## **August Quiz Questions**

## Training

1. Laboratory Safety & Compliance Training is required annually for all principal investigators, research faculty, staff, students, and volunteers present in laboratories.

<mark>A.True</mark> B.False

- 2. All laboratory faculty, staff, students, and volunteers are required to review and complete laboratory specific training \_\_\_\_\_\_
  - A. Upon Initial Hire
  - B. Anytime lab space is changed
  - C. Anytime a new significant hazard is introduced
  - D. All of the Above
- 3. Which statement is <u>false</u> regarding what is taught to laboratory personnel in laboratory specific training?
  - A. Location of the Chemical Hygiene Plan
  - B. Locations of emergency equipment (eg first aid kit)
  - C. Proper disposal of waste
  - D. Food and drink are allowed in the laboratory
- Bloodborne pathogen awareness training is required for your job at SLU if you work with\_\_\_\_\_.
  - A. Human blood, human cell lines, human tissues
  - B. Hazardous chemicals and chemical waste
  - C. Non-human primate-derived cells
  - D. A and C
- 5. BSL-3 Awareness Training is <u>not</u> required for all personnel working in the BSL-3 laboratories.

A. True

B. False

6. What department at SLU provides the initial in-person ABSL-2 Facility Awareness Training?

A. Comparative Medicine

- B. Internal Medicine
- C. Environmental Health and Safety
- D. Department of Public Safety
- 7. The four-hour Radiation Safety Orientation is required for whom at SLU?
  - A. All Principal Investigators that work with radioactive materials.

B. Research laboratory staff that work in a lab with radioactive materials present, but do not directly use radionuclides.

C. All research laboratory staff that work with radioactive materials.

D. A and C

8. Shippers training (DOT/IATA) is required for anyone preparing and shipping infectious material by ground or air.

<mark>A. True</mark>

B. False

- 9. Lab-specific Biosafety Training is required for:
  - A. All researchers
  - B. All students
  - C. Lab personnel listed on eIBC protocols.
  - D. All of the above

10. A new researcher will be working with human blood, pathogens, and infected-animals in BSL-3 and ABSL-3 facilities. Which trainings would be required?

- A. Laboratory Safety & Compliance Training (LST)
- B. Laboratory Specific Training
- C. Lab-Specific Biosafety Training
- D. Bloodborne Pathogen Awareness Training (BBP)
- E. BSL-3 Facility Awareness Training
- F. Animal Care Mandatory Training and Orientation (provided by CM)
- G. Animal Biosafety Training (provided by CM)
- H. All of the above.
