1. **Student Learning Outcomes**
   Which of the program’s student learning outcomes were assessed in this annual assessment cycle?

   SLO 1. Describe the cycle of intelligence and components of global security
   SLO 2. Use analytics to inform risk management decisions

2. **Assessment Methods: Student Artifacts**
   Which student artifacts were used to determine if students achieved this outcome? Please identify the course(s) in which these artifacts were collected. Clarify if any such courses were offered a) online, b) at the Madrid campus, or c) at any other off-campus location.

   Quizzes, mid-term exams, final exams and qualitative information built upon the program and course learning. It provided assessment of the learning outcomes for each course: Assessment activities include the following:

   | Specific artifact(s) used to demonstrate achievement: | 
   |---|---|
   | SSI 1500 = Quizzes/Discussion Board Posts (ONLINE) | 
   | SSI 3010 = Final BCP Plan/Paper | 
   | SSI 4960 = Final Presentation (IN PERSON/ZOOM) | 

   Number of students who achieved/partially achieved/not achieved the outcome
   - SSI 1500 – 15 Students Achieved Outcome / 0 partial / 0 Not Achieved
   - SSI 3010 – 10 Students Achieved Outcome / 0 partial / 0 Not Achieved
   - SSI 3600 – 9 Students Achieved Outcome 0 partial / 0 Not Achieved

   THERE ARE NO MADRID STUDENTS CURRENTLY ENROLLED IN THIS PROGRAM.

3. **Assessment Methods: Evaluation Process**
   What process was used to evaluate the student artifacts, and by whom? Please identify the tools(s) (e.g., a rubric) used in the process and include them in/with this report.

   Quantitative and qualitative data was collected using student course evaluations as well as qualitative information derived from the instructor of record for SSI 1500, SSI 3010, and SSI 4960

4. **Data/Results**
   What were the results of the assessment of the learning outcomes? Please be specific. Does achievement differ by teaching modality (e.g., online vs. face-to-face) or on-ground location (e.g., STL campus, Madrid campus, other off-campus site)?

   The data indicated success in achieving SLO 1 and SLO 2. These courses were taught entirely online, however, SSI 4960 Final Presentation was done in person for most students.
5. **Findings: Interpretations & Conclusions**

What have you learned from these results? What does the data tell you?

After reviewing input from students and faculty, there are no immediate changes. In SSI 4960 the importance of MS Excel (Part of SLO 2) was mentioned by 5 students, and this feedback will be disseminated to faculty within the program. At this time, feedback has been shared with the full-time faculty in the program. The report will be shared with adjunct faculty, and SSI students will be directed to the report on the University’s web site.

6. **Closing the Loop: Dissemination and Use of Current Assessment Findings**

   A. When and how did your program faculty share and discuss these results and findings from this cycle of assessment?

   Assessment data is shared via email with adjuncts and at the annual SPS faculty retreat/adjunct training in the Fall.

   B. How specifically have you decided to use findings to improve teaching and learning in your program? For example, perhaps you’ve initiated one or more of the following:

   - **Changes to the Curriculum or Pedagogies**
     - Course content
     - Teaching techniques
     - Improvements in technology
     - Prerequisites
   
   - **Changes to the Assessment Plan**
     - Student learning outcomes
     - Student artifacts collected
     - Evaluation process
   
   Please describe the actions you are taking as a result of the findings.

   Based on student and faculty feedback, the Blackboard courses are being shifted to Canvas with a common blueprint to ensure a standardized student experience (Improvement in technology) across courses in the program, regardless of the instructor presenting the course.

   If no changes are being made, please explain why.

7. **Closing the Loop: Review of Previous Assessment Findings and Changes**

   A. What is at least one change your program has implemented in recent years as a result of assessment data?

   Pre-requisites for 2000 level courses have been eliminated.

   B. How has this change/have these changes been assessed?

   C. What were the findings of the assessment?

   D. How do you plan to (continue to) use this information moving forward?

   We plan on constantly evaluating the course sequence and pre-requisites, based on instructor and student feedback.

**IMPORTANT:** Please submit any assessment tools and/or revised/updated assessment plans along with this report.
