**Use of Assessment Data**

1. How and when will analyzed data be used by program faculty to make changes in pedagogy, curriculum design, and/or assessment practices?

   In the fall, Program Directors will follow up on action items from the previous year to determine impact and possible refinements or enhancements moving forward. Any action items will be presented to adjunct faculty (the Program Director is the only full-time faculty member) during the fall faculty workshop for discussion and development of additional strategies or needed changes related to pedagogy, curriculum design, or assessment practice. Feedback will be summarized, and changes implemented with support from SPS leadership for the next iteration of the course where applicable or next academic year whichever comes first. Changes could include increased alignment between course and program learning outcomes, refinement of assessment and assignments between sections, or collection of data related to assessment to include greater qualitative data related to opportunities for improvement.

2. How and when will the program faculty evaluate the impact of assessment-informed changes made in previous years?

   The Program Directors will compare data from the current year to the previous year to assess the impact of changes made. Adjunct faculty will take part in this process through the gathering of their feedback and continual conversations throughout the year. This process of evaluation will commence in the late summer/early fall in time for the previously state faculty workshop.

**Additional Questions**

1. On what schedule/cycle will program faculty assess each of the program’s student learning outcomes? (Please note: It is **not recommended** to try to assess every outcome every year.)
Program Assessment Schedule

The following schedule provides an annual timeline for assessing the program’s student learning outcomes. The assessment schedule will be reviewed annually and modified to address emerging evidence needs for assessment of a particular SLO.

2. Describe how, and the extent to which, program faculty contributed to the development of this plan.

   The Program Directors in cooperation with other full-time and adjunct faculty are involved in the development of the courses and their application to each program learning outcome within the plan. These faculties are highly invested in ensuring that course projects and other associated artifacts are created in ways that student performance toward the learning outcome can be distinguished and evidence towards achievement reported.

**IMPORTANT:** Please remember to submit any rubrics or other assessment tools along with this plan.

Saint Louis University School for Professional Studies
Program Assessment Model

The School for Professional Studies has adopted the model described in this document for programmatic assessment. Starting with new programs, the model will be phased in for all SPS programs.

The model is designed to illustrate alignment among School, program and course student learning outcomes as well as an ongoing, cyclical assessment process.
