years?
   *In the year following a given change, program directors will follow up on action items from the previous year to determine impact and possible refinements or enhancements moving forward.*

Additional Questions
1. On what schedule/cycle will program faculty assess each of the program’s student learning outcomes? (Please note: It is not recommended to try to assess every outcome every year.)
   *Learning outcomes will be assessed each year, based on the current evaluation plan and, if needed, any changes necessitated in re-prioritizing due to changes to the curriculum or any contingency that may have arisen during the previous evaluation cycle year.*

2. Describe how, and the extent to which, program faculty contributed to the development of this plan.
   *Program faculty were involved in the development of the courses and their application to each program learning outcome, though the bulk of the burden has fallen to full-time, as opposed to adjunct, faculty. In addition, both full-time faculty and adjunct faculty have been highly invested in ensuring capstone projects meet program learning objectives and enhancing their courses so they better meet program learning outcomes.*

**IMPORTANT:** Please remember to submit any rubrics or other assessment tools along with this plan.
