Use of Assessment Data

1. How and when will analyzed data be used by program faculty to make changes in pedagogy, curriculum design, and/or assessment practices?
Every other year, typically in the spring/summer, data will be analyzed and action plans will be developed.
2. How and when will the program faculty evaluate the impact of assessment-informed changes made in previous years?
In the year following a given change, program directors will follow up on action items from the previous year to determine impact and possible refinements or enhancements moving forward.

Additional Questions

1. On what schedule/cycle will program faculty assess each of the program's student learning outcomes? (Please note: It is not recommended to try to assess every outcome every year.)
One-to-two learning outcomes will be assessed each year, based on the current evaluation plan and, if needed, any changes necessitated in re-prioritizing due to changes to the curriculum or any contingency that may have arisen during the previous evaluation cycle year.
2. Describe how, and the extent to which, program faculty contributed to the development of this plan.
Program faculty were involved in the development of the courses and their application to each program learning outcome, though the bulk of the burden has fallen to full-time, as opposed to adjunct, faculty. In addition, both full-time faculty and adjunct faculty have been highly invested in ensuring capstone projects meet program learning objectives and enhancing their courses so they better meet program learning outcomes.

IMPORTANT: Please remember to submit any rubrics or other assessment tools along with this plan.
