Saint Louis University and YouGov surveyed 900 likely Missouri voters from February 9 to February 22 about current political issues in Missouri. The following pages present results for most survey questions. The margin of error for survey results for the full sample is 3.63%. Margins of error for questions asked to subsamples are listed below where available. Original data and analyses from the SLU Poll Directors are available at <http://www.slu.edu/poll>.

Funding and Support

The February 2026 SLU/YouGov Poll was funded by SLU's College of Arts & Sciences. Additional grant funding from the Missouri Humanities Council supports the poll. The Missouri Humanities Council, along with Saint Louis University's William L. Clay, Sr. Institute of Civic Engagement and Economic Justice, will host a public event on civic engagement on April 27, 2026.

About Saint Louis University

Founded in 1818, Saint Louis University is one of the nation's oldest and most prestigious Catholic research institutions. Rooted in Jesuit values and its pioneering history as the first university west of the Mississippi River, SLU offers more than 15,300 students a rigorous, transformative education that challenges and prepares them to make the world a better place. As a nationally recognized leader in research and innovation, SLU is an R1 research university, advancing groundbreaking, life-changing discoveries that promote the greater good.

Methodology and Weighting

YouGov interviewed 1448 Missouri (MO) registered voters, with the goal of screening for and surveying Missouri likely voters. The Missouri registered voters were then matched down to a sample of 1085, yielding a target subsample of 900 likely voters including 450 from each treatment group. The respondents were matched to a sampling frame on gender, age, race, education and treatment group. The sampling frame is a politically representative "modeled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2020 presidential vote.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity and education. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2024 presidential vote choice as well as a four-way stratification of gender, age (4-categories), race (3-categories), and education (4-categories). The weighted dataset of registered MO voters was then subsetted on likely MO voters, and the weights were trimmed and recentered around 1, to produce the final weights for Likely Missouri voters.

Following the 2020 census, the Missouri state legislature passed a bill in 2022 adopting new congressional district maps. In elections held using those maps, Republicans won 6 seats and Democrats won 2 seats in Missouri’s US House delegation. Last year, the Missouri state legislature passed a new bill adopting new congressional district maps, with the hope that Republicans would win 7 seats and Democrats would win 1 seat...Do support or oppose the state legislature adopting this new map of congressional districts?
